

Contents

List of Contributors	vi
Introduction	
Chapter 1	1
Metabolic Engineering, What It Was and What It Is <i>Hans V. Westerhoff and Boris N. Kholodenko</i>	
Analytic Tools	
Chapter 2	37
Proteomics In Metabolic Engineering <i>Anders Blomberg</i>	
Chapter 3	69
Magnetic Resonance Spectroscopy and Imaging - Powerful Tools for Functional Genomics <i>Kevin M. Brindle</i>	
Chapter 4	89
Metabolic Flux Analysis in the Post Genomic Era <i>Margarida Moreira dos Santos, Mats Åkesson and Jens Nielsen</i>	
Chapter 5	107
Regulatory Strength Analysis for Inferring Gene Networks <i>Alberto de la Fuente, Paul Brazhnik and Pedro Mendes</i>	
Engineering Tools	
Chapter 6	139
The MetaCyc Metabolic Pathway Database <i>Peter D. Karp</i>	
Chapter 7	155
Experimental Modulation of Gene Expression <i>Brian J. Koebmann, Jens Tornøe, Björn Johansson and Peter R. Jensen</i>	
Modeling Methodology	
Chapter 8	181
Metabolic Pathway Analysis in Biotechnology <i>Stefan Schuster</i>	

Chapter 9	209
<i>In silico</i> Cells: Studying Genotype-Phenotype Relationships Using Constraint-Based Models	
<i>Jason A. Papin, Nathan D. Price and Bernhard Ø. Palsson</i>	

Chapter 10	237
A Multi-scale Approach for the Predictive Modeling of Metabolic Regulation	
<i>Sören Petersen, Eric von Lieres, Albert A. de Graaf, Hermann Sahm and Wolfgang Wiechert</i>	

Chapter 11	277
Validation of Metabolic Models: Concepts, Tools, and Problems	
<i>Wolfgang Wiechert</i>	

Examples of Applications

Chapter 12	321
Applications of Whole Cell and Large Pathway Mathematical Models in the Pharmaceutical Industry	
<i>Igor Goryanin, Oleg Demin and Frank Tobin</i>	

Chapter 13	357
Metabolic Engineering of Branched Systems: Redirecting the Main Pathway Flux	
<i>Jacky L. Snoep, Marcel H. N. Hoefnagel and Hans V. Westerhoff</i>	

Chapter 14	377
Redirecting Metabolism by Co-ordinate Manipulation of Multiple Genes	
<i>Claire Halpin and Martin Ryan</i>	

Chapter 15	409
Metabolic Engineering and Flux Analysis of Glycine Betaine Synthesis in Plants: Progress and Prospects	
<i>David Rhodes, Scott D. McNeil, Michael L. Nuccio and Andrew D. Hanson</i>	

Perspectives

Chapter 16	435
Metabolic Engineering in the Post Genomic Era: What it Should Become	
<i>Hans V. Westerhoff and Boris N. Kholodenko</i>	

Index	443
