

TO THE INSTRUCTOR xiii
TO THE STUDENT xvii

HISTORY OF PHYSIOLOGICAL PSYCHOLOGY 1

- Introduction 2
- Physiological Psychology Defined 3
- Looking Back: How Physiological Psychology Evolved 4
- Behavior and Experimentation 8
- Physiological Psychology: Its Biological Roots 10
- Making the Brain-Behavior Connection 13
- Looking Ahead: The New Directions 21

CHAPTER 1

THE NEURON 26

- Introduction 27
- The Neuron 28
- Development of the Nervous System 36
- How Neurons Die 40
- Parkinson's Disease and Alzheimer's Disease 45
- Reversing Neural Damage: The Transplant Approach 49

CHAPTER 2

THE NERVOUS SYSTEM 57

- Introduction 58
- The Nervous System Defined 58
- The Peripheral Nervous System 59
- The Skeletal Nervous System 62
- The Autonomic Nervous System 64
- The Central Nervous System 70
- The Brain 78
- Integrating the Peripheral and Central Nervous Systems 88

CHAPTER 3

CHAPTER 4

THE ELECTROCHEMICAL BASIS OF BEHAVIOR 105

- Introduction 106
- Tracking the Neural Impulse: The Early Discoveries 106
- The Electrochemical Signal: An Overview 108
- How the Neuron Produces the Impulse 110
- Firing: Initiating the Electrochemical Signal 114
- Neural Transmission and Behavior 123
- The Synapse and Behavior 124
- Synaptic Modulation and Behavioral Flexibility 131
- Preserving Normal Synaptic Activity: The Defense Mechanisms 136

CHAPTER 5

THE NEUROCHEMICAL BASIS OF BEHAVIOR 143

- Introduction 144
- Neurotransmitters: An Overview 144
- Acetylcholine 145
- Monoamines 149
- Other Neurotransmitter Substances 155
- Neurotransmitters and Behavior: In Retrospect 158
- Neurotransmitters and Psychoactive Drugs 159
- The Five Groups of Psychoactive Drugs 159
- Drugs at Work 169
- The Tolerance Factor 171
- Addiction 174
- Treating the Addict 177
- Dietary Control: An Alternative to Drug Therapy 178
- Looking Ahead 179

CHAPTER 6

SENSORY PROCESSING 186

- Introduction 187
- Transduction and Receptors: An Overview 187
- Sensory Coding: An Overview 191
- Sensory Processing: The Psychological Impact 197
- Looking Ahead: Common Mechanisms and Sensory Processing 201

CHAPTER 7

THE VISUAL SYSTEM 207

- Introduction 208
- How Humans See 209
- The Visual Nervous System: Anatomy 211
- The Visual Nervous System: Function 215
- Neural Coding 220
- Coding in the Mammalian Visual System 226

The Work of Hubel and Wiesel	229
New Directions in Coding Research	234
Neural Coding: Inherent or Acquired?	238
Color Vision	239
Tracking the Color Code	241
Color Blindness	248

AUDITION, TASTE, AND SMELL 256

Introduction	257
Audition: An Overview	257
The Anatomy of the Auditory System	261
The Auditory Nervous System	265
Coding Auditory Information	267
Coding for Sound Localization	273
Taste and Smell	275
The Anatomy of Taste	276
Coding for Taste	279
Smell	281
Coding for Smell	284

CUTANEOUS SENSES INCLUDING PAIN AND PROPRIOCEPTION 292

Introduction	293
Cutaneous Senses	293
The Physiological Basis of Pain	302
Chronic Pain	307
The Pain-Suppression Circuit	310
Neural Coding for Temperature	316
Proprioception	317
Kinesthetics: A Sense of Movement	318
Labyrinthine Sense	320

MUSCLES AND GLANDS 330

Introduction	331
The Mechanics of Movement	331
The Neural Aspects of Muscle Movement	333
The Form of Movement	336
The Brain and Movement	339
Control of Internal Behavior	354

EATING AND DRINKING 362

Introduction	363
Biological Basis of Hunger	364
The Search for Eating Signals	366
The Search for Metabolic Signals	372

Neural Mechanisms for Eating	381
Eating Behavior: The Human Factor	388
Learning to Eat: Specific Hungers	392
Drinking Behavior: An Overview	394
The Search for the Signals	395
The Two Thirsts: Osmotic and Volemic	396
Regulating Drinking Behavior	401

CHAPTER 12

SLEEP 410

Introduction	411
Sleep Defined	412
Searching for Sleep Signals	415
The Neural Mechanisms of Wakefulness	422
The Neural Mechanisms of Sleep	424
Searching for Sleep Areas	425
The Need for REM Sleep	430
Sleep Disorders	431

CHAPTER 13

SEX 438

Introduction	439
Defining Sex	439
External Control of Sexual Behavior	440
Hormones and Sexual Behavior	441
The Brain and Sexual Behavior	445
Searching for the Performance Circuit	451
Developmental Aspects of Sexual Behavior	454
The Learning and Social Aspects of Human Sexual Behavior	462

CHAPTER 14

THE NEURAL BASIS OF EMOTION 472

Introduction	473
Isolating the Chain: An Overview	474
The James-Lange Theory Revisited	479
The Anatomical Basis of Emotion	483
The Early Studies	484
Analyzing the Limbic System	488
From Lower Animals to Humans	495
The Neural Basis of Pleasure	500
The Chemical Nature of Reward	504

CHAPTER 15

THE NEURAL BASIS OF PSYCHOLOGICAL DISORDER 512

Introduction	513
Visceral Breakdown: The Early Findings	515
Stress: The Psychological Dimension	517
Mental Illness: A Physiological Perspective	520

The Monoamine Theory of Depression	522
Treating Depression: Assessing the Options	527
Anxiety Disorders	531
Schizophrenia	535
The Schizophrenic Brain and Behavior	543

LEARNING 551

Introduction	552
Early Learning Discoveries	553
Learning and the Nervous System	555
The Cortex and Learning	556
The Role of the Hippocampus in Learning	560
Mapping the Anatomical Site	564
The Synaptic Basis of Learning	571
Kandel's <i>Aplysia</i> Work	572
Long-Term Potentiation	580

MEMORY 592

Introduction	593
The Theory of Memory Consolidation: A Historical Perspective	594
The Chemical Basis of Memory Consolidation	600
Memory Consolidation: The Role of Specific Circuits	607
Human Memory	614
Memory in Brain-Damaged Humans	617
Memory Retrieval	624
Strengthening Retrieved Memories	626
Memory: A Psychological Perspective	627

LOCALIZATION OF HIGHER-ORDER FUNCTION 632

Introduction	633
Cortical Localization: A Historical Perspective	633
Language and the Cortex: Leaning to the Left	636
Localization of Perception: Leaning to the Right	639
Coordinating the Two Hemispheres	643
The Function of the Corpus Callosum	649
Why Are the Hemispheres Specialized?	653
Hemispheric Differences between the Sexes	659
A Final Look	661
