

CONTENTS

Chapter 1.	Introduction to Molecular Genetics and Genomics	1
Chapter 2.	DNA Structure and DNA Manipulation	15
Chapter 3.	Transmission Genetics: The Principle of Segregation	32
Chapter 4.	Genes and Chromosomes	54
Chapter 5.	Genetic Linkage and Chromosome Mapping	73
Chapter 6.	Molecular Biology of DNA Replication and Recombination	103
Chapter 7.	Molecular Mechanisms of Mutation and DNA Repair	119
Chapter 8.	Molecular Organization of Chromosomes	135
Chapter 9.	Human Karyotypes and Chromosome Behavior	147
Chapter 10.	Genetics of Bacteria and Their Viruses	168
Chapter 11.	Molecular Biology of Gene Expression	189
Chapter 12.	Molecular Mechanisms of Gene Regulation	210
Chapter 13.	Genetic Engineering and Genomics	224
Chapter 14.	Molecular Genetics of Development	242
Chapter 15.	Molecular Genetics of the Cell Cycle and Cancer	256
Chapter 16.	Extranuclear Inheritance	272
Chapter 17.	Population Genetics and Evolution	285
Chapter 18.	The Genetic Basis of Complex Inheritance	306
