Novartis Foundation symposium on Nuclear organization in development and disease, held at the Novartis Foundation, London, 27–29 January 2004

Editors: Derek J. Chadwick (Organizer) and Jamie Goode

This symposium is based on a proposal made by Colin Stewart

Robert Goldman Chair's introduction 1

Robert D. Goldman, Anne E. Goldman and Dale K. Shumaker Nuclear lamins: building blocks of nuclear structure and function 3
Discussion 16

Brian Burke, Catherine Shanahan, Davide Salina and Melissa Crisp Aspects of nuclear envelope dynamics in mitotic cells 22
Discussion 30

Howard J. Worman Components of the nuclear envelope and their role in human disease 35
Discussion 42

Katherine L. Wilson, James M. Holaska, Rocio Montes de Oca, Kathryn Tift, Michael Zastrow, Miriam Segura-Totten, Malini Mansharamani and Luiza Bengtsson Nuclear membrane protein emerin: roles in gene regulation, actin dynamics and human disease 51
Discussion 58

Eric C. Schirmer, Laurence Florens, Tinglu Guan, John R. Yates III and Larry Gerace Identification of novel integral membrane proteins of the nuclear envelope with potential disease links using subtractive proteomics 63
Discussion 76

Rabah Ben Yaou, Antoine Muchir, Takuro Arimura, Catherine Massart, Laurence Demay, Pascale Richard and Gisèle Bonne Genetics of laminopathies 81
Discussion 90

Kristen Nowak, Karl McCullagh, Ellen Poon and Kay E. Davies	Muscular dystrophies related to the cytoskeleton/nuclear envelope	98
<i>Discussion</i>		112
M. J. Grattan, C. Kondo, J. Thurston, P. Alakija, B. J. Burke, C. Stewart, D. Syme and W. R. Giles	Skeletal and cardiac muscle defects in a murine model of Emery-Dreifuss muscular dystrophy	118
<i>Discussion</i>		133
Angela Taddei, Marc R. Gartenberg, Frank R. Neumann, Florence Hediger and Susan M. Gasser	Multiple pathways tether telomeres and silent chromatin at the nuclear periphery: functional implications for Sir-mediated repression	140
<i>Discussion</i>		156
Corinne Vigouroux and Jacqueline Capeau	A-type lamin-linked lipodystrophies	166
<i>Discussion</i>		177
Jean-Pierre Julien, Stephanie Millecamps and Jasna Kriz	Cytoskeletal defects in amyotrophic lateral sclerosis (motor neuron disease)	183
<i>Discussion</i>		192
Shurong Huang, Brian K. Kennedy and Junko Oshima	LMNA mutations in progeroid syndromes	197
<i>Discussion</i>		202
Daniel A. Starr and Min Han	A genetic approach to study the role of nuclear envelope components in nuclear positioning	208
<i>Discussion</i>		219
General discussion I		227
Ayelet Margalit, Jun Liu, Alexandra Fridkin, Katherine L. Wilson and Yosef Gruenbaum	A lamin-dependent pathway that regulates nuclear organization, cell-cycle progression and germ-cell development	231
<i>Discussion</i>		240
Serguei Kozlov, Leslie Mounkes, Dedra Cutler, Terry Sullivan, Lidia Hernandez, Nicolas Levy, Jeff Rottman and Colin L. Stewart	Mutations in the mouse <i>Lmna</i> gene causing progeria, muscular dystrophy and cardiomyopathy	246
<i>Discussion</i>		248

Jan Lammerding and Richard T. Lee	The nuclear membrane and mechanotransduction: impaired nuclear mechanics and mechanotransduction in lamin A/C-deficient cells	264
	<i>Discussion</i>	273
Robert Goldman	Chair's summing-up	278
	Index of contributors	281
	Subject index	283
