
CONTENTS OF VOLUME 1

Foreword · John F. Fulkerson	iii
Preface	v
Introduction	vii
Contributors to Volume 1	xxi
Contents of Other Volumes	xxiii

PART 1

MYCOLOGY OF MYCOTOXIC FUNGI

1.1	A Key to the Genera and Selected Species of Mycotoxin-Producing Fungi (E. E. Butler and E. V. Crisan)	1
1.1.1	Introduction	1
1.1.2	Key	3
1.2	The Genus <u>Aspergillus</u> (John Tuite)	21
1.2.1	Introduction	21
1.2.2	Key to Groups or Species of <u>Aspergillus</u> Incriminated in Mycotoxicoses	24
1.2.3	Description of Species	25
1.3	The Genus <u>Penicillium</u> (Philip B. Mislivec)	41
1.3.1	Introduction	41
1.3.2	Materials and Methods	43
1.3.3	Key to the Toxigenic Species Described	47
1.3.4	Description of Species	48
1.4	The Genus <u>Fusarium</u> (Abraham Z. Joffe)	59

1.4.1	Introduction	59
1.4.2	Materials and Methods	59
1.4.3	A Review of <u>Fusarium</u> Taxonomy as Related to Toxicogenic Species and Varieties	61
1.4.4	Brief Descriptions of the Sections that Comprise Toxicogenic Species of <u>Fusarium</u>	63
1.4.5	Key to Toxic Species of <u>Fusarium</u>	64
1.4.6	Detailed Description of Toxicogenic Species and Varieties of <u>Fusarium</u>	66
1.5	The Genus <u>Claviceps</u> (P. G. Mantle)	83
1.6	The Genus <u>Stachybotrys</u> (E.-L. Hintikka - née Korpinen)	91
1.6.1	<u>Stachybotrys alternans</u>	91
1.6.2	<u>Stachybotrys lobulata</u>	97
1.7	The Genus <u>Pithomyces</u> (M. E. di Menna, P. H. Mortimer, and E. P. White)	99
1.7.1	Introduction	99
1.7.2	Morphology and Distinguishing Characteristics	99
1.7.3	Techniques for Growing the Species and for Producing Mycotoxins - Analysis of Methods	99
1.7.4	Mycotoxins Known To Be Produced - Mycotoxicoses Caused	102
1.7.5	Animal Species Known or Suspected of Being Affected by the Specific Mycotoxin	102
1.8	The Genus <u>Phoma</u> (M. E. di Menna, P. H. Mortimer, and E. P. White)	105
1.8.1	Morphology and Distinguishing Characteristics	105
1.8.2	Techniques for Growing and Toxin Production - Analysis of Methods	105
1.8.3	Mycotoxins Known to be Produced - Mycotoxicoses Caused	106
1.8.4	Animal Species Known or Suspected of Being Affected by the Specific Mycotoxin	106
1.9	The Genus <u>Myrothecium</u> (M. E. di Menna, P. H. Mortimer, and E. P. White)	107
1.9.1	Morphology and Distinguishing Characteristics	107
1.9.2	Techniques for Growing and Toxin Production - Analysis of Methods	107
1.9.3	Mycotoxins Known to be Produced - Mycotoxicoses Caused	108
1.9.4	Animal Species Known or Suspected of Being Affected by the Specific Mycotoxin	109

1.10	The Genus <u>Phomopsis</u> (W. F. O. Marasas)	111
1.10.1	Introduction	111
1.10.2	Morphology and Distinguishing Characteristics	111
1.10.3	Techniques for Growing the Species and for Producing Mycotoxins	114
1.10.4	Mycotoxins Known to be Produced - Mycotoxicoses Caused	115
1.10.5	Animal Species Known To Be Affected by Lupinosis	115
1.11	The Genus <u>Diplodia</u> (W. F. O. Marasas)	119
1.11.1	Morphology and Distinguishing Characteristics	119
1.11.2	Techniques for Growing the Species and for Producing Mycotoxins	122
1.11.3	Mycotoxins Known To Be Produced - Mycotoxicoses Caused	122
1.11.4	Animal Species Known To Be Affected by Diplodiosis	125

