Why Inducible Defenses?	3
<i>C. Drew Harvell and Ralph Tollrian</i>	
1. Coping with Life as a Menu Option: Inducible Defenses of the Wild Parsnip	10
<i>May R. Berenbaum and Arthur R. Zangerl</i>	
2. Adaptive Status of Localized and Systemic Defense Responses in Plants	33
<i>Johannes Järemo, Juha Tuomi, and Patric Nilsson</i>	
3. Why Induced Defenses May Be Favored over Constitutive Strategies in Plants	45
<i>Anurag A. Agrawal and Richard Karban</i>	
4. Evolution of Induced Indirect Defense of Plants	62
<i>Marcel Dicke</i>	
5. Consumer-Induced Changes in Phytoplankton: Inducibility, Costs, Benefits, and the Impact on Grazers	89
<i>Ellen Van Donk, Miquel Lüring, and Winfried Lampert</i>	
6. The Immune System as an Inducible Defense	104
<i>Simon D. W. Frost</i>	
7. Kairomone-Induced Morphological Defenses in Rotifers	127
<i>John J. Gilbert</i>	
8. Predator-Induced Defenses in Ciliated Protozoa	142
<i>Hans-Werner Kuhlmann, Jürgen Kusch, and Klaus Heckmann</i>	
9. Ecology and Evolution of Predator-Induced Behavior of Zooplankton: Depth Selection Behavior and Diel Vertical Migration	160
<i>Luc De Meester, Piotr Dawidowicz, Erik van Gool, and Carsten J. Loose</i>	

10. Inducible Defenses in Cladocera: Constraints, Costs, and Multipredator Environments	177
<i>Ralph Tollrian and Stanley I. Dodson</i>	
11. Predator-Induced Defense in Crucian Carp	203
<i>Christer Brönmark, Lars B. Pettersson, and P. Anders Nilsson</i>	
12. Density-Dependent Consequences of Induced Behavior	218
<i>Bradley R. Anholt and Earl E. Werner</i>	
13. Complex Biotic Environments, Coloniality, and Heritable Variation for Inducible Defenses	231
<i>C. Drew Harvell</i>	
14. Developmental Strategies in Spatially Variable Environments: Barnacle Shell Dimorphism and Strategic Models of Selection	245
<i>Curtis M. Lively</i>	
15. Evolution of Forager Responses to Inducible Defenses	259
<i>Frederick R. Adler and Daniel Grünbaum</i>	
16. Evolution of Reversible Plastic Responses: Inducible Defenses and Environmental Tolerance	286
<i>Wilfried Gabriel</i>	
17. The Evolution of Inducible Defenses: Current Ideas	306
<i>Ralph Tollrian and C. Drew Harvell</i>
