

CONTENTS

Preface iii

Laboratory Operations and Safety:
Handwashing ix

PART I GENERAL MICROSCOPY AND ASEPTIC TECHNIQUE 1

- 1 Laboratory Safety: Introduction
to the Microscope 3
- 2 Transfer and Isolation
Techniques 15
- Microbes in the Environment 22

PART II MICROBIAL MORPHOLOGY, DIFFERENTIAL STAINS 29

- 3 Cultural and Cellular Morphology
31
- 4 Bacterial Growth 39
- 5 Gram Stain 47
- Acid-Fast Stain 49
- 6 Endospore Stain 55

Capsule Stain 57

Hanging Drop Technique 57

7 Fungi 63

8 Viruses—Visualization and
Enumeration 69

9 Parasitology 75

PART III MICROBIAL CONTROL AND BIOCHEMISTRY 85

- 10 Microbial Sensitivity Testing:
Ultraviolet Light Sensitivity 87
- Heat Sensitivity 90
- Chemical Sensitivity 91
- Antibiotic Sensitivity:
Kirby-Bauer Method 93
- 11 Bacterial Biochemistry 101
- 12 Gas Requirements of
Microorganisms 111
- 13 Specialized Media 117

PART IV

MEDICAL MICROBIOLOGY 125

- 14** Genetics 127
- 15** Epidemiology 133
- 16** Speciman-Handling Protocols 139
- 17** Specific Laboratory Tests 149
- 18** Serology 155
- 19** Identification of Enteric Pathogens: Traditional Methods 165
- 20** Identification of Enteric Pathogens: Rapid Identification Methods 173
- 21** Identification of a Bacterial Unknown 183

PART V

FOOD AND ENVIRONMENTAL MICROBIOLOGY 191

- 22** Identification and Quantification of Microbial Numbers in a Water Sample 193

- 23** Identification of Microbes in Beef and Poultry and the Quantification of Microbial Numbers 199

- 24** Soil Microbiology 205

- 25** Microbial Ecology 211

Photographic Atlas 216

Appendix 1 219

Appendix 2 224

Appendix 3 225

Credits 226
