

Table of Contents

List of Contributors	v
Preface.....	ix
Foreword	xiii
Chapter 1 Principles of Protein Microarrays.....	1
<i>Mark Schena</i>	
Chapter 2 Novel Strategies in Protein Microarray Generation and	
Detection	13
<i>Yee-Peng Rina Lue, Su-Yin Dawn Yeo, Lay-Pheng Tan, Mahesh</i>	
<i>Uttamchandani, Grace Yi-Jun Chen, and Shao Q. Yao</i>	
Chapter 3 Practical Guide to Protein Microarrays: Assay Systems,	
Methods, and Algorithms.....	43
<i>Mikhail Soloviev and Jon Terrett</i>	
Chapter 4 Microarrays for the High-Throughput Analysis of	
Protein–Carbohydrate Interactions	57
<i>William G. T. Willats</i>	
Chapter 5 Protein Microarrays: Principles and Limitations	71
<i>Victor N. Morozov</i>	
Chapter 6 System-Oriented Proteomics Using Protein-Domain	
Microarrays	107
<i>Alexsandra Espejo and Mark T. Bedford</i>	
Chapter 7 Colorimetric Microarray Assays for Rheumatoid	
Arthritis using a Recombinant Proteome Library	119
<i>Stewart J. Lebrun</i>	
Chapter 8 Academic and Commercial Aspects of Protein Microarray	
Development	137
<i>Seung-yong Seong</i>	
Chapter 9 Analyzing Proteins and Protein Modifications with	
ArrayTube™ Antibody Microarrays	159
<i>Stefan Wölfl, Annegret Dummer, Larissa Pusch, Marina Pfalz, Lin Wang,</i>	
<i>Joachim H. Clement, Ines Leube, and Ralf Ehricht</i>	
Chapter 10 Non-Contact Dispensing for Protein Microarrays	169
<i>Thomas C. Tisone and John L. Tonkinson</i>	
Chapter 11 High Speed, High Efficiency Protein Printing by BioLP™ ...	187
<i>Bradley R. Ringeisen, Jason A. Barron, and David B. Krizman</i>	
Chapter 12 Putting the “Bio” in Biochips: Capture Agents for Protein	
Microarray Expression Profiling Platforms	199
<i>David S. Wilson, Michael L. Phelan, and Steffen Nock</i>	
Chapter 13 Protein Biochips for the Profiling of Allergen-Specific	
Antibodies	221
<i>Christian Harwanegg, Susanne Spitzauer, Rudolf Valenta, Manfred W.</i>	
<i>Mueller, and Reinhard Hiller</i>	

Chapter 14	Solid Supports for Protein Microarrays and Related Devices	247
	<i>Wlad Kusnezow, Timo Pulli, Olaf Witt, and Jörg D. Hobeisel</i>	
Chapter 15	Protein Microarrays for Biosensor Applications	285
	<i>Michael G. Weller</i>	
Chapter 16	Technological Aspects of Protein Microarrays and Nanoarrays	305
	<i>Fan-Gang Tseng, Shih-Chang Lin, Da-Jen Yao, Haimei Huang, and Ching-Chang Chieng</i>	
Chapter 17	Mega-Dense Nanoarrays: The Challenge of Novel Antibody Microarray Formats	339
	<i>Christer Wingren, Lars Montelius, and Carl A. K. Borrebaeck</i>	
Chapter 18	INFINITI™ System: An Automated Multiplexing Protein Microarray Platform	353
	<i>Anupam Talapatra, Vijay Mahant, Ram Vairavan, Fareed Kureshy, and Gary Hardiman</i>	
Chapter 19	Protein Microarrays for Analysis of Antibody Responses in Animals and Humans	365
	<i>Paul J. Utz, Lawrence Steinman, and William H. Robinson</i>	
Chapter 20	G-Protein Coupled Receptor Microarrays: A Versatile Tool for Drug Discovery	377
	<i>Ye Fang, Yulong Hong, Jinlin Peng, and Joydeep Lahiri</i>	
Chapter 21	Proteome-Scale Analysis of the Immune Response Against Pathogenic Microorganisms	387
	<i>Tito Bacarese-Hamilton, Julian Gray, and Andrea Crisanti</i>	
Chapter 22	Development of Protein Microarrays for Drug Discovery ...	401
	<i>Jens O. Koopmann, Michael B. McAndrew, and Jonathan M. Blackburn</i>	
Chapter 23	Development and Applications of Functional Protein Microarrays	421
	<i>James Ball, Barry Schweitzer, Paul Predki, and Michael Snyder</i>	
Chapter 24	Enabling Tools for Protein Microarrays	441
	<i>Todd Martinsky</i>	
Index		463
