

CONTENTS

Preface xiii

1 PREVIEW AND REVIEW 1

1.1 Preliminaries 2

- 1.1.1 The Real Numbers 2
- 1.1.2 Lines in the Plane 5
- 1.1.3 Equation of the Circle 7
- 1.1.4 Trigonometry 7
- 1.1.5 Exponentials and Logarithms 9
- 1.1.6 Complex Numbers and Quadratic Equations 12
- 1.1.7 *Problems* 14

1.2 Elementary Functions 17

- 1.2.1 What Is a Function? 17
- 1.2.2 Polynomial Functions 21
- 1.2.3 Rational Functions 24
- 1.2.4 Power Functions 25
- 1.2.5 Exponential Functions 28
- 1.2.6 Inverse Functions 32
- 1.2.7 Logarithmic Functions 35
- 1.2.8 Trigonometric Functions 39
- 1.2.9 *Problems* 43

1.3 Graphing 48

- 1.3.1 Graphing and Basic Transformations of Functions 48
- 1.3.2 The Logarithmic Scale 51
- 1.3.3 Transformations into Linear Functions 54
- 1.3.4 From a Verbal Description to a Graph (Optional) 64
- 1.3.5 *Problems* 69

1.4 Key Terms 77

1.5 Review Problems 77

2 DISCRETE TIME MODELS, SEQUENCES, AND DIFFERENCE EQUATIONS 81

2.1 Exponential Growth and Decay 81

2.1.1 Modeling Population Growth in Discrete Time 81

2.1.2 Recursions 85

2.1.3 Problems 87

2.2 Sequences 89

2.2.1 What Are Sequences? 89

2.2.2 Limits 91

2.2.3 Recursions 96

2.2.4 Problems 99

2.3 More Population Models 102

2.3.1 Restricted Population Growth: The Beverton-Holt Recruitment Curve 102

2.3.2 The Discrete Logistic Equation 104

2.3.3 Ricker's Curve 109

2.3.4 Fibonacci Sequences 110

2.3.5 Problems 112

2.4 Key Terms 113

2.5 Review Problems 114

3 LIMITS AND CONTINUITY 116

3.1 Limits 116

3.1.1 An Informal Discussion of Limits 117

3.1.2 Limit Laws 124

3.1.3 Problems 127

3.2 Continuity 128

3.2.1 What is Continuity? 128

3.2.2 Combinations of Continuous Functions 133

3.2.3 Problems 137

3.3 Limits at Infinity 138

3.3.1 Problems 142

3.4 The Sandwich Theorem and Some Trigonometric Limits 143

3.4.1 Problems 148

3.5 Properties of Continuous Functions 149

3.5.1 The Intermediate Value Theorem 149

3.5.2 A Final Remark on Continuous Functions 152

3.5.3 Problems 152

3.6 A Formal Definition of Limits (Optional) 153

3.6.1 Problems 159

3.7 Key Terms 160

3.8 Review Problems 160

4 DIFFERENTIATION 163

- 4.1 Formal Definition of the Derivative 165**
 - 4.1.1 Geometric Interpretation and Using the Definition 166
 - 4.1.2 The Derivative as an Instantaneous Rate of Change: A First Look at Differential Equations 171
 - 4.1.3 Differentiability and Continuity 174
 - 4.1.4 *Problems* 177
- 4.2 The Power Rule, the Basic Rules of Differentiation, and the Derivatives of Polynomials 179**
 - 4.2.1 *Problems* 183
- 4.3 The Product and Quotient Rules, and the Derivatives of Rational and Power Functions 186**
 - 4.3.1 The Product Rule 186
 - 4.3.2 The Quotient Rule 188
 - 4.3.3 *Problems* 192
- 4.4 The Chain Rule and Higher Derivatives 195**
 - 4.4.1 The Chain Rule 195
 - 4.4.2 Implicit Functions and Implicit Differentiation 200
 - 4.4.3 Related Rates 203
 - 4.4.4 Higher Derivatives 206
 - 4.4.5 *Problems* 208
- 4.5 Derivatives of Trigonometric Functions 211**
 - 4.5.1 *Problems* 215
- 4.6 Derivatives of Exponential Functions 216**
 - 4.6.1 *Problems* 221
- 4.7 Derivatives of Inverse and Logarithmic Functions 223**
 - 4.7.1 Derivatives of Inverse Functions 223
 - 4.7.2 The Derivative of the Logarithmic Function 229
 - 4.7.3 Logarithmic Differentiation 231
 - 4.7.4 *Problems* 233
- 4.8 Approximation and Local Linearity 235**
 - 4.8.1 *Problems* 241
- 4.9 Key Terms 243**
- 4.10 Review Problems 243**

