Preface	ix
1 Vegetation ecology – an overview <i>Eddy van der Maarel</i>	1
2 Vegetation and environment: discontinuities and continuities <i>M.P. Austin</i>	52
3 Vegetation and ecosystems <i>Christoph Leuschner</i>	85
4 Vegetation types and their broad-scale distribution <i>Elgene O. Box</i> <i>& Kazuo Fujiwara</i>	106
5 Clonal plants in the community <i>Brita M. Svensson, Håkan Rydin</i> <i>& Bengt Å. Carlsson</i>	129
6 Plant dispersal potential and its relation to species frequency and co-existence <i>Peter Poschlod, Oliver Tackenberg & Susanne Bonn</i>	147
7 Vegetation dynamics <i>Steward T.A. Pickett & Mary L. Cadenasso</i>	172
8 Diversity and ecosystem function <i>Jan Lepš</i>	199
9 Species interactions structuring plant communities <i>Jelte van Andel</i>	238
10 Terrestrial plant–herbivore interactions: integrating across multiple determinants and trophic levels <i>Mahesh Sankaran & S.J. McNaughton</i>	265
11 Interaction between higher plants and soil-dwelling organisms <i>Thomas W. Kuyper & Ron G.M. de Goede</i>	286
12 Vegetation conservation, management and restoration <i>Jan P. Bakker</i>	309
13 Plant invasions and invasibility of plant communities <i>Marcel</i> <i>Rejmánek, David M. Richardson & Petr Pyšek</i>	332
14 Vegetation ecology and global change <i>Brian Huntley & Robert Baxter</i>	356
Index	373
