

Contents

<i>Preface</i>	iii
<i>Contributors</i>	xi
<i>Introduction: New Challenges in Carbohydrate Research</i> Chi-Huey Wong	xv
1. Solid Phase Oligosaccharide Synthesis <i>Peter H. Seeberger</i>	1
2. Dehydrative Glycosylation with 1-Hydroxy Donors <i>David Gin</i>	33
3. Chemistry of Glycosyl Triflates: Synthesis of β -Mannopyranosides <i>David Crich</i>	53
4. C-Glycoside Synthesis: Recent Developments and Current Trends <i>Maarten H. D. Postema and Daniel Calimente</i>	77
5. D-Arabinofuranosides from Mycobacteria: Synthesis and Conformation <i>Todd L. Lowary</i>	133
6. Chemical Synthesis of Bioactive Steroidal Saponins <i>Biao Yu and Yongzheng Hui</i>	163
7. Recent Developments in Technology for Glycosylation with Sialic Acid <i>Randall L. Halcomb and Mark D. Chappell</i>	177
8. The Chemistry and Biology of Multivalent Saccharide Displays <i>David A. Mann and Laura L. Kiessling</i>	221
9. Designing Novel Multivalent Glycotools for Biochemical Investigations Related to Sialic Acid <i>René Roy</i>	277
10. Aminoglycoside Antibiotics: Structures and Mechanisms of Action <i>Jalal Haddad, Lakshmi P. Kotra, and Shahriar Mobashery</i>	307

11. Methodologies in Syntheses of Aminoglycoside Antibiotics <i>Jalal Haddad, Mei-Zheng Liu, and Shahriar Mobashery</i>	353
12. Synthesis of Glycosaminoglycans <i>Bryan K. S. Yeung, Pek Y. C. Chong, and Peter A. Petillo</i>	425
13. Pyranosyl Sugar Amino Acid Conjugates: Their Biological Origins, Synthetic Preparations, and Structural Characterization <i>Jacquelyn Gervay-Hague and Thomas M. Weathers, Jr.</i>	493
14. Glycosyltransferases in Oligosaccharide Synthesis <i>Xiangping Qian, Keiko Sujino, R. Murray Ratcliffe, and Monica M. Palcic</i>	535
15. Biotransformation of Polysaccharides <i>H. N. Cheng and Qu-Ming Gu</i>	567
16. From a Carbohydrate Sequence to Extensive Research Programs: The α -gal Epitope as a Case Study <i>Peter R. Andreana, Wei Zhang, and Peng George Wang</i>	581
17. Microbial Glycosyltransferases <i>Przemyslaw Kowal, Xi Chen, and Peng George Wang</i>	625
18. Metabolic Substrate Engineering as a Tool for Glycobiology <i>Scarlett Goon and Carolyn R. Bertozzi</i>	641
<i>Index</i>	675
