Preface xiii

Introduction xvii

Philip H. Abelson

Biotechnology

1. *What Is Biotechnology?* 3
Jacqueline K. Barton
About the Science of Biotechnology 3
About This Book 4
2. *Biotechnology: A New Marriage of Chemistry and Biology* 7
Howard E. Simmons
How Biotechnology Is Improving Our Lives 7
Chemistry Underlies Modern Biology 9
Basis of Biotechnology 12
Significance of Biotechnology for Industry 13
Designing Agrochemicals 14
Applications in the Health Sciences 18
Summary 19
3. *Synthetic Tools for Molecular Biology* 21
Peter B. Dervan
Sequencing the Human Genome 22
Improving Restriction Endonucleases 24
Molecular Engineering 26
Catalytic Antibodies 28
The Future 29
4. *Molecular Basis of Drug Design* 31
Stephen J. Lippard
Specificity: Key to Drug Development 31
Biotechnology and AIDS 37

5.	<i>Taming the Chemistry of Proteins</i>	43
	Emil Thomas Kaiser	
	The Structural Chemistry of Proteins	43
	Sequencing DNA and Proteins	46
	Synthesizing Proteins and DNA	48
	Relationship Between Structure and Function	49
	Fewer Limits, Dreams Realized	51
6.	<i>Protein Engineering</i>	53
	Gregory A. Petsko	
	The Second Chemical Revolution	53
	Designing Protein Properties	55
	The Threshold of the Revolution	60
 Materials Science		
7.	<i>Chemical Research in Materials Science</i>	63
	William P. Slichter	
	Chemistry and Materials	64
	Synthesis	64
	Chemical Kinetics	66
	Chemical Theory	67
	Purity	68
	Instrumentation	68
	Perspectives	69
8.	<i>Simulation of Atoms and Molecules</i>	71
	William A. Goddard, III	
	Computers in Materials Design	71
	Designer Molecules	73
	Fine-Tuning Catalysts	75
	Inside Superconductors	78
	Mixing and Matching	80
	Polymer Folding	82
	Computer-Aided Design	83
9.	<i>Materials for Advanced Electronic Devices</i>	85
	George M. Whitesides	
	The Structure of an Integrated-Circuit Chip	85
	Competitive Choices	87
	Packaging Semiconductors	88
	Atomic Views	89
	Speed and Gallium Arsenide	90
	A Match for Silicon	92

	Layers upon Layers	94
	Warmer Superconductors	96
	Diamond's Sparkling Potential	97
	Looking Ahead	99
10.	<i>Chemistry of Materials for Energy Production, Conversion, and Storage</i>	101
	Mark S. Wrighton	
	Material Boundaries	103
	Chemical Electricity	106
	Improving Fuel Cells	108
	Light Energy	109
	Imitating Nature	112
	Exploiting Superconductors	113
	Putting the Squeeze on Oil	114
	Chemistry for Energy	115
11.	<i>High-Strength Composites</i>	117
	James Economy	
	Composite Materials	117
	Ceramic Composites	122
	Ordered Polymers	125
	Composites for the Future	128
	<i>Index</i>	131
