

Contents

Prologue	ix
Chapter 1 The Development of Recombinant DNA Technology	1
Chapter 2 Structure and Function of DNA	13
Chapter 3 The Technology	35
Chapter 4 Gene Mapping, Structure and Function	58
Chapter 5 Molecular Pathology of Unifactorial Disorders	74
Chapter 6 Molecular Pathology of Some Common Diseases	97
Chapter 7 Prevention of Genetic Disease	121
Chapter 8 Treatment	161
Chapter 9 Some Broader Applications	180
Chapter 10 Problems and Future of Recombinant DNA	190
Glossary	200
Index	216
