

Contents

<i>Preface</i>	ix
Chapter 1 SOME COMMON MISCONCEPTIONS	1
Chapter 2 FOREST AND ENVIRONMENT INTERACTING	5
2.1 The forest	6
2.2 Geographical distribution and macroclimate	7
2.3 Tropical catenas	13
2.4 Man's profound influence	17
Chapter 3 THE ENVIRONMENT ANALYSED	20
3.1 Light and shade	21
3.2 Temperature variations	26
3.3 Water conditions	29
3.4 Availability of nutrients	36
3.5 The impact of wind and fire	40
3.6 Some biotic factors	43
Chapter 4 THE FOREST COMMUNITY	46
4.1 Vertical and horizontal structure	48
4.2 Features of tropical trees	56
4.3 Loss and replenishment	64
4.4 Why so rich a flora?	68
4.5 Attempts at classification	74
Chapter 5 THE PHYSIOLOGY OF TREE GROWTH	79
5.1 Bud-break	81
5.2 Rate of shoot elongation	85
5.3 Onset of bud dormancy	92
5.4 Growth of leaves	97
5.5 Leaf senescence and abscission	99
5.6 Cambial and root growth	104
5.7 Physiological changes with age	108
5.8 Flowering	111
5.9 Fruits and seeds	115
