

CONTENTS

Preface	vii
List of contributors	ix
The relative importance of the chorioallantoic and yolk-sac placentas for the transfer of hydrophilic materials and γ -globulin in the guinea pig	
K.L. THORNBURG and J.J. FABER	1-11
Fc specificity and properties of IgG receptors of foetal rabbit yolk-sac membranes	
M. SCHLAMOWITZ	13-26
Fc receptors and selective immunoglobulin transport across rabbit yolk-sac endoderm	
A.E. WILD	27-36
Transmission of IgG subclasses to the human foetus	
D. CATTY, R. DREW and R. SEGER	37-43
Membrane receptors for IgG in the human placenta	
P.M. JOHNSON and R. MATRE	45-54
Transferrin and transferrin-receptors of human trophoblast	
W.P. FAULK and G.M.P. GALBRAITH	55-61
Receptors in cultured human trophoblast cells	
S.F. CONTRACTOR	63-75
Maternal-foetal lymphocyte interactions	
R. FINN	77-81
Fc receptors of lymphoid cell membrane	
J. MEHRISHI	83-117
Approaches to structural studies on Fc receptors	
A.R. REES and K.H. WALLACE	119-127
Studies of the production of biologically active subfragments from the Fc region of human IgG and their transport across the gut of the young rat	
I.M. HUNNEYBALL, W.A. HEMMINGS, D.R. STANWORTH and M.W. WAKELAM	131-142
Factors concerning in vivo and in vitro hydrolysis of gliadin wheat protein	
A.L. PATEY	143-146
Studies on the degradation of protein in the small intestine of the suckling rat	
R.E. JONES	147-158
Digestion and transmission of IgG by rat enterocytes	
B. MORRIS and R. MORRIS	159-169

The pinocytosis of chemically modified albumin	
P. AGARWAL and A.T. MOORE	171-183
In vitro studies of the fate of ^{125}I -labelled IgG within rat visceral yolk sac	
K.E. WILLIAMS and G.E. IBBOTSON	185-195
Vacuolation and non-specific protein transport by the new-born pig intestine	
M.W. SMITH, K.A. BURTON and E.A. MUNN	197-212
Biochemical markers of selective and non-selective protein absorption with special reference to intestinal proteolysis	
K. BAINNER	213-224
The importance of colostral trypsin inhibitors for the absorption of proteins by the neonatal piglet	
B.R. WESTRÖM, L.C.T. CARLSSON and B.W. KARLSSON	225-232
The role of oral immunisation in stimulating <i>E. coli</i> antibody of the IgM class in porcine colostrum	
J.W. CHIDLOW and P. PORTER	233-239
Improving immunoglobulin transfer to lambs	
R. HALLIDAY and M.R. WILLIAMS	241-247
The uptake of ^{125}I -labelled polyvinylpyrrolidone by adult rat gut in vitro	
J.F. BRIDGES and J.F. WOODLEY	249-257
Transmission of dietary protein through the adult rat gut	
E.W. WILLIAMS	259-268
The passage of macromolecules derived from dietary protein across the placenta in rats	
C. HEMMINGS and W.A. HEMMINGS	269-276
Absorption of horse-gamma-globulin: correlation between immune response and microcirculation in the gastro-intestinal tract of dogs	
J. SEIFERT, H. WELTZER, J. LENZ and W. BRENDDEL	277-286
Specific tolerance obtained by local antigenic stimulation of mucosal surfaces	
H. BAZIN	287-293
Immune responsiveness associated with oral immunisation	
H.F. SEWELL	295-307
The immune effects of ingested antigen in mice	
E.T. SWARBRICK and C.R. STOKES	309-318
Interference of intestinal absorption of heterologous albumin by oral immunization in high and low immune responder mouse lines	
C. ANDRÉ, F. ANDRÉ, J.L. VIALARD and M.C. FARGIER	319-325
Immunoglobulin G sub-classes in cerebrospinal fluid of patients with multiple sclerosis and in patients without neurological disease	
R. JEFFERIS, R. DREW and M. HAIRE	327-332
Transcellular protein transfer in foetal and perinatal life	
N.R. SAUNDERS and K.M. DZIEGIELEWSKA	333-347
The permeability of the blood-CSF barrier during foetal life in man and rat and the effect of brain antibodies on the development of the CNS	
M. ADINOLFI	349-364

Transmission of horseradish peroxidase across the arachnoid of optic nerve directly into the lymphatics and the distribution of the tracer within the nerve	
D. DE LA MOTTE	365-382
Transfer of circulating human IgA across the rat liver into the bile	
J.P. VAERMAN and I. LEMAÎTRE-COELHO	383-398
The liver: site of IgG catabolism	
T. FUKUMOTO and M.R. BRANDON	399-410
Dietary lectins and the anti-nutritive effect of gut allergy	
D.L.J. FREED	411-422
Functional significance of alpha-fetoprotein during pregnancy: immunosuppression, estrogen binding and morphogenesis	
R.K. CHANDRA	423-427
Dietary proteins in human milk (preliminary results)	
A.C. KULANGARA	429-430
