
Contents

Chapter 1

The Promise of Proteomics: Biology, Applications, and Challenges..... 1

Paul D. Wagner and Sudhir Srivastava

Chapter 2

Proteomics Technologies and Bioinformatics..... 17

Sudhir Srivastava and Mukesh Verma

Chapter 3

Creating a National Virtual Knowledge Environment
for Proteomics and Information Management..... 31

*Daniel Crichton, Heather Kincaid, Sean Kelly, Sudhir Srivastava,
J. Steven Hughes, and Donald Johnsey*

Chapter 4

Public Protein Databases and Interfaces..... 53

Jane Meejung Chang Oh

Chapter 5

Proteomics Knowledge Databases: Facilitating Collaboration and
Interaction between Academia, Industry, and Federal Agencies..... 79

*Denise B. Warzel, Marcy Winget, Cim Edelstein,
Chenwei Lin, and Mark Thornquist*

Chapter 6

Proteome Knowledge Bases in the Context of Cancer..... 109

Djamel Medjahed and Peter A. Lemkin

Chapter 7

Data Standards in Proteomics: Promises and Challenges..... 141

*Veerasamy Ravichandran, Ram D. Sriram,
Gary L. Gilliland, and Sudhir Srivastava*

Chapter 8

Data Standardization and Integration in Collaborative Proteomics Studies..... 163

Marcin Adamski, David J. States, and Gilbert S. Omenn

Chapter 9

Informatics Tools for Functional Pathway Analysis Using Genomics and Proteomics	193
<i>Chad Creighton and Samir M. Hanash</i>	

Chapter 10

Data Mining in Proteomics	205
<i>R. Gangal</i>	

Chapter 11

Protein Expression Analysis	227
<i>Guoan Chen and David G. Beer</i>	

Chapter 12

Nonparametric, Distance-Based, Supervised Protein Array Analysis	255
<i>Mei-Fen Yeh, Jeanne Kowalski, Nicole White, and Zhen Zhang</i>	

Chapter 13

Protein Identification by Searching Collections of Sequences with Mass Spectrometric Data	267
<i>D. Fenyő, J. Eriksson, and R.C. Beavis</i>	

Chapter 14

Bioinformatics Tools for Differential Analysis of Proteomic Expression Profiling Data from Clinical Samples	277
<i>Zhen Zhang</i>	

Chapter 15

Sample Characterization Using Large Data Sets	293
<i>Brian T. Luke</i>	

Chapter 16

Computational Tools for Tandem Mass Spectrometry-Based High-Throughput Quantitative Proteomics	335
<i>Jimmy K. Eng, Andrew Keller, Xiao-jun Li, Alexey I. Nesvizhskii, and Ruedi Aebersold</i>	

Chapter 17

Pattern Recognition Algorithms and Disease Biomarkers	353
<i>Ben A. Hitt, Emanuel Petricoin, and Lance Liotta</i>	

Chapter 18

Statistical Design and Analytical Strategies for Discovery of Disease-Specific Protein Patterns	367
<i>Ziding Feng, Yutaka Yasui, Dale McLerran, Bao-Ling Adam, and John Semmes</i>	

Chapter 19

Image Analysis in Proteomics	391
<i>Stephen Lockett</i>	

Index	433