5 APPLICATIONS OF DIFFERENTIATION 245

- 5.1 Extrema and the Mean Value Theorem 245**
 - 5.1.1 The Extreme Value Theorem 245
 - 5.1.2 Local Extrema 247

4 DIFFERENTIATION 163

- 4.1 Formal Definition of the Derivative 165**
 - 4.1.1 Geometric Interpretation and Using the Definition 166
 - 4.1.2 The Derivative as an Instantaneous Rate of Change: A First Look at Differential Equations 171
 - 4.1.3 Differentiability and Continuity 174
 - 4.1.4 *Problems* 177
- 4.2 The Power Rule, the Basic Rules of Differentiation, and the Derivatives of Polynomials 179**
 - 4.2.1 *Problems* 183
- 4.3 The Product and Quotient Rules, and the Derivatives of Rational and Power Functions 186**
 - 4.3.1 The Product Rule 186
 - 4.3.2 The Quotient Rule 188
 - 4.3.3 *Problems* 192
- 4.4 The Chain Rule and Higher Derivatives 195**
 - 4.4.1 The Chain Rule 195
 - 4.4.2 Implicit Functions and Implicit Differentiation 200
 - 4.4.3 Related Rates 203
 - 4.4.4 Higher Derivatives 206
 - 4.4.5 *Problems* 208
- 4.5 Derivatives of Trigonometric Functions 211**
 - 4.5.1 *Problems* 215
- 4.6 Derivatives of Exponential Functions 216**
 - 4.6.1 *Problems* 221
- 4.7 Derivatives of Inverse and Logarithmic Functions 223**
 - 4.7.1 Derivatives of Inverse Functions 223
 - 4.7.2 The Derivative of the Logarithmic Function 229
 - 4.7.3 Logarithmic Differentiation 231
 - 4.7.4 *Problems* 233
- 4.8 Approximation and Local Linearity 235**
 - 4.8.1 *Problems* 241
- 4.9 Key Terms 243**
- 4.10 Review Problems 243**

5 APPLICATIONS OF DIFFERENTIATION 245

- 5.1 Extrema and the Mean Value Theorem 245**
 - 5.1.1 The Extreme Value Theorem 245
 - 5.1.2 Local Extrema 247

5.1.3	The Mean Value Theorem	254
5.1.4	Problems	259
5.2	Monotonicity and Concavity	261
5.2.1	Monotonicity	263
5.2.2	Concavity	265
5.2.3	Problems	270
5.3	Extrema, Inflection Points, and Graphing	273
5.3.1	Extrema	273
5.3.2	Inflection Points	280
5.3.3	Graphing and Asymptotes	282
5.3.4	Problems	287
5.4	Optimization	289
5.4.1	Problems	296
5.5	L'Hospital's Rule	298
5.5.1	Problems	307
5.6	Difference Equations: Stability (Optional)	308
5.6.1	Exponential Growth	308
5.6.2	Stability: General Case	310
5.6.3	Examples	315
5.6.4	Problems	317
5.7	Numerical Methods: The Newton-Raphson Method (Optional)	318
5.7.1	Problems	324
5.8	Antiderivatives	325
5.8.1	Problems	330
5.9	Key Terms	332
5.10	Review Problems	332

6 INTEGRATION 335

6.1	The Definite Integral	335
6.1.1	The Area Problem	336
6.1.2	Riemann Integrals	341
6.1.3	Properties of the Riemann Integral	349
6.1.4	Problems	355
6.2	The Fundamental Theorem of Calculus	358
6.2.1	The Fundamental Theorem of Calculus (Part I)	359
6.2.2	Antiderivatives and Indefinite Integrals	364
6.2.3	The Fundamental Theorem of Calculus (Part II)	367
6.2.4	Problems	371

