CHAPTER 1 LIFE: ITS CHARACTERISTICS AND STUDY Biology and Public Affairs 1 Characteristics of Living Things 2 Methods of Study 9 Basic and Applied Research 11 Questions for Discussion and Review 12 CHAPTER 2 CELLS: THE STRUCTURAL BASIS OF LIFE 15 Development of the Cell Concept 15 Techniques for Studying Cells 16 Some General Features of Cells 20 Structures in the Cell 22 The Life Cycle of a Cell 34 Cells as Basic Biological Units 35 Some Recent Advances in Cell Study 36 Questions for Discussion and Review 37	CHAPTER 3 LIFE: ITS CHEMICAL BASIS 39 Atoms and Molecules 39 Bonds and Energy 40 Common Substances in Living Systems 43 Some Physical Phenomena 53 Recent Advances 56 Questions for Discussion and Review 57 CHAPTER 4 PHOTOSYNTHESIS 59 Historical Background 59 The Photosynthetic Reaction 60 The Light Reactions 60 The Dark Reactions 61 The Light Reactions: Some Details 61 The Dark Reactions: Some Details 62 Fate of PGAL 63 Site of Photosynthesis 64
--	---

Role of Environmental Factors in Photosynthesis	67	CHAPTER 10 BEHAVIOR	145
Questions for Discussion and Review	70	Some Principles of Behavior	147
CHAPTER 5 RESPIRATION: ENERGY HARVEST	73	Behavior as an Adaptive Mechanism	149
Respiration: An Overview	74	Human Behavior	156
Respiration: Summary of Stages	74	Questions for Discussion and Review	157
Respiration: Some Details	76	CHAPTER 11 HOMEOSTASIS: THE	159
Respiration of Proteins and Lipids	79	MAINTENANCE OF LIFE	160
Some Variations in Respiration	79	Stomata	161
Questions for Discussion and Review	81	Blood Gases	161
CHAPTER 6 NUTRIENTS AND THEIR	83	Osmoregulation	162
FUNCTIONS	83	Disease and Homeostasis	167
Animal Nutrition	83	Questions for Discussion and Review	169
Plant Nutrition	91	CHAPTER 12 ASEXUAL REPRODUCTION	171
Some Recent Ideas	92	Cellular Reproduction: Mitosis	172
Questions for Discussion and Review	93	Major Categories of Asexual Reproduction	176
CHAPTER 7 DIGESTION, TRANSPORT, AND RESPIRATION	95	Advantages and Disadvantages of Asexual Reproduction	178
Digestion	95	Questions for Discussion and Review	181
Transport Systems	101	CHAPTER 13 SEXUAL REPRODUCTION	183
Respiratory Systems	107	Meiosis	183
Questions for Discussion and Review	111	Differentiation of Sex Cells	186
CHAPTER 8 CONTROL BY HORMONES	113	Getting the Gametes Together	189
Hormones in Animals	113	Fertilization	189
Hormones in Plants	121	Advantages and Disadvantages of Sexual Reproduction	190
Some Recent Ideas	125	Some Reproductive Strategies	191
Questions for Discussion and Review	127	Questions for Discussion and Review	202
CHAPTER 9 CONTROL BY NERVOUS SYSTEMS	129	CHAPTER 14 PATTERNS OF INHERITANCE	205
The Nerve Impulse	130	The Contribution of Gregor Mendel	205
Synaptic Transmission	132	Heredity and Meiosis	207
Differentiation of Stimuli	134	Test Cross	209
Trends in the Complexity of Nervous Systems	136	Some Other Hereditary Patterns	210
Some Recent Ideas	141	Chromosomes and Heredity	211
Questions for Discussion and Review	142	Quantitative Inheritance	216
		Human Heredity	217
		Questions for Discussion and Review	219

CHAPTER 15		CHAPTER 20	
DNA: THE HEREDITARY		THE ENVIRONMENT	299
MATERIAL	221	The Ecosystem Concept	300
Evidence from Microorganisms	221	Ecosystem Structure	300
How DNA Duplicates	223	Questions for Discussion and Review	308
DNA and Protein Synthesis	225		
Proteins and Cell Activity	230	CHAPTER 21	
The Mutation Concept	232	FUNCTIONS IN ECOSYSTEMS	311
Bacterial Genetics	234	Energy Acquisition and Use	311
Questions for Discussion and Review	237	Cycles	316
		Ecological Succession	320
CHAPTER 16		Questions for Discussion and Review	322
DEVELOPMENT	239		
Development of a Frog	240	CHAPTER 22	
Some Factors Controlling Development	243	INTERACTIONS IN ECOSYSTEMS	325
Development in Mammals	247	Predator-Prey Interactions	325
Development in Plants	249	Competition	330
Questions for Discussion and Review	252	Symbiosis	331
		Intraspecific Interactions	333
CHAPTER 17		Populations	334
POPULATION GENETICS: AN		Questions for Discussion and Review	338
INTRODUCTION TO EVOLUTION	255		
The Hardy-Weinberg Law:		CHAPTER 23	
Populations in Equilibrium	255	THE BIOSPHERE	341
Forces Changing Populations	259	Terrestrial Biomes	342
Some Applications	262	Marine and Freshwater Biomes	352
Questions for Discussion and Review	264	Questions for Discussion and Review	355
CHAPTER 18		CHAPTER 24	
ADAPTATION AND SPECIATION	267	SOME IMPORTANT	
Types of Adaptations	267	ENVIRONMENTAL PROBLEMS	357
Adaptation and Environmental Change	271	Air Pollution	357
Speciation: A Result of Adaptation	273	Water Pollution	360
Adaptive Radiation	278	Pesticides	361
Questions for Discussion and Review	279	How Did These Problems Arise?	364
		Questions for Discussion and Review	365
CHAPTER 19			
EVOLUTION: EVIDENCE		APPENDIX	367
AND THEORIES	281		
Evidence Supporting Evolution	281	GLOSSARY	377
Theories of Evolution	294		
Origin of Life	296	PHOTO CREDITS	389
Questions for Discussion and Review	297	INDEX	391
