

CONTENTS

Kakugo Virus from Brains of Aggressive Worker Honeybees

TOMOKO FUJIIYUKI, HIDEAKI TAKEUCHI, MASATO ONO, SEIJI OHKA,
TETSUHIKO SASAKI, AKIO NOMOTO, AND TAKEO KUBO

I.	Introduction.	1
II.	Sociality of the European Honeybees (<i>Apis mellifera</i> L.)	3
III.	Identification of a Novel Insect Picorna-like Virus, Kakugo Virus, from the Brains of Aggressive Worker Honeybees.	6
IV.	Comparison of Features of Kakugo Virus with Other Insect Picorna-like Viruses that Infect Honeybees.	11
V.	Examples of Viral Infections Related to Behavioral Changes in Host Animals.	16
VI.	Conclusions and Future Prospects	21
	References.	22

RNA Viruses Redirect Host Factors to Better Amplify Their Genome

ANNA M. BOGUSZEWSKA-CHACHULSKA AND ANNE-LISE HAENNI

I.	Introduction.	29
II.	How to Study Host Factors Specifically Involved in Viral RNA Transcription/Replication	34
III.	Interaction with the Replicase Complex	36
IV.	Binding of Host Proteins to the Viral RNA Genome	42
V.	Interaction with Cytoskeletal Proteins	46
VI.	Host Factors Identified Using the Yeast Model	47
VII.	Involvement of Membrane Components	48
VIII.	Perspectives.	51
	References.	54

Tomato Spotted Wilt Virus Particle Assembly and the Prospects of Fluorescence Microscopy to Study Protein-Protein Interactions Involved

MARJOLEIN SNIPPE, ROB GOLDBACH, AND RICHARD KORMELINK

I.	Introduction	63
II.	Fluorescence Microscopy	92
III.	Conclusions	100
	References	101

Influenza Virus Virulence and Its Molecular Determinants

DIANA L. NOAH AND ROBERT M. KRUG

I.	Introduction: the Human Disease Caused by Influenza Viruses	121
II.	Assays for Virulence of Influenza A Viruses	123
III.	The Genes and Proteins of Influenza A Viruses	125
IV.	The Emergence of New Influenza A Viruses in Humans	126
V.	The Role of the Major Surface Proteins HA and NA in Influenza A Virus Virulence	128
VI.	The Role of the Viral Polymerase in Influenza A Virus Virulence	130
VII.	The Role of the NS1A Protein in Influenza A Virus Virulence	133
VIII.	The Molecular Determinants of Influenza A Virus-Induced Cell Death: Possible Role in Virulence	135
IX.	Functional Interactions Between Influenza A Virus-Encoded Proteins: Do These Interactions Play a Role in Virulence?	137
X.	Conclusions	139
	References	140

Alteration and Analyses of Viral Entry with Library-Derived Peptides

KEITH BUDD AND MONICA J. ROTH

I.	Introduction	147
II.	Examining Virus-Receptor Interactions Using Libraries	148
III.	Targeting Viruses for Gene Therapy	151
IV.	Conclusions	168
	References	168

A Decade of Advances in Iridovirus Research

TREVOR WILLIAMS, VALÉRIE BARBOSA-SOLOMIEU, AND V. GREGORY CHINCHAR

I.	Introduction: Impact of Iridoviruses on the Health of Ectothermic Vertebrates	174
II.	Taxonomy	177
III.	Genomic Studies	190
IV.	Viral Replication Strategy	196
V.	Vertebrate Iridoviruses: Pathology and Diagnosis	204
VI.	Immune Responses to Vertebrate Iridoviruses	207
VII.	Ecology of Vertebrate Iridoviruses	209
VIII.	Structure of Invertebrate Iridescent Viruses	212
IX.	Ecology of Invertebrate Iridescent Viruses	214
X.	Iridoviruses in Noninsect Marine and Freshwater Invertebrates . . .	226
XI.	Conclusions	227
	References	230
	Index	249