6.3 Applications of Integration	374
6.3.1 Areas	374
6.3.2 Cumulative Change	380
6.3.3 Average Values	382
6.3.4 The Volume of a Solid (Optional)	385
6.3.5 Rectification of Curves (Optional)	389
6.3.6 Problems	392
6.4 Key Terms	394
6.5 Review Problems	395

7 INTEGRATION TECHNIQUES AND COMPUTATIONAL METHODS 397

7.1 The Substitution Rule	397
7.1.1 Indefinite Integrals	397
7.1.2 Definite Integrals	401
7.1.3 Problems	406
7.2 Integration by Parts	408
7.2.1 Problems	414
7.3 Practicing Integration and Partial Fractions	415
7.3.1 Practicing Integration	415
7.3.2 Rational Functions and Partial Fractions	418
7.3.3 Problems	424
7.4 Improper Integrals	425
7.4.1 Type 1: Unbounded Intervals	425
7.4.2 Type 2: Unbounded Integrand	434
7.4.3 A Comparison Result for Improper Integrals	440
7.4.4 Problems	442
7.5 Numerical Integration	444
7.5.1 The Midpoint Rule	445
7.5.2 The Trapezoidal Rule	449
7.5.3 Problems	451
7.6 Tables of Integrals	452
7.6.1 Problems	457
7.7 The Taylor Approximation	457
7.7.1 Taylor Polynomials	458
7.7.2 The Taylor Polynomial about $x = a$	464
7.7.3 How Accurate Is the Approximation? (Optional)	465
7.7.4 Problems	469
7.8 Key Terms	470
7.9 Review Problems	470

8 DIFFERENTIAL EQUATIONS 473

8.1 Solving Differential Equations 474

- 8.1.1 Pure Time Differential Equations 475
- 8.1.2 Autonomous Differential Equations 476
- 8.1.3 Allometric Growth 488
- 8.1.4 *Problems* 491

8.2 Equilibria and Their Stability 493

- 8.2.1 A First Look at Stability 494
- 8.2.2 Single Compartment or Pool 501
- 8.2.3 The Levins Model 503
- 8.2.4 The Allee Effect 506
- 8.2.5 *Problems* 507

8.3 Systems of Autonomous Equations (Optional) 510

- 8.3.1 A Simple Epidemic Model 510
- 8.3.2 A Compartment Model 513
- 8.3.3 A Hierarchical Competition Model 516
- 8.3.4 *Problems* 518

8.4 Key Terms 519

8.5 Review Problems 519

9 LINEAR ALGEBRA AND ANALYTIC GEOMETRY 523

9.1 Linear Systems 523

- 9.1.1 Graphical Solution 523
- 9.1.2 Solving Systems of Linear Equations 529
- 9.1.3 *Problems* 536

9.2 Matrices 537

- 9.2.1 Basic Matrix Operations 537
- 9.2.2 Matrix Multiplication 539
- 9.2.3 Inverse Matrices 544
- 9.2.4 Computing Inverse Matrices (Optional) 550
- 9.2.5 An Application: The Leslie Matrix 554
- 9.2.6 *Problems* 560

9.3 Linear Maps, Eigenvectors, and Eigenvalues 563

- 9.3.1 Graphical Representation 564
- 9.3.2 Eigenvalues and Eigenvectors 569
- 9.3.3 Iterated Maps (Needed for Section 10.7) 578
- 9.3.4 *Problems* 584

