

CONTENTS

I	Life: Its Characteristics and Study	1
II	Life: Its Chemical Basis	9
III	Life: Its Structural Basis	17
IV	Photosynthesis: Energy Fixation	25
V	Respiration: Energy Harvest	33
VI	The Intake and Processing of Nutrients	39
VII	Control Within Cells	47
VIII	Immunity, Viruses, and Cancer	53
IX	Control by Hormones	59
X	Control by Nervous Systems	67
XI	Behavior	75
XII	The Interaction of Control Systems: Homeostasis	83
XIII	Asexual Reproduction	89
XIV	Sexual Reproduction	95
XV	Mendel and the Beginning of Genetics	103
XVI	Post-Mendelian Genetics	113
XVII	Development	125
XVIII	Chemistry of the Genetic Material	131
XIX	Population Genetics: An Introduction to Evolution	137
XX	Adaptation and Speciation	145
XXI	Evolution: Evidence and Theories	151
XXII	Ecosystems: Physical Aspects and Structure	159
XXIII	The Ecosystem Concept	165
XXIV	Interaction in Ecosystems	173
XXV	Ecological Geography	181
