PART I PLANTS IN THE BIOSPHERE 1

1 Plants: The Basis of Life 3

The Biosphere	4		
Matter and Energy		The Source of Energy	The Transformation of Light Energy
Energy Transfer in the Biosphere		11	
Food Chains	Consumers	Symbiosis	
A Larger View	17		
Food Webs	Ecosystems	Food Pyramids	
Summary	22		
Review Questions	23		
SUPPLEMENT: Chemical Energy: Burning Hydrogen			25

2 Agricultural Revolutions 29

First Revolution: Domesticating Plants	29
The Earliest Agriculture	From Plant Domestication to Civilization
Studying Plants	Pause in Progress
Second Revolution: Plant Migrations and Agricultural Improvements	39
Third Revolution: Machines Replace Animals	42
Fourth Revolution: Genetics and Chemistry	43
Improving on Nature	Giving Plants Nutrients
and Pests	Controlling Weeds

Plants in Our Future	49
Summary	58
Review Questions	60
SUPPLEMENT: Foods	61

PART II KINDS AND USES OF PLANTS 65

3 Classifying the Green World: Plants with Flowers 67

Classification	68
The Early History of Classification	Linnaeus and the Plant Kingdom
From Kingdom to Species	Modern Classification
Flowering Plants: Similarities	77
The Basic Structure of Angiosperms	Pollination
the Life Cycle	Fertilization and
Taxonomy in the Supermarket	83
Dicots	Monocots
A Glimpse of Variations: Habitat and Structure	89
Terrestrial Plants	Aquatic Plants
Meat Eaters and Parasites	
Summary	94
Review Questions	95
SUPPLEMENT: Cells	96

4 The Green World: Plants without Flowers 100

The Gymnosperms	100
The Cone Bearers	Living Fossils: Gingko Trees and Cycads
Land Plants without Seeds	107
Ferns	Remnants of the Earliest Forests
Mosses and Liverworts	
Aquatic Plants: The Algae	114
Brown Algae	Red Algae
Phytoplankton	
Plantlike Organisms	117
Characteristics of Fungi	Fungi, Plants, and People
Blue Green Algae	
Some Unanswered Questions	124
Summary	126
Review Questions	127
SUPPLEMENT: Bacteria and Viruses	128

5 People's Plants 132

Wheat	132
Maize	134
Rice	136
Soybeans	137
Sugarcane	138

Sugar Beet	139
Potato	141
Cassava	142
Banana	143
Coffee	145
Cacao	146
Tea	148
Tobacco	150
Spices	151
Cotton	153
Rubber	155
Summary	156
Review Questions	158
SUPPLEMENT: Medicinal Plants	159

PART III STRUCTURE AND FUNCTION 163

6 The Developing Plant 165

The Basic Plan	165
From Embryo to Shoot	166
Seeds	The Developing Embryo
Leaves	The Germinating Seed
The Leaf Takes Shape	The Arrangement of Leaves
Buds and Branches	The Mature Leaf
Lateral Branches	174
Forms of Growth	Juvenile Foliage
Reproductive Organs	177
The Flower	The Fruit
Cones	
The Stem	181
Primary Growth	Secondary Growth
Annual Rings	Cork
Root Growth	190
Plant and Animal Development: A Comparison	191
Summary	194
Review Questions	196

7 Regulation of Development 197

Auxin and Its Effects	197
Plant Cells: Taking in Water	Cell Walls
Limiting Growth	Probing Deeper
Other Chemical Growth Regulators	203
Cytokinins	Gibberellins
Ethylene: The Ripening Gas	
Applying Hormones	205
Controlling Fruit Ripening	Weed Killers