9.4 Analytic Geometry 587

9.4.1 Points and Vectors in Higher Dimensions 587

9.4.2 The Dot Product 592

9.4.3 Parametric Equations of Lines 597

9.4.4 Problems 599

9.5 Key Terms 601**9.6 Review Problems 601**

10 MULTIVARIABLE CALCULUS 603**10.1 Functions of Two or More Independent Variables 604**

10.1.1 Problems 614

10.2 Limits and Continuity 616

10.2.1 Informal Definition of Limits 616

10.2.2 Formal Definition of Limits (Optional) 619

10.2.3 Continuity 621

10.2.4 Problems 622

10.3 Partial Derivatives 623

10.3.1 Functions of Two Variables 623

10.3.2 Functions of More Than Two Variables 628

10.3.3 Higher-Order Partial Derivatives 629

10.3.4 Problems 631

10.4 Tangent Planes, Differentiability, and Linearization 632

10.4.1 Functions of Two Variables 632

10.4.2 Vector-Valued Functions 639

10.4.3 Problems 642

10.5 More about Derivatives (Optional) 643

10.5.1 The Chain Rule for Functions of Two Variables 643

10.5.2 Implicit Differentiation 645

10.5.3 Directional Derivatives and Gradient Vectors 647

10.5.4 Problems 653

10.6 Applications (Optional) 654

10.6.1 Maxima and Minima 654

10.6.2 Extrema with Constraints 669

10.6.3 Diffusion 679

10.6.4 Problems 683

10.7 Systems of Difference Equations (Optional) 686

10.7.1 A Biological Example 686

10.7.2 Equilibria and Stability in Systems of Linear Difference Equations 689

- 10.7.3 Equilibria and Stability of Nonlinear Systems of Difference Equations 691
- 10.7.4 Problems 697
- 10.8 Key Terms 700**
- 10.9 Review Problems 700**

11 SYSTEMS OF DIFFERENTIAL EQUATIONS 702

- 11.1 Linear Systems: Theory 703**
 - 11.1.1 The Direction Field 704
 - 11.1.2 Solving Linear Systems 706
 - 11.1.3 Equilibria and Stability 715
 - 11.1.4 Problems 725
- 11.2 Linear Systems: Applications 731**
 - 11.2.1 Compartment Models 731
 - 11.2.2 The Harmonic Oscillator (Optional) 736
 - 11.2.3 Problems 738
- 11.3 Nonlinear Autonomous Systems: Theory 739**
 - 11.3.1 Analytical Approach 740
 - 11.3.2 Graphical Approach for 2×2 Systems 748
 - 11.3.3 Problems 751
- 11.4 Nonlinear Systems: Applications 752**
 - 11.4.1 The Lotka-Volterra Model of Interspecific Competition 752
 - 11.4.2 A Predator-Prey Model 760
 - 11.4.3 The Community Matrix 763
 - 11.4.4 A Mathematical Model for Neuron Activity 767
 - 11.4.5 A Mathematical Model for Enzymatic Reactions 771
 - 11.4.6 Problems 777
- 11.5 Key Terms 782**
- 11.6 Review Problems 783**

12 PROBABILITY AND STATISTICS 785

- 12.1 Counting 785**
 - 12.1.1 The Multiplication Principle 785
 - 12.1.2 Permutations 787
 - 12.1.3 Combinations 789
 - 12.1.4 Combining the Counting Principles 790
 - 12.1.5 Problems 793

12.2 What Is Probability? 794

- 12.2.1 Basic Definitions 794
- 12.2.2 Equally Likely Outcomes 799
- 12.2.3 *Problems* 805

12.3 Conditional Probability and Independence 806

- 12.3.1 Conditional Probability 807
- 12.3.2 The Law of Total Probability 808
- 12.3.3 Independence 810
- 12.3.4 The Bayes Formula 813
- 12.3.5 *Problems* 817

12.4 Discrete Random Variables and Discrete Distributions 818

- 12.4.1 Discrete Distributions 819
- 12.4.2 Mean and Variance 822
- 12.4.3 The Binomial Distribution 832
- 12.4.4 The Multinomial Distribution 836
- 12.4.5 Geometric Distribution 837
- 12.4.6 The Poisson Distribution 842
- 12.4.7 *Problems* 848

12.5 Continuous Distributions 853

- 12.5.1 Density Functions 853
- 12.5.2 The Normal Distribution 862
- 12.5.3 The Uniform Distribution 872
- 12.5.4 The Exponential Distribution 875
- 12.5.5 *Problems* 884

12.6 Limit Theorems 887

- 12.6.1 The Law of Large Numbers 887
- 12.6.2 The Central Limit Theorem 891
- 12.6.3 *Problems* 896

12.7 Statistical Tools 898

- 12.7.1 Collecting and Describing Data 898
- 12.7.2 Estimating Means and Proportions 901
- 12.7.3 Linear Regression 908
- 12.7.4 *Problems* 914

12.8 Key Terms 916**12.9 Review Problems 916**

Appendix A 918

Appendix B 919
