### Role of the LAT Adaptor in T-Cell Development and $T_H2$ Differentiation

Bernard Malissen, Enrique Aguado, and Marie Malissen

|                                                                                                        |    |
|--------------------------------------------------------------------------------------------------------|----|
| Abstract .....                                                                                         | 1  |
| 1. Introduction .....                                                                                  | 2  |
| 2. The LAT Signalosome .....                                                                           | 2  |
| 3. LAT: An Essential Component of the Pre-TCR .....                                                    | 5  |
| 4. Role of LAT in $\gamma\delta$ T-Cell Development .....                                              | 7  |
| 5. Negative Regulatory Role of LAT .....                                                               | 9  |
| 6. Positive and Negative Selection in <i>Lat</i> <sup>Y136F</sup> Mice .....                           | 13 |
| 7. Cooperative Assemblies Within the LAT Signalosome .....                                             | 15 |
| 8. Redundancy Among LAT Tyrosines .....                                                                | 17 |
| 9. Mechanisms of Signal Termination by LAT .....                                                       | 18 |
| 10. $T_H2$ -Type Immunity in <i>Lat</i> <sup>Y136F</sup> and <i>Lat</i> <sup>Y718/89F</sup> Mice ..... | 19 |
