

Brief Contents

Part One Introduction and Background	2
Chapter 1 The Nature of Ecology	4
Chapter 2 Adaptation and Evolution	17
Part Two The Physical Environment	42
Chapter 3 Climate	44
Chapter 4 The Aquatic Environment	65
Chapter 5 The Terrestrial Environment	84
Part Three The Organism and Its Environment	102
Chapter 6 Plant Adaptations to the Environment	104
Chapter 7 Animal Adaptations to the Environment	133
Chapter 8 Life History Patterns	163
Part Four Populations	184
Chapter 9 Properties of Populations	186
Chapter 10 Population Growth	204
Chapter 11 Intraspecific Population Regulation	223
Chapter 12 Metapopulations	241
Part Five Species Interactions	256
Chapter 13 Interspecific Competition	258
Chapter 14 Predation	283
Chapter 15 Parasitism and Mutualism	311
Part Six Community Ecology	332
Chapter 16 Community Structure	334
Chapter 17 Factors Influencing the Structure of Communities	353
Chapter 18 Community Dynamics	373
Chapter 19 Landscape Ecology	398
Part Seven Ecosystem Ecology	424
Chapter 20 Ecosystem Energetics	426
Chapter 21 Decomposition and Nutrient Cycling	450
Chapter 22 Biogeochemical Cycles	474
Part Eight Biogeographical Ecology	494
Chapter 23 Terrestrial Ecosystems	496
Chapter 24 Aquatic Ecosystems	523
Chapter 25 Land–Water Margins	547
Chapter 26 Large-Scale Patterns of Biological Diversity	564
Part Nine Human Ecology	576
Chapter 27 Population Growth, Resource Use, and Sustainability	578
Chapter 28 Habitat Loss, Biodiversity, and Conservation	607
Chapter 29 Global Climate Change	631
