

CONTENTS

<i>List of Tables</i>	xi
<i>List of Figures</i>	xiii
<i>Preface</i>	xix
 CHAPTER ONE: Introduction	 1
CHAPTER TWO: The Hawaiian Islands as a Model Ecosystem	6
Model Systems	6
Microcosms and Well-studied Systems	8
<i>A Brief Natural History</i>	9
The Formation of the Hawaiian Islands	9
Determinants of Climate	15
Isolation	19
<i>Evolution, Conservation, and Culture</i>	20
Evolution and Speciation	20
Conservation Biology	22
Cultural Evolution	22
CHAPTER THREE: Gradients in Environmental Factors, Gradients in Ecosystems	24
The State Factor Framework	24
<i>Environmental Gradients as Model Systems</i>	26
Temperature	27
Precipitation	29
The Mauna Loa Matrix	30
<i>A Substrate Age Gradient across the Hawaiian Islands</i>	31
Age Control	35
Climate History	35
Basic Features of the Gradient	39
CHAPTER FOUR: Patterns and Processes in Long-term Ecosystem Development	42
<i>A Theory for Nutrient Dynamics during Ecosystem Development</i>	42

<i>Biogeochemical Processes on the Substrate Age Gradient</i>	45
Soil P Pools	45
C and N Pools	45
Available Nutrients	46
Foliar Nutrients	49
Forest Productivity	51
Efficiencies of Resource Use	53
Decomposition and Nutrient Regeneration	59
Soil Organic Matter Turnover	66
<i>Plant-Soil-Microbial Feedbacks</i>	66
CHAPTER FIVE: Experimental Studies of Nutrient Limitation and the Regulation of Nutrient Cycling	70
<i>Fertilization Experiments</i>	71
<i>Nutrient Limitation</i>	74
<i>Nutrient Availability and Plant-Soil-Microbial Feedback</i>	78
Tissue Nutrient Concentrations	78
Productivity	78
Resource Efficiencies	79
Decomposition	84
Nutrient Regeneration	87
<i>Controls of Plant-Soil-Microbial Feedback</i>	87
CHAPTER SIX: Nutrient Inputs to Hawaiian Ecosystems: Pathways, Rates, and Controls	92
Inputs of Elements	92
<i>Weathering</i>	93
Concepts and Definitions	93
Approaches	94
Element Inputs via Weathering	97
<i>Atmospheric Inputs</i>	98
Background	98
Deposition Measurements	100
Inputs of Water	101
Nitrogen Inputs	101
Influence of an Active Volcano	102
Inputs of Other Elements	103

<i>Long-Distance Dust Transport</i>	105
Background	105
Methods	105
Element Inputs	106
The Fate of Dust	107
<i>Biological N Fixation</i>	109
Background	109
Approach	109
Rates of Fixation	110
<i>Other Inputs</i>	110
<i>Combined Inputs by All Known Pathways</i>	111
Strontium Isotopes: A Direct Test of Input Pathways	112
Chloride and Sulfate	114
Mobile Cations	114
Silicon and Aluminum	116
Nitrogen and Phosphorus	117
CHAPTER SEVEN: Nutrient Outputs: Pathways, Controls, and Input-Output Budgets	121
<i>Output Pathways</i>	122
Leaching	122
N-Containing Trace Gases	124
Erosion	126
Other Pathways of Loss	126
<i>Rates and Controls of N and P Losses</i>	128
<i>Input-Output Budgets</i>	133
Budget Calculations	134
Using These Element Budgets	142
CHAPTER EIGHT: Issues and Opportunities	143
<i>Interactions of Time Scales</i>	143
An Exploratory Model	143
Supply versus Demand	144
Plant-Soil-Microbial Feedbacks	146
Sources and Sinks	148
Inputs and Outputs	150
Interactions across Scales	152

<i>The Regulation of Nutrient Inputs and Outputs</i>	154
Demand-Independent Pathways of Element Loss	155
Implications of Demand—Independent Nutrient Losses	159
<i>Stoichiometry and Flexibility</i>	160
Within-System Element Cycling	162
Inputs and Outputs	169
Biological N Fixation	173
<i>Differences in Populations, Species, and Diversity</i>	177
Biological Differences and Ecosystem Functioning	177
Diversity and Ecosystem Functioning	184
<i>Three Final Points</i>	188
<i>References</i>	191
<i>Index</i>	219
