List of contributors	page xi
Preface	xv
MANUEL MARÍ-BEFFA	
Introduction	1
JENNIFER KNIGHT	
SECTION I. GRAFTINGS	
1. Two developmental gradients control head formation in hydra	4
H. R. BODE	
2. Embryonic regulation and induction in sea urchin development	23
C. A. ETENSOHN	
3. The isthmus organizer and brain regionalization in chick embryos	37
D. ECHEVARRÍA and S. MARTÍNEZ	
SECTION II. SPECIFIC CHEMICAL REAGENTS	
4. Chemotaxis of aggregating <i>Dictyostelium</i> cells	50
G. GERISCH and M. ECKE	
5. Inhibition of signal transduction pathways prevents head regeneration in hydra	67
L. M. SALGADO	
6. Retinoic acid during limb regeneration	77
M. MADEN	

SECTION III. BEAD IMPLANTATION

7. Experimental manipulations during limb development in avian embryos 85
Y. GAÑÁN, J. RODRÍGUEZ-LEÓN, and D. MACÍAS
8. Induction of ectopic limb outgrowth in chick with FGF-8 99
Á. RAYA, C. RODRÍGUEZ ESTEBAN, and J. C. IZPISÚA-BELMONTE

SECTION IV. NUCLEIC ACID INJECTIONS

9. RNAi techniques applied to freshwater planarians (Platyhelminthes) during regeneration 106
D. BUENO, R. ROMERO, and E. SALÓ
10. Microinjection of *Xenopus* embryos 117
R. J. GARRIOCK and P. A. KRIEG

SECTION V. GENETIC ANALYSIS

11. Segmental specification in *Drosophila melanogaster* 127
L. DE NAVAS, M. SUZANNE, D. FORONDA, and E. SÁNCHEZ-HERRERO
12. Genetic analysis of flower development in *Arabidopsis thaliana*. The ABC model of floral organ identity determination 143
J. L. RIECHMANN
13. Genetic analysis of vulva development in *C. elegans* 153
S. CANEVASCINI

SECTION VI. CLONAL ANALYSIS

14. The role of the gene *apterous* in the development of the *Drosophila* wing 167
F. J. DÍAZ-BENJUMEA
15. *Extramacrochaetae*, an example of a gene required for control of limb size and cell differentiation during wing morphogenesis in *Drosophila* 178
A. BAONZA
16. Hedgehog transduction pathway is involved in pattern formation of *Drosophila melanogaster* tergites 190
M. MARÍ-BECCA

SECTION VII. IN SITU HYBRIDIZATION

17. Retinoic acid signalling controls anteroposterior patterning of the zebrafish hindbrain 205
G. BEGEMANN
18. Left-right asymmetry in the mouse 217
M. BLUM, A. SCHWEICKERT, and C. KARCHER

SECTION VIII. TRANSGENIC ORGANISMS

19. Bicoid and Dorsal: Two transcription factor gradients that specify cell fates in the early <i>Drosophila</i> embryo	231
S. ROTH	
20. Significance of the temporal modulation of Hox gene expression on segment morphology	255
J. CASTELLI-GAIR HOMBRÍA	
21. The UAS/GAL4 system for tissue-specific analysis of <i>EGFR</i> gene function in <i>Drosophila melanogaster</i>	269
J. B. DUFFY and N. PERRIMON	
22. Neurogenesis in <i>Drosophila</i> : A genetic approach	282
C. KLÄMBT and H. VAESSIN	
23. Role of the <i>achaete-scute</i> complex genes in the development of the adult peripheral nervous system of <i>Drosophila melanogaster</i>	296
S. SOTILLOS and S. CAMPUZANO	

SECTION IX. VERTEBRATE CLONING

24. The conservation of the genome and nuclear reprogramming in <i>Xenopus</i>	310
J. B. GURDON	

SECTION X. CELL CULTURE

25. <i>In vitro</i> culture and differentiation of mouse embryonic stem cells	316
A. ROLLETSCHEK, C. WIESE, and A. M. WOBUS	

SECTION XI. EVO-DEVO STUDIES

26. Microevolution between <i>Drosophila</i> species	330
N. SKAER and P. SIMPSON	

SECTION XII. COMPUTATIONAL MODELLING

27. Theories as a tool for understanding the complex network of molecular interactions	346
H. MEINHARDT	

Appendix 1. Abbreviations	355
---------------------------	-----

Appendix 2. Suppliers	363
-----------------------	-----

Index	371
