

BRIEF TABLE OF CONTENTS

PART 1	INTRODUCTION	1	16. Population Regulation	314	
	1. The Order of the Natural World	3	17. Metapopulations	329	
	2. Discovering the Order of Nature	19	18. Population Fluctuations and Cycles	346	
			19. Extinction, Conservation, and Restoration	360	
PART 2	ORGANISMS IN PHYSICAL ENVIRONMENTS	39	PART 5	POPULATION INTERACTIONS	381
	3. Life and the Physical Environment	41		20. Resources and Consumers	383
	4. Water and Solute Balance	53		21. Competition Theory	403
	5. Energy and Heat	71		22. Competition in Nature	424
	6. Response to Variation in the Environment	91		23. Predation	447
	7. Biological Factors in the Environment	116		24. Herbivory and Parasitism	479
	8. Climate, Topography, and the Diversity of the Natural World	138		25. Coevolution and Mutualism	504
PART 3	ENERGY AND MATERIALS IN THE ECOSYSTEM	171	PART 6	COMMUNITY ECOLOGY	519
	9. The Ecosystem Concept	173		26. The Concept of the Community	521
	10. Energy Flow in Ecosystems	185		27. Structure of the Community	539
	11. Pathways of Elements in Ecosystems	202		28. Community Development	564
	12. Nutrient Regeneration in Terrestrial and Aquatic Ecosystems	227		29. Biodiversity	588
	13. Regulation of Ecosystem Function	251	PART 7	EVOLUTIONARY ECOLOGY	619
PART 4	POPULATION ECOLOGY	269		30. Evolution and Adaptation	621
	14. Population Structure	271		31. Adaptations to Heterogeneous Environments	640
	15. Population Growth	298		32. Evolution of Life Histories	658
				33. Sex	676
				34. Evolution and Social Behavior	699
