xi Conference Committees

Part A Imaging, Manipulation, and Analysis of Biomolecules, Cells, and Tissues II

SESSION 1 MICROORGANISMS AND ORGANELLES

- 1 **Transillumination spatially modulated illumination microscopy for human chromosome imaging (Invited Paper) [5699-01]**
C. Pitris, P. Heracleous, Univ. of Cyprus (Cyprus); P. Patsalis, Cyprus Institute of Neurology and Genetics (Cyprus)
- 9 **Rapid identification of microorganisms by intrinsic fluorescence [5699-02]**
H. Bhatta, E. M. Goldys, Macquarie Univ. (Australia); R. Learmonth, Univ. of Southern Queensland (Australia)
- 19 **In vivo optical imaging of bacterial infection and antibiotic response in intact nude mice [5699-03]**
T. Xiong, Y. Chen, J. Chu, Z. Zhang, B. Liu, Q. Luo, Huazhong Univ. of Science and Technology (China)
- 26 **Fungal growth in confined microfabricated networks [5699-04]**
K. L. Hanson, Swinburne Univ. of Technology (Australia); L. Filippini, Swinburne Univ. of Technology (Australia) and CRC for Microtechnology (Australia); A. P. Lee, Univ. of California/Irvine (USA); D. V. Nicolau, Swinburne Univ. of Technology (Australia)

SESSION 2 CELLS

- 33 **Picosecond fluorescence lifetime imaging microscope for imaging of living glioma cells (Invited Paper) [5699-05]**
Q. Fang, Cedars-Sinai Medical Ctr. (USA); J. Wang, Y. Sun, T. Vernier, Univ. of Southern California (USA); T. Papaioannou, J. Jo, Cedars-Sinai Medical Ctr. (USA); M. M. Thu, M. Gundersen, Univ. of Southern California (USA); L. Marcu, Cedars-Sinai Medical Ctr. (USA) and Univ. of Southern California (USA)
- 40 **TIR fluorescence screening of cell membranes [5699-06]**
T. Bruns, Hochschule Aalen (Germany); W. S. L. Strauss, R. Sailer, Univ. Ulm (Germany); M. Wagner, Hochschule Aalen (Germany); H. Schneckenburger, Hochschule Aalen (Germany) and Univ. Ulm (Germany)
- 46 **Cholesterol dependence of cell membrane dynamics [5699-07]**
P. Weber, M. Wagner, Hochschule Aalen (Germany); R. Sailer, W. S. L. Strauss, Univ. Ulm (Germany); H. Schneckenburger, Hochschule Aalen (Germany) and Univ. Ulm (Germany)

- 53 **Immunophenotyping by slide-based cytometry and by flow cytometry are comparable** [5699-08]
A. O. H. Gerstner, W. Laffers, Univ. of Bonn (Germany); A. Mittag, IZKF Leipzig (Germany); I. Dähnert, D. Lenz, Univ. Hospital Leipzig (Germany); F. Bootz, Univ. of Bonn (Germany); J. Bocsi, A. Tárnok, Univ. Hospital Leipzig (Germany)
- 59 **Automated high-throughput micro-injection system for floating cells** [5699-09]
S. Sakai, S. Youoku, Y. Suto, M. Ando, A. Ito, Fujitsu Ltd. (Japan)

SESSION 3 TISSUES

- 67 **Multiphoton microscopy using intrinsic signals for pharmacological studies in unstained cardiac and vascular tissue (Invited Paper)** [5699-10]
E. Beaurepaire, T. Boulesteix, A.-M. Pena, CNRS-INSERM, École Polytechnique (France); N. Pagès, Univ. Louis Pasteur (France); K. Senni, G. Godeau, Univ. Paris V (France); M.-P. Sauviat, M.-C. Schanne-Klein, CNRS-INSERM, École Polytechnique (France)
- 75 **Multiphoton, confocal, and lifetime microscopy for molecular imaging in cartilage (Invited Paper)** [5699-11]
S. Wachsmann-Hogiu, Cedars-Sinai Medical Ctr. (USA); D. Krakow, Cedars-Sinai Medical Ctr. (USA) and David Geffen School of Medicine at UCLA (USA); V. T. Kirilova, Cedars-Sinai Medical Ctr. (USA); D. H. Cohn, C. Bertolotto, Cedars-Sinai Medical Ctr. (USA) and David Geffen School of Medicine at UCLA (USA); D. Acuna, Q. Fang, N. Krivorov, D. L. Farkas, Cedars-Sinai Medical Ctr. (USA)
- 82 **Surface-enhanced Raman spectroscopic detection of cancer biomarkers in intact cellular specimens** [5699-14]
D. O. Ansari, Georgia Institute of Technology (USA) and Emory Univ. (USA); D. A. Stuart, Northwestern Univ. (USA); S. Nie, Georgia Institute of Technology (USA) and Emory Univ. (USA)

