
Table of Contents

Chapter 1

Overview of Structural Genomics: Landscape, Premises, and Current Direction 1

Sung-Hou Kim, Dong Hae Shin, Weiru Wang, Paul D. Adams, and John-Marc Chandonia

Chapter 2

Purifying Protein for Structural Biology 19

Aled M. Edwards

Chapter 3

Protein Crystallization: Automation, Robotization, and Miniaturization 29

Naomi E. Chayen

Chapter 4

NMR Spectroscopy in Structural Genomics 49

Weontae Lee, Adelinda Yee, and Cheryl H. Arrowsmith

Chapter 5

High Throughput Protein Crystallography 61

Bernhard Rupp

Chapter 6

From Sequence to Function 105

Martin Norin

Chapter 7

Comparative Modeling and Structural Proteomics 109

Guoli Wang, J. Michael Sauder, and Roland L. Dunbrack, Jr.

Chapter 8

Ab initio Modeling 137

Jeffrey Skolnick, Yang Zhang, and Andrzej Kolinski

Chapter 9

Determining Function from Structure 163

Roman A. Laskowski

Chapter 10

Retrieval and Validation of Structural Information..... 185

Gerard J. Kleywegt and Henrik Hansson

Chapter 11

Problems in Computational Structural Genomics..... 223

Ruben Abagyan

Chapter 12

Applied Structural Genomics 251

Michael Sundstrom

Index.....269