PART 2

CHEMISTRY OF MYCOTOXINS

2.1	Aflatoxin and Related Compounds	131
2.1.1	Introduction (D. S. P. Patterson)	131
2.1.2	Chemistry (B. D. Jones)	136
2.1.3	Biosynthesis (D. S. P. Patterson)	144
2.1.4	Toxin-Producing Fungi and Susceptible Animal Species (D. S. P. Patterson)	156
2.1.5	Biochemistry and Physiology (D. S. P. Patterson)	159
2.1.6	Occurrence in Foods and Feeds (B. D. Jones)	190
2.1.7	Extraction and Analysis (B. D. Jones)	201
2.2	Chemistry of Coumarin and Related Compounds (Tsune Kosuge and D. Gilchrist)	239
2.2.1	Phototoxic Furanocoumarins: Xanthotoxin and 4,5',8-Trimethylpsoralen	239
2.2.2	Dicoumarol	252
2.3	<u>Penicillium</u> Mycotoxins (Peter M. Scott)	283

2.3.1	Ochratoxin A	283
2.3.2	Citrinin	291
2.3.3	Citreoviridin	296
2.3.4	Rubrattoxins A and B	299
2.3.5	Patulin	304
2.3.6	Penicillic Acid	311
2.3.7	<u>Penicillium Roqueforti</u> Toxins	316
2.3.8	Other <u>Penicillium</u> Mycotoxins	318
2.3.9	Recent Developments	324
2.4	Chemistry of the Tremorgenic Mycotoxins (S. J. Cyswski)	357
2.4.1	Introduction: Toxin-Producing Fungi	357
2.4.2	Physical and Chemical Properties	358
2.4.3	Isolation and Analysis	360
2.4.4	Biological Activity	362
2.4.5	Metabolism of the Toxins	362
2.4.6	Biosynthesis	363
2.4.7	Occurrence	363
2.5	Chemistry of <u>Fusarium</u> and <u>Stachybotrys</u> Mycotoxins (Chester J. Mirocha, Sadanand V. Pathre, and Clyde M. Christensen)	365
2.5.1	<u>Fusarium</u> Toxins	365
2.5.2	<u>Stachybotrys</u> Toxins	409
2.6	Chemistry of <u>Claviceps</u> Mycotoxins (P. G. Mantle)	421
2.6.1	Introduction	421
2.6.2	Alkaloid Components of Ergot	421
2.6.3	Biosynthesis	421
2.6.4	Biological Activity and Toxicity	424
2.6.5	Methods of Extraction and Analysis	425
2.7	Chemistry of the Sporidesmins (E. P. White, P. H. Mortimer, and M. E. di Menna)	427
2.7.1	Introduction	427
2.7.2	Structure and Derivatives: Physical and Chemical Properties	428
2.7.3	Toxicity of the Sporidesmins	432
2.7.4	Methods of Extraction, Isolation, Analysis, and Identification of Sporidesmins	435
2.7.5	Biosynthesis	440
2.7.6	Physiology and Metabolism Studies	440
2.7.7	Occurrence	442
2.7.8	Toxin-Producing Fungus and Animal Species Affected	443

2.8	Chemistry and Physiology of Slaframine (E. B. Smalley)	449
2.8.1	Introduction	449
2.8.2	Chemistry	449
2.8.3	Methods of Production, Extraction, Isolation, Analysis, and Identification	450
2.8.4	Biosynthesis and Synthesis	452
2.8.5	Physiology and Metabolism	452
2.8.6	Natural Occurrence	455
2.9	Toxins of <u>Phoma herbarum</u> var. <u>medicaginis</u> (E. P. White, P. H. Mortimer, and M. E. di Menna)	459
2.9.1	Introduction	459
2.9.2	Chemistry: Structure and Derivatives, Physical and Chemical Properties, Toxicity	459
2.9.3	Methods of Extraction, Isolation, Analysis, and Identification of <u>Phoma</u> Toxins	460
2.9.4	Biosynthesis	461
2.9.5	Physiology and Metabolism Studies	461
2.9.6	Occurrence: Toxin-Producing Fungi	461
2.9.7	Animal Species Affected	462
2.10	Chemistry of the <u>Myrothecium</u> Toxins (E. P. White, P. H. Mortimer, and M. E. di Menna)	465
2.10.1	Introduction	465
2.10.2	Chemistry: Structure and Derivatives, Physical and Chemical Properties, Toxicity	465
2.10.3	Methods of Extraction, Isolation, Analysis, and Identification of <u>Myrothecium</u> Toxins	467
2.10.4	Biosynthesis of Trichothecenes	468
2.10.5	Physiology and Metabolism Studies	468
2.10.6	Occurrence: Toxin-Producing Fungi	468
2.10.7	Animal Species Affected	468
	Glossary	471
	Author Index	481
	Subject Index	523