SESSION 4 THREE-DIMENSIONAL AND SPECTRAL IMAGING

- 91 **Improved 3D cellular imaging by multispectral focus assessment** [5699-15]
T. Zhao, Cedars-Sinai Medical Ctr. (USA) and Carnegie Mellon Univ. (USA); Y. Xiong, A. P. Chung, Cedars-Sinai Medical Ctr. (USA); E. S. Wachman, ChromoDynamics, Inc. (USA); D. L. Farkas, Cedars-Sinai Medical Center (USA) and Carnegie Mellon Univ. (USA)
- 102 **Optical coherence tomography of cell dynamics in three-dimensional engineered tissues** [5699-16]
W. Tan, Univ. of Illinois at Urbana-Champaign (USA); T. A. Desai, Boston Univ. (USA); D. Leckband, S. A. Boppart, Univ. of Illinois at Urbana-Champaign (USA)
- 111 **Three-dimensional analysis tool for segmenting and measuring the structure of telomeres in mammalian nuclei** [5699-17]
B. J. Vermolen, I. T. Young, Delft Univ. of Technology (Netherlands); A. Chuang, L. Wark, T. Chuang, S. Mai, Univ. of Manitoba (Canada); Y. Garini, Delft Univ. of Technology (Netherlands)

- 121 **Multispectral imaging analysis: spectral deconvolution and applications in biology** [5699-19]
S. Leavesley, W. Ahmed, B. Bayraktar, B. Rajwa, J. Sturgis, J. P. Robinson, Purdue Univ. (USA)
- 129 **Novel multispectral imaging microscope with applications to biomedicine** [5699-20]
L. Zeng, Q. Wu, H. Ke, H. Zheng, Y. Hu, Y. Ding, Wuhan Univ. (China)

SESSION 5 FLUORESCENCE SPECTROSCOPY

- 141 **Counting single molecules in living cells at high resolution by spectrally resolved fluorescence lifetime imaging microscopy (SFLIM) and coincidence analysis** [5699-21]
T. Heinlein, P. Schlüter, D. P. Herten, Univ. Heidelberg (Germany); M. Sauer, Univ. Bielefeld (Germany); J. Wolfrum, Univ. Heidelberg (Germany)
- 149 **High-content data evaluation by means of confocal fluorescence spectroscopy** [5699-22]
L. Brand, A. Schroers, Evotec Technologies GmbH (Germany)
- 159 **Fluorescence correlation spectroscopy on dielectric surfaces in total internal reflection geometries** [5699-23]
T. Anhut, Fraunhofer-Institut für Biomedizinische Technik (Germany); K. Hassler, T. Lasser, École Polytechnique Fédérale de Lausanne (Switzerland); K. König, Fraunhofer-Institut für Biomedizinische Technik (Germany); R. Rigler, École Polytechnique Fédérale de Lausanne (Switzerland)
- 167 **Art and artifacts of fluorescence correlation spectroscopy** [5699-24]
J. Enderlein, I. Gregor, D. Patra, T. Dertinger, Forschungszentrum Jülich (Germany)

