145 Foreword

5

146 Mismatch repair proteins: key regulators of genetic recombination

6 Surtees JA, Argueso JL, Alani E

160 Studies on crossover-specific mutants and the distribution of crossing over in *Drosophila* females

20 Bhagat R, Manheim EA, Sherizen DE, McKim KS

172 Unique invasions and resolutions: DNA repair proteins in meiotic recombination in *Drosophila melanogaster*

32 Blanton H, Sekelsky J

180 A role for the MutL homologue *MLH2* in controlling heteroduplex formation and in regulating between two different crossover pathways in budding yeast

40 Abdullah MFF, Hoffmann ER, Cotton VE, Borts RH

191 Homologous recombinational repair proteins in mouse meiosis

51 Bannister LA, Schimenti JC

201 Roles of RecA homologues Rad51 and Dmc1 during meiotic recombination

61 Shinohara A, Shinohara M

208 Inter-sex variation in synaptonemal complex lengths largely determine the different recombination rates in male and female germ cells

68 Tease C, Hultén MA

216 Novel and diverse functions of the DNA mismatch repair family in mammalian meiosis and recombination

76 Kolas NK, Cohen PE

232 Meiotic recombination intermediates and mismatch repair proteins

92 Hoffmann ER, Borts RH

249 Cytological studies of meiotic recombination in human males

109 Hassold T, Judis L, Chan ER, Schwartz S, Seftel A, Lynn A

256 The mammalian mid-pachytene checkpoint: meiotic arrest in spermatocytes with a mutation in *Atm* alone or in combination with a *Trp53* (*p53*) or *Cdkn1a* (*p21/cip1*) mutation

Ashley T, Westphal C, Plug-de Maggio A, de Rooij DG
