1

Deer Antlers as a Model of Mammalian Regeneration

Joanna Price, Corrine Faucheux, and Steve Allen

- I. Introduction 2
- II. Regulation of the Antler Development and Regeneration 24
- Acknowledgments 37
- References 38

2

The Molecular and Genetic Control of Leaf Senescence and Longevity in *Arabidopsis*

Pyung Ok Lim and Hong Gil Nam

- I. Introduction 50
- II. *Arabidopsis* as a Model Plant for Studying Leaf Senescence 52
- III. Senescence Symptoms 52
- IV. Identification of Senescence-Associated Genes and Their Functional Analysis 55
- V. Regulatory Mode of Senescence-Associated Genes 62
- VI. Regulatory Factors: Molecular Genetic Regulation of Leaf Senescence 62
- VII. Biotechnological Application of Senescence 73
- VIII. Conclusions and Future Challenges 73
- Acknowledgments 77
- References 77

V. Physiological Relevance of AQP1 Ion Channels in Choroid Plexus	191
VI. Regulation of Cerebrospinal Fluid Production	192
VII. Choroid Plexus "Dark Cells"	193
VIII. Barrier Function of the Choroid Plexus	194
IX. Neuroendocrine Function	197
X. Pathophysiology of the Choroid Plexus	198
XI. Conclusions	199
References	199

Control of Food Intake Through Regulation of cAMP

Allan Z. Zhao

I. Introduction	207
II. Regulation of Feeding at the Hypothalamus	208
III. Hypothalamic Effects of cAMP on Food Intake	210
IV. cAMP as an Orexigenic Second Messenger	210
V. The Anorectic Effects of cAMP in the PVN	212
VI. Regulation of Food Intake by Leptin Requires a PI3K-PDE3B-cAMP Signaling Pathway	213
VII. What Elevates the Intracellular cAMP Levels in the NPY-Neurons in a Negative Energy Balance State?	215
VIII. A Working Model for Hypothalamic Control of Food Intake Involving Regulation of cAMP—A Perspective from the NPY/AgrP Neurons	217
IX. Dysregulation of cAMP in the Hypothalamus—Implication in Obesity	218
References	218

7

Factors Affecting Male Song Evolution in *Drosophila montana*

Anneli Hoikkala, Kirsten Klappert, and Dominique Mazzi

I. Background	226
II. Male Song Variation in <i>D. montana</i> and Other Species of the <i>virilis</i> Group	231
III. Female Preferences for Male Song Characters	236
IV. Song as a Species-Recognition Signal	243

V. Summary	243
Acknowledgments	245
References	245

8

Prostanoids and Phosphodiesterase Inhibitors in Experimental Pulmonary Hypertension

Ralph Theo Schermuly, Hossein Ardeschir Ghofrani, and Norbert Weissmann

I. Introduction	252
II. Animal and Organ Models of Pulmonary Hypertension	257
III. Prostanoids and PDE Inhibitors in Acute and Chronic Hypoxia	257
IV. Prostanoids and PDE Inhibitors in Monocrotaline-Induced Pulmonary Hypertension	263
V. Prostanoids and PDE Inhibitors in U46619-Induced Acute Pulmonary Hypertension	267
VI. Less Frequently Used Models of Experimental Pulmonary Hypertension	270
VII. Combination of PDE Inhibitors with Vasodilators	271
VIII. Summary and Concluding Remarks	273
Acknowledgments	273
References	274

9

14-3-3 Protein Signaling in Development and Growth Factor Responses

Daniel Thomas, Mark Guthridge, Jo Woodcock, and Angel Lopez

I. Introduction	286
II. 14-3-3: A Dimer with Phosphoserine-Binding Activity	287
III. 14-3-3 Pathways in <i>Drosophila</i> Development	292
IV. Interaction with the Ras-Raf Signaling Pathway	294
V. 14-3-3 and Growth Factor Signaling	295
VI. Phosphorylation of 14-3-3 by Sphingosine-Dependent Kinase	297
VII. Conclusions	298
References	298

Skeletal Stem Cells in Regenerative Medicine*Wataru Sonoyama, Carolyn Coppe, Stan Gronthos, and Songtao Shi*

I. Introduction	306
II. Isolation and Characterization of MSCs from Bone Marrow	307
III. Niche Microenvironment of BMSSCs	309
IV. Therapeutic Uses of BMSSCs	310
V. Delivery of BMSSCs	314
VI. Alternative Sources of MSCs	315
VII. Future Direction	316
References	316