SESSION 6 MOLECULAR MOTORS

- 175 **Asymmetry of rotational catalysis of single membrane-bound F_0F_1 -ATP synthase (Invited Paper)** [5699-25]
N. Zarrabi, Univ. Stuttgart (Germany); B. Zimmermann, M. Diez, P. Gräber, Albert-Ludwigs- Univ. Freiburg (Germany); J. Wrachtrup, M. Börsch, Univ. Stuttgart (Germany)
- 189 **Selective staining of actin in live human dermal fibroblast cells using quantum dots** [5699-27]
U. S. Adurkar, A. Agrawal, S. Nie, Georgia Institute of Technology (USA)
- 196 **Electrophoretic control of actomyosin motility** [5699-28]
K. L. Hanson, G. Solana, D. V. Nicolau, Swinburne Univ. of Technology (Australia)
- 202 **High-throughput scanning with single-molecule sensitivity** [5699-29]
M. Sonnleitner, G. Freudenthaler, Upper Austrian Research GmbH (Austria); J. Hesse, G. J. Schütz, Univ. of Linz (Austria)

SESSION 7 SINGLE MOLECULE STUDIES

- 211 **Orientation of membrane probes in giant unilamellar vesicles** [5699-32]
J. N. Greeson, R. M. Raphael, Rice Univ. (USA)

- 219 **Advanced multifocus confocal laser scanning microscope for single molecule studies** [5699-68]

T. Dertinger, Forschungszentrum Jülich (Germany); F. Koberling, PicoQuant GmbH (Germany); A. Benda, J. Heyrovský Institute of Physical Chemistry (Czech Republic); R. Erdmann, PicoQuant GmbH (Germany); M. Hof, J. Heyrovský Institute of Physical Chemistry (Czech Republic); J. Enderlein, Forschungszentrum Jülich (Germany)

SESSION 8 ULTRASENSITIVE DETECTION

- 227 **Chemical and biological sensing through optical resonances in microcavities** [5699-35]
M. Tanyeri, M. Nichkova, B. D. Hammock, I. M. Kennedy, Univ. of California/Davis (USA)
- 237 **Ultrasensitive time-resolved nanoliter volume fluorometry based on UV LEDs and a channel photomultiplier tube** [5699-36]
D. Jin, R. Connally, J. Piper, Macquarie Univ. (Australia)
- 246 **Hyper-Rayleigh scattering as a method for probing collagen transformations in solutions** [5699-37]
V. I. Shcheslavskiy, G. I. Petrov, V. V. Yakovlev, Univ. of Wisconsin/Milwaukee (USA)
- 255 **Intrinsic fluorescence biomarkers in cells treated with chemopreventive drugs** [5699-38]
N. D. Kirkpatrick, W. R. Brands, C. Zou, M. A. Brewer, U. Utzinger, Univ. of Arizona (USA)
- 263 **System IRF impact on fluorescence lifetime fitting in turbid medium** [5699-39]
G. Ma, N. Mincu, F. Lesage, P. Gallant, L. McIntosh, Advanced Research Technologies, Inc. (Canada)

SESSION 9 OPTICAL MANIPULATION I

- 274 **Cell damage during femtosecond optical trapping** [5699-40]
K.-B. Im, S. Han, H. Park, D. Jin, S.-K. Kim, B.-M. Kim, Yonsei Univ. (South Korea)
- 281 **Investigating gradient sensing in cells through optical micromanipulation** [5699-42]
W. Losert, C. Poole, R. Skupsky, Univ. of Maryland/College Park (USA)
- 288 **Ultrasensitive force spectroscopy measurement of single particle light scattering by the use of optical tweezers** [5699-43]
A. Fontes, A. A. R. Neves, W. L. Moreira, A. A. de Thomaz, L. C. Barbosa, Univ. Estadual de Campinas (Brazil); A. M. de Paula, Univ. of Southampton (United Kingdom); C. L. Cesar, Univ. Estadual de Campinas (Brazil)

SESSION 10 OPTICAL MANIPULATION II

- 296 **The anti-Brownian electrophoretic trap (ABEL trap): fabrication and software (Invited Paper)** [5699-44]
A. E. Cohen, W. E. Moerner, Stanford Univ. (USA)

- 306 **Optical micromanipulation of mixed yeast cell populations for analyzing growth behavior** [5699-46]
J. Glückstad, P. J. Rodrigo, V. R. Daria, Risø National Lab. (Denmark); H. Siegumfeldt, P. Nissen, N. Arneborg, Royal Veterinary and Agricultural Univ. (Denmark)
- 313 **Laser nanosurgery and manipulation in living cells** [5699-47]
L. Sacconi, Univ. of Trento (Italy); I. M. Tolić-Nørrelykke, European Lab. for Non-linear Spectroscopy (Italy); R. Antolini, Univ. of Trento (Italy); F. S. Pavone, European Lab. for Non-linear Spectroscopy (Italy) and Univ. of Florence (Italy)

