

CONTENTS

Preface

PROBLEMS

1	Genetic constitution of a population	I
2	Changes of gene frequency	4
3	Small populations: I	7
4	Small populations: II	9
5	Small populations: III	11
6	Continuous variation	13
7	Values and means	15
8	Variance	17
9	Resemblance between relatives	19
10	Heritability	21
11	Selection: I	24
12	Selection: II	27
13	Selection: III	28
14	Inbreeding and crossbreeding: I	30
15	Inbreeding and crossbreeding: II	32
16	Inbreeding and crossbreeding: III	35
17	Scale	37
18	Threshold characters	39
19	Correlated characters	41
20	Metric characters under natural selection	45