Light and Development	210			
Analyzing Light and Pigments		Phototropism	Photomorphogenesis	
Photoperiodism		Red Light and Blue Pigments	"Florigen"	
Gravity	217			
Myths about Plant Growth	218			
Summary	220			
Review Questions	222			
8 How Plants Obtain Energy	223			
Photosynthesis	224			
Light Reactions		Dark Reactions	Products of Photosynthesis	Light and
Plant Adaptations		A Tool for Biochemical Investigations		
Respiration	232			
Fermentation		Aerobic Respiration		
The Carbon Cycle	237			
Summary	239			
Review Questions	240			
SUPPLEMENT: Plastids	242			
9 Plants and Minerals	246			
Mineral Requirements	246			
The Nitrogen Cycle	248			
The Role of Nitrogen		Obtaining Nitrogen	Nitrogen Fixation: Biological	
Sources		Nitrogen and Insectivorous Plants	Nonbiological Fixation of	
Nitrogen		Loss of Nitrogen		
Other Mineral Cycles	257			
Eutrophication		Pollution		
Plants and Soil	262			
Hydroponics		Mycorrhizae		
Myths about Plant Nutrition	265			
Summary	267			
Review Questions	269			
SUPPLEMENT: Soil	270			
10 Moving Water, Minerals, and Food	274			
The Transport of Water	275			
Transpiration and the Leaf's Anatomy		Protection from		
Desiccation		Moving Water	Water-Conducting Cells	
Water Uptake	285			
Mineral Uptake	289			
Mineral Carriers		Transpiration and Mineral Transport		
Transport of Food	292			
Movement in the Phloem Cells		The Sap	Loss of Sap	

Other Transport Systems	297
Lateral Transport	Transport of Latex and Pitch
Energy and Plant Interaction—Again	300
Summary	301
Review Questions	302

PART IV EVOLUTION OF PLANTS 305

Prologue (from the <i>Origin of Species</i>)	307
11 Genes and Sexual Reproduction	310
The Mechanism of Variation	311
Mendel's First Experiments: Dominant and Recessive Traits	Experiments
with Several Characteristics	Mendel's Laws of Heredity
Mendel	Reactions to
Finding the Genes	317
Discovering Cells	Mitosis
Meiosis	Meiosis and Variation
The Gene and Its Functions	325
Genes and Nucleic Acids	Replication of DNA
The Genetic Code	Mutations
DNA outside the Nucleus	Genetic Engineering
Pollination	334
Self-Pollination	Physical Vectors
Organisms as Vectors	
Hybridization and Plant Breeding	337
Hybrid Vigor	Applications of Plant Genetics
Triticale	
Seed Dispersal	342
Summary	344
Review Questions	346
12 Plant Propagation	348
Natural Forms of Asexual Reproduction	348
From Stems	From Roots
From Leaves and Buds	Asexual Embryos
Horticultural Propagation	353
New Directions	356
Summary	361
Review Questions	362
13 Time and Diversity	363
The Problem of Time	363
Catastrophe and Creation	Uniformitarianism and Neptunism
Time without Measure	A Modern Calendar
Classifying Time	367
Formation of Fossils	Geologic Time
Absolute Time: Radioactive	
Dating	

Life's Beginnings	375		
The First Microfossils		The First Land Plants	Flowering
Plants	Extinction		
Summary	380		
Review Questions	381		
SUPPLEMENT: Early Land Plants	382		

14 Processes and Patterns of Plant Evolution 385

Theories of Evolution	386		
Erasmus Darwin	Lamarck	Darwin's Revolution	
Natural Selection	390		
Variations in Organisms	The Struggle for Existence	Selection for	
Survival	Differential Survival		
Darwin and Mendel	393		
Evolution in Action	394		
Genetics of Populations	Varieties of Natural Selection	Adaptive	
Radiation	Examples of Adaptive Radiation	Convergent	
Evolution	Hybridization		
Coevolution	407		
In Reproduction	Defenses against Predators	Other Partnerships	
Limits of Diversity	414		
Summary	414		
Review Questions	416		
SUPPLEMENT: A Profile of Charles Darwin	417		

15 Plants and the Environment 421

Ecosystems	421		
Communities	Elements of Climate	Climate and the History of Plant	
Distribution	Life Zones	Examples of Biomes	
Forest Biomes	433		
Adaptations in the Forest	Diversity and Stability		
Desert Biomes	439		
Desertlike Environments	Adapting to Aridity	People and Deserts	
Plant Succession	450		
Cycling of Energy and Nutrients	Fire		
Managing the Land	453		
Introduced Plants	Mismanagement		
Summary	457		
Review Questions	459		
SUPPLEMENT: Plant Distribution and Continental Drift	460		
Appendix: Supermarket Taxonomy	465		
Glossary	473		
Suggested Readings	483		
Index	495
