

Contents

Preface iii

Contributors ix

I. Immunoglobulins and Other Recognition Molecules

1. Immunoglobulin Structure and Function 3
Ronald Nezlin
2. Human Immunoglobulin Allotypes and Mendelian Polymorphisms of the Human Immunoglobulin Genes 47
Rune E. Grubb
3. Immunoglobulin Idiotypes and Anti-Idiotypes 69
Yasmin Thanavala and Michael William Pride
4. Monoclonal Antibodies 93
Ailsa M. Campbell
5. Phylogeny of Immunoglobulins 111
Michele K. Anderson, Jonathan P. Rast, and Gary W. Litman
6. The T-Cell Receptors 129
Marie-Paule Lefranc
7. Peptide Interactions with Major Histocompatibility Complex Class II Molecules 159
Luciano Adorini and Sylvie Trembleau
8. Immunoglobulins as Enzymes 181
Martin Friede and Francis Schuber
9. Recombinant Antibodies 201
Andreas Plückthun
10. Fc Receptors 237
Wolf H. Fridman

11. Lectins 259
Miercio E. A. Pereira

II. Antigens and Haptens

12. The Recognition of Proteins and Peptides by Antibodies 277
Marc H. V. van Regenmortel
13. Immune Recognition of Proteins and Peptides by T Cells 301
J. R. L. Pink and G. Süß
14. Immunochemistry of Polysaccharide and Blood Group Antigens 319
Roger K. Cunningham
15. Immunochemistry of Nucleic Acids 337
B. David Stollar
16. Immunochemistry of Pharmacological Substances 357
Anne Morel-Montero and Michel Delaage
17. Tumor-Associated Antigens 373
Kate R. Diakun
18. Immunochemistry of Bacterial Antigens 393
Peter Owen and Mary Meehan
19. Immunochemistry of Viral Antigens 455
James A. Wiley, Pascale M. Richalet-Sécorde!, and Marc H. V. van Regenmortel
20. Immunochemistry of Parasite Antigens 475
Ross L. Coppel, Kathleen M. Davern, and Malcolm J. McConville
21. Immunochemistry of Vaccines 533
Michael J. Francis
22. Immunochemistry of Allergens 551
Brian A. Baldo

IIIA. Antigen–Antibody Interactions (Fundamentals)

23. Nature of Specific Ligand–Receptor Bonds, in Particular the Antigen–Antibody Bond 581
Carel J. van Oss
24. Antibody Structure from X-Ray Crystallography and Molecular Modeling 615
Anthony R. Rees, Jan T. Pedersen, Stephen M. J. Searle, Andrew H. Henry, and David Michael Webster

IIIB. Antigen–Antibody Interactions (In Vivo)

25. Circulating Immune Complexes 653
Lee A. Hebert, Daniel J. Birmingham, Fernando G. Cosio, and Daniel D. Sedmak
26. Autoantigens 681
Jean-Paul Viard and Jean-François Bach

27. Immunotargeting: The Selective Elimination of Specific Cell Populations with Immunoconjugates 699
George L. Mayers

IIIC. Antigen–Antibody Interactions (In Vitro)

28. Precipitation and Agglutination 737
Carel J. van Oss
29. Enzyme-Linked Immunosorbent Assay 759
John E. Butler
30. Determination of Antibody Affinity 805
Marc H. V. van Regenmortel and Agnès Azimzadeh
31. Immunofluorescence and Enzyme Immunomicroscopy Methods 829
Vijay Kumar
32. Multiparameter Flow Cytometry 849
Carleton C. Stewart
33. Immunoelectron Microscopy 867
Matthew A. Gonda
34. Complement 903
B. Paul Morgan
35. Immunoblotting, Dot-Blotting, and ELISPOT Assays: Methods and Applications 925
David I. Stott
36. Biosensor Techniques 949
Lars G. Fågerstam and Robert Karlsson

IV. Regulation of the Immune Response

37. T-Cell-Mediated Lymphokines 973
Paul L. Fidel, Jr.
38. Macrophage-Derived Cytokines 995
Daniel G. Remick
39. Immunosuppressants 1017
Valerie F. J. Quesniaux and Goetz Baumann
40. Maturation of the Immune Response 1039
James D. Marks