SESSION 11 **QUANTIFICATION AND CLASSIFICATION**

- 325 **CytometryML binary data standards** [5699-48]
R. C. Leif, MXL_Med, a Division of Newport Instruments (USA)
- 334 **Combining optical quadrature and differential interference contrast to facilitate embryonic cell counting with fluorescence imaging for confirmation** [5699-49]
W. C. Warger II, J. A. Newmark, C. Chang, D. H. Brooks, C. M. Warner, C. A. DiMarzio, Northeastern Univ. (USA)
- 342 **Feature extraction for cellular shape analysis in high-content screening (HCS) applications** [5699-50]
B. Bayraktar, B. Rajwa, J. P. Robinson, Purdue Univ. (USA)
- 354 **Subtractive clustering analysis: a novel data mining method for finding cell subpopulations** [5699-51]
J. N. Smith, L. Reece, P. Szaniszlo, Univ. of Texas Medical Branch/Galveston (USA); R. C. Leary, Cytomics Technologies, Inc. (USA); J. F. Leary, Univ. of Texas Medical Branch/Galveston (USA) and Cytomics Technologies, Inc. (USA)
- 362 **Genomic signal analysis of HIV variability** [5699-52]
P. D. Cristea, Univ. Politehnica Bucuresti (Romania); D. Otelea, M. Bals Institute of Infectious Diseases (Romania); R. A. Tuduce, Univ. Politehnica Bucuresti (Romania)
- 373 **Quantitative morphology of cytoskeletal organization: new classifier architectures and applications** [5699-53]
G. F. Crosta, C. Urani, L. Fumarola, R. V. Chieppa, Univ. degli Studi di Milano-Bicocca (Italy)
- 384 **Quantification of image quality after photobleaching and image compression** [5699-54]
T. Bernas, Univ. of Silesia (Poland) and Purdue Univ. (USA); B. Rajwa, J. P. Robinson, E. K. Asem, Purdue Univ. (USA)

SESSION 12 **ARRAYS AND BIOANALYTICS**

- 395 **Adaptation of nanoarrays for the study of α -synuclein aggregation: preliminary results** [5699-55]
H. R. C. Dietrich, R. L. van den Doel, Delft Univ. of Technology (Netherlands); W. Hoyer, Max-Planck Institute for Biophysical Chemistry (Germany); W. van Oel, G. Liqui Lung, Y. Garini, Delft Univ. of Technology (Netherlands); T. Jovin, Max-Planck Institute for Biophysical Chemistry (Germany); I. T. Young, Delft Univ. of Technology (Netherlands)

- 403 **Design requirements for integrated biosensor arrays** [5699-57]
A. Agah, A. Hassibi, J. D. Plummer, P. B. Griffin, Stanford Univ. (USA)
- 414 **Metal nanoparticles as passive and active tools for bioanalytics** [5699-58]
W. Fritzsche, A. Csaki, A. Steinbrück, Institute for Physical High Technology (Germany);
F. Garwe, K. König, JenLab GmbH (Germany); M. Raschke, Max-Born-Institute (Germany)

