

Brief Table of Contents

Foreword	xvii
Elaine R. Mardis	
Chapter 1. Controlled Heat-Denaturation of DNA Plasmids	1
Jan Kieleczawa	
Chapter 2. Effects of Various Reagents on DNA Sequencing Process	11
Jan Kieleczawa	
Chapter 3. Sequencing of Difficult DNA Templates	27
Jan Kieleczawa	
Chapter 4. New DNA Sequencing Enzymes	35
Sandra L. Spurgeon and John W. Brandis	
Chapter 5. Beyond pUC: Vectors for Cloning Unstable DNA	55
Ronald Godiska, Melodee Patterson, Tom Schoenfeld, and David A. Mead	
Chapter 6. Recombination-Based Cloning	77
Vincent Ling	
Chapter 7. Plasmid Preparation Methods for DNA Sequencing	99
Parke K. Flick	
Chapter 8. Optimization of Culture Growth in 96-Deep-Well Plates	117
Jan Kieleczawa	
Chapter 9. Automated DNA Scanners Used in Sequencing Laboratories	123
Jan Kieleczawa	
Chapter 10. Geospiza's Finch-Server: A Complete Data Management System for DNA Sequencing	131
Sandra Porter, Joseph Slagel, and Todd Smith	
Chapter 11. DNA Sequencing Database: A Flexible LIMS for DNA Sequencing Analysis	143
Donald M. Koffman and Hemchand Sookdeo	
Chapter 12. Good Laboratory Practices, Good Manufacturing Procedures, and Quality Assurance in the DNA Sequencing Laboratory	157
Michele Godlevski and Thalia Taylor	
Chapter 13. Future of DNA Sequencing: Towards an Affordable Genome	177
Kevin McKernan
