Series Preface v

Acknowledgements vi

Cover illustration vii

1. **Introduction** 1
 - Conceptualising imagery 1
 - Investigating imagery 2
 - Imagery and the brain 3
 - Is imagery a right-hemisphere function? 6
 - Summary 7
2. **Imagery as a phenomenal experience** 9
 - Galton's "breakfast-table questionnaire" 10
 - Betts's Questionnaire upon Mental Imagery 12
 - Marks's Vividness of Visual Imagery Questionnaire 16
 - Gordon's Test of Visual Imagery Control 21
 - The role of imagery in cognition 22
 - The loss of mental imagery 27
 - Brain activity during imagery 29
 - Summary 32
3. **Imagery as an internal representation** 35
 - Tests of spatial ability 35
 - The manipulation of mental imagery 41
 - Mental comparisons 45
 - Visuo-spatial working memory 49
 - Image and Mind* 54
 - Images and propositions 59
 - Imagery and the brain 61
 - Imagery in "split-brain" patients 64
 - Imagery in unilateral neglect 67

CONTENTS iii

<i>Image and Brain</i>	72
Summary	75
4. Imagery as a stimulus attribute	77
Imageability	77
Concreteness	83
Imageability and hemispheric asymmetries	86
Imageability effects and brain dysfunction	88
Dual coding or dual processing?	94
Summary	100
5. Imagery as a mnemonic strategy	103
Visualisers and verbalisers	104
Visualisers, verbalisers, and hemispheric asymmetry	108
Cognitive styles and memory strategies	110
Reported mediators in associative learning	113
Mental imagery as a mediating device	115
The effects of imagery instructions	117
Imagery and verbal instructions	121
Interactive and separative instructions	123
Dual coding or dual processing?	124
Imagery instructions and brain function	129
Summary	135
6. Conclusions	137
Imagery as a phenomenal experience	137
Imagery as an internal representation	138
Imagery as a stimulus attribute	138
Imagery as a mnemonic strategy	139
Imagery and the brain	139
Summary	142
References	143
Author Index	159
Subject Index	165