POSTER SESSION

- 419 **Determination of femto Newton forces and fluid viscosity using optical tweezers: application to *Leishmania amazonensis*** [5699-59]
A. Fontes, S. Giorgio, Univ. Estadual de Campinas (Brazil); A. B. de Castro, Jr., V. M. Neto, Univ. Federal do Rio de Janeiro (Brazil); L. d. Y. Pozzo, G. P. Marques, L. C. Barbosa, C. L. Cesar, Univ. Estadual de Campinas (Brazil)
- 426 **How accurately can a single molecule be localized in three dimensions using a fluorescence microscope?** [5699-60]
S. Ram, Univ. of Texas Southwestern Medical Ctr. (USA) and Univ. of Texas at Arlington (USA); E. S. Ward, Univ. of Texas Southwestern Medical Ctr. (USA); R. J. Ober, Univ. of Texas Southwestern Medical Ctr. (USA) and Univ. of Texas at Dallas (USA)
- 436 **A novel DNA restriction technology based on laser pulse energy conversion on sequence-specific bound metal nanoparticles** [5699-63]
A. Csaki, G. Maubach, Institute for Physical High Technology (Germany); F. Garwe, JenLab GmbH (Germany); A. Steinbrück, Institute for Physical High Technology (Germany); K. König, JenLab GmbH (Germany); W. Fritzsche, Institute for Physical High Technology (Germany)
- 442 **Ultrasensitive DNA detection on microarrays** [5699-64]
J. Jacak, J. Hesse, C. Hesch, Johannes Kepler Univ. Linz (Austria); M. Kasper, F. Aberger, A. Frischauf, Univ. of Salzburg (Austria); M. Sonnleitner, G. Freudenthaler, S. Howorka, Upper Austrian Research GmbH (Austria); G. J. Schütz, Johannes Kepler Univ. Linz (Austria)
- 450 **Single RNA kissing complexes studied by fluorescence resonance energy transfer** [5699-66]
P. B. Yim, X. Zhang, National Institute of Standards and Technology (USA); E. S. DeJong, Ctr. for Advanced Research in Biotechnology (USA); J. M. Carroll, National Institute of Standards and Technology (USA); J. P. Marino, Ctr. for Advanced Research in Biotechnology (USA); L. S. Goldner, National Institute of Standards and Technology (USA)
- 461 **Mitochondrial correlation as a biophotonic maker for detecting cancer in a single cell** [5699-69]
P. L. Gourley, J. K. Hendricks, A. E. McDonald, R. G. Copeland, K. E. Barrett, C. R. Gourley, Sandia National Labs. (USA); R. K. Naviaux, Univ. of California/San Diego (USA)

Part B Microarrays, Combinatorial Techniques, and High Throughput Screening

SESSION 1 NANOARRAYS AND NANODETECTION

- 473 **Application of fluorescent Eu:Gd₂O₃ nanoparticles to the visualization of protein micropatterns** [5699-84]
D. Dosev, M. Nichkova, M. Liu, B. Guo, G. Liu, Univ. of California/Davis (USA); Y. Xia, Univ. of Washington (USA); B. D. Hammock, I. M. Kennedy, Univ. of California/Davis (USA)
- 482 **New assay for multiple single molecule enzyme kinetics** [5699-70]
A. I. Lee, J. P. Brody, Univ. of California/Irvine (USA)

SESSION 2 MICROARRAYS AND LAB-ON-A-CHIP

- 491 **Identification of susceptibility genes and genetic modifiers of human diseases** [5699-72]
K. Abel, S. Kammerer, C. Hoyal, R. Reneland, G. Marnellos, M. R. Nelson, A. Braun, Sequenom, Inc. (USA)
- 503 **Label-free multi-analyte detection using a bioCD** [5699-74]
M. M. Varma, L. Peng, F. E. Regnier, D. D. Nolte, Purdue Univ. (USA)
- 511 **Integrated diffraction grating for lab-on-a-chip microspectrometers** [5699-76]
X. Chen, J. N. McMullin, C. J. Haugen, R. G. DeCorby, Univ. of Alberta (Canada) and TRILabs. (Canada)
- 517 **Biological laser printing as an alternative to traditional protein arrayers** [5699-78]
J. A. Barron, H. D. Young, B. R. Ringeisen, Naval Research Lab. (USA); D. D. Dlott, Univ. of Illinois at Urbana-Champaign (USA); D. B. Krizman, Expression Pathology, Inc. (USA)

POSTER SESSION

- 526 **High-throughput screening of metal chelating compounds** [5699-81]
E. M. Minogue, G. J. Havrilla, T. P. Taylor, A. K. Burrell, B. P. Warner, Los Alamos National Labs. (USA)
- 531 **Microfabricated substrates for spectroscopy and separation** [5699-83]
J. L. Sample, S. J. Papadakis, M. J. Fitch, J. A. Miragliotta, Johns Hopkins Univ. (USA)
- 540 *Author Index*
