

Contents

Preface	page xiii
Acknowledgements	xv
Chapter 1	Problems of adaptation to a terrestrial environment
	1
Perspective	1
Structural adaptations	3
Preview of subsequent chapters	5
References	6
Further reading	7
Chapter 2	An overview of plant structure and development
	8
Perspective: origin of multicellularity	8
Some aspects of the shoot system of the vascular plant	10
Apical meristems	13
Primary tissue regions of the stem and root	16
Vascular bundle types	23
Secondary growth	25
Cells of the xylem	28
Cells of the phloem	33
References	35
Further reading	36
Chapter 3	The protoplast of the eukaryotic cell
	38
Perspective	38
Morphology of the protoplast	39
Movement of organelles in the protoplast	50
Ergastic substances	53
References	54
Further reading	56
Chapter 4	Structure and development of the cell wall
	57
Perspective	57
Structure and composition of the cell wall	58
Growth of the cell wall	64
Cell wall development	67
Plasmodesmata	71
References	75
Further reading	79

Chapter 5	Meristems of the shoot and their role in plant growth and development	81
Perspective		81
Apical meristems		81
Formation of leaf primordia		88
Transitional tissue regions		90
Intercalary meristems		93
The primary peripheral thickening meristem of monocotyledons		94
Cell growth and development		96
The effect of hormones on cell growth and development		96
Genetics and cell growth		97
The cytoskeleton and cell growth		98
Cell shaping by microtubules		99
References		100
Further reading		103
Chapter 6	Morphology and development of the primary vascular system of the stem	105
Perspective		105
Cellular composition and patterns of development of primary xylem		106
Cellular composition and patterns of development of primary phloem		109
Differentiation of primary vascular tissues		110
The role of auxin in the development of the primary vascular system		116
References		118
Further reading		119
Chapter 7	Sympodial systems and patterns of nodal anatomy	120
Perspective: leaf traces		120
Nodal structure of pteridophytes		120
Sympodial systems of seed plants		122
Leaf trace lacunae		131
The cauline vs. foliar nature of vascular bundles in the eustele		132
Phyllotaxy		133
References		136
Further reading		137
Chapter 8	The epidermis	138
Perspective		138
Epidermis of the shoot		138
Epidermis of the root		146

Stomata	147
The mechanism of movement in guard cells	149
Development of stomata	149
References	152
Further reading	152
Chapter 9	The origin of secondary tissue systems and the effect of their formation on the primary body in seed plants
	154
Perspective: role of the vascular cambium	154
The effect of secondary growth on the primary body	157
The effect of secondary growth on leaf and branch traces	159
References	162
Further reading	162
Chapter 10	The vascular cambium: structure and function
	163
Perspective	163
Structure of the vascular cambium	163
General overview of cambial activity	166
Plant hormones and cambial activity	170
Submicroscopic structure of cambial initials	171
The onset of dormancy and the reactivation of dormant cambium	172
Cytokinesis in fusiform initials	174
The problem of differential growth of cambial cells and immature cambial derivatives	175
References	176
Further reading	179
Chapter 11	Secondary xylem
	180
Perspective	180
Overview of the structure of secondary xylem	180
Secondary xylem of gymnosperms	183
Resin ducts	189
Secondary xylem of dicotyledons	190
Differentiation of tracheary elements	195
Patterns of distribution of xylary elements and rays	202
Tyloses	207
Mechanism of water transport	209
References	210
Further reading	213
Chapter 12	The phloem
	215
Perspective: evolution of the phloem	215
Gross structure and development of the phloem	216

The nature and development of the cell wall of sieve elements	221
Role of the cytoskeleton in wall development	224
The nature and development of the protoplast of sieve elements	225
Nature and function of P-protein	227
Distinctive features of the phloem of gymnosperms	229
The nature and function of companion cells and Strasburger cells	230
The mechanism of transport in the phloem	234
References	235
Further reading	238
Chapter 13 Periderm, rhytidome, and the nature of bark	240
Perspective	240
Periderm: structure and development	240
Formation of rhytidome	243
Lenticels	245
The outer protective layer of monocotyledons	246
References	247
Further reading	247
Chapter 14 Unusual features of structure and development in stems and roots	248
Perspective	248
Primary peripheral thickening meristem	248
Secondary growth in monocotyledons	249
Anomalous stem and root structure	250
References	256
Further reading	256
Chapter 15 Secretion in plants	257
Perspective	257
Substances secreted by plants	257
Mechanisms of secretion	258
Internal secretory structures	259
External secretory structures	263
References	269
Further reading	271
Chapter 16 The root	272
Perspective: evolution of the root	272
Gross morphology	274
Contractile roots and other highly specialized root systems	275
Apical meristems	276

The quiescent center and its role in development	280
Primary tissues and tissue regions	281
Lateral transport of water and minerals in the young root	289
Development of primary tissues	291
Auxin and tissue patterning	295
Lateral root development	295
Adventitious roots	297
Secondary growth	299
The root cap: its function and role in gravitropism	301
Mycorrhizae	302
Nitrogen fixation in root nodules	305
Root-stem transition	306
References	308
Further reading	313
Chapter 17 The leaf	316
Perspective: evolution of the leaf	316
Basic leaf structure	317
Leaf development	326
Role of the cytoskeleton in leaf development	331
Variations in leaf form, structure, and arrangement	333
Structure in relation to function	336
Photosynthesis and assimilate loading	336
Leaf structure of C_3 and C_4 plants	338
Supporting structures in leaves	339
Transfusion tissue in conifers	340
Leaf abscission	341
References	343
Further reading	347
Chapter 18 Reproduction and the origin of the sporophyte	350
Perspective: the plant life cycle	350
Reproduction in gymnosperms	351
Reproduction in angiosperms	355
Development of the seed in angiosperms	362
Fruit development and the role of fruits in seed dispersal	367
Seed germination and development of the seedling	369
Floral morphogenesis	370
Pollen-pistil interactions	374
Self-incompatibility	377
The role of the cytoskeleton in pollen tube growth	378
References	379
Further reading	383
Glossary	387
Index	421
