Plastid RNA Polymerases, Promoters, and Transcription Regulators in Higher Plants

Takashi Shiina, Yuichi Tsunoyama, Yoichi Nakahira,
and Muhammad S. Khan

I. Introduction	2
II. RNA Polymerases in Higher Plant Plastids	4
III. Plastid Promoters	11
IV. Plastid σ Factors	23
V. Plastid Transcription Regulators and Proposed Models for Plastid Transcriptional Regulation	40
VI. Conclusion and Prospects	53
References	54

Maintenance of Golgi Apparatus Structure in the Face of Continuous Protein Recycling to the Endoplasmic Reticulum: Making Ends Meet

Brian Storrie

I. Introduction	70
II. Golgi Resident Proteins Continuously Recycle to the ER	72

III. What Holds Golgi Cisternae Together into a Stack and Holds Stacks into a Ribbon?	81
IV. <i>De Novo</i> Golgi Formation Is Possible But Not Likely During Mitosis	84
V. Conclusions and Future Perspectives: Protein Cycling, Golgi Assembly, and Vesicular Versus Cisternal Progression Models of Golgi Function	88
References	90

Nucleocytoplasmic Trafficking in Plant Cells

Iris Meier

I. Introduction	96
II. Mechanism of Nuclear Import and Export	97
III. Nucleocytoplasmic Trafficking in Plant Regulatory Pathways	109
IV. Nucleocytoplasmic Trafficking of Viruses and Viroids	118
V. Nucleocytoplasmic Trafficking of Other Molecules	121
VI. Perspectives	125
References	126

Building *In Vitro* Models of Organs

Erik J. Suuronen, Heather Sheardown, Kimberley D. Newman,
Christopher R. McLaughlin, and May Griffith

I. Why Build <i>In Vitro</i> Organs?	138
II. Scaffolding in Tissue Engineering	138
III. <i>In Vitro</i> Corneal Models	141
IV. <i>In Vitro</i> Nerve Models	149
V. <i>In Vitro</i> Models of the Cardiovascular System	153
VI. Concluding Remarks	163
References	164

Mitochondrion-Derived Organelles in Protists and Fungi

Mark van der Giezen, Jorge Tovar, and C. Graham Clark

I. Introduction	175
II. Mitochondrion-Derived Organelles	178
III. Comparative Genomics	203
IV. Evolutionary Perspectives	207
V. Conclusions and Perspectives	211
VI. Note Added in Proof	212
References	213

The Flagellum of Trypanosomes

Linda Kohl and Philippe Bastin

I. Introduction	227
II. Cilia and Flagella	228
III. The Trypanosome Flagellum	242
IV. Conclusions	272
References	273

Regulation of Growth and Differentiation in *Dictyostelium*

Yasuo Maeda

I. Introduction	288
II. Intercellular Signals Required for the Initiation of Differentiation	291
III. The Early Events Induced by Starvation	295
IV. Growth/Differentiation Checkpoint in the Cell Cycle	300
V. Novel and Multiple Functions of Mitochondria in the Developmental System	315
VI. Perspectives	323
References	324
