SECTION I General Considerations

Template Isolation and Preparation

Chapter 1 Extraction and Amplification of Ancient DNA.....	5
--	---

Anne C. Stone

Chapter 2 Long PCR from Damaged DNA.....	11
--	----

Bernard Fromenty, Philippe Schmitt, and Dominique Pessayre

Chapter 3 Quantitative mRNA Analysis in Small Cell Samples by RT-PCR and Flow Cytometry.....	23
---	----

Veronika Stemme and Sten Stemme

Chapter 4 Microdissection of Single or Small Numbers of Cells for Analyses of DNA and RNA by PCR.....	29
--	----

Rose G. Mage, Robert F. Bonner, and Harold Obiakor

Chapter 5 Pre-PCR Processing Strategies.....	37
--	----

Peter Rååström, Maria Lövenklev, Petra Wolffs, Charlotta Löfström, and Rickard Knutsson

PCR Optimization

Chapter 6 Novel PCR-Enhancing Compounds and Their Modes of Action.....	51
--	----

Raj Chakrabarti

Chapter 7 Optimizing PCR with the Aid of Experimental Design.....	65
---	----

Thomas Weissensteiner

Labeling and Cloning

Chapter 8 Economic Fluorescent Labeling of PCR Products for Microsatellite- and Single-Stranded Conformation Polymorphism (SSCP) Analysis.....	79
---	----

Markus Schuelke

Chapter 9 Universal Restriction Site-Free Cloning Method Using Chimeric Primers.....	87
--	----

Gao Jun Chen

SECTION II Analytical Applications

Detection of Nucleic Acid Variation

- Chapter 10** High-Throughput Genotyping and the PCR97
Kalim U. Mir and Jiannis Ragoussis
- Chapter 11** High-Throughput Genetic Analysis through Multiplexed PCR
and Multicapillary Electrophoresis111
John M. Butler and Peter M. Vallone
- Chapter 12** The GOOD Assay: A Purification-Free Assay for Genotyping by MALDI
Mass Spectrometry121
Jörg Tost, Ramón Kucharzak, Doris Lechner, and Ivo Glynne Gut
- Chapter 13** Primer Design for Large-Scale Multiplex PCR and Arrayed Primer
Extension (APEX)131
Maido Remm, Ants Kurg, and Andres Metspalu
- Chapter 14** Surface Plasmon Resonance Based Biosensor Technology for Real-Time
Detection of PCR Products141
Giordana Feriotto and Roberto Gambari
- Chapter 15** Fluorescent Amplified Fragment Length Polymorphism (FAFLP) Genotyping155
Catherine Arnold
- Chapter 16** Global Analysis of DNA Allelic Variations (GADAV) by Specific
Enrichment of Mismatches and Selective Amplification of Heterohybrids163
Xinghua Pan and Sherman M. Weissman
- Chapter 17** Quantitative DNA-Methylation Analysis by the Bisulfite Conversion Method175
Osman El-Maarri, Manfred Kuepper, Johannes Oldenburg, and Jörn Walter
- Chapter 18** Pyrosequencing Technology187
Pål Nyrén, Tommy Nordström, and Baback Gharizadeh
- Chapter 19** Octamer-Primed Cycle Sequencing197
Anelia I. Kraltcheva and Susan H. Hardin
- Chapter 20** *In Situ* Amplification of cDNA205
Gerard J. Nuovo
- Chapter 21** Detection of a Single-Copy Sequence on Human Metaphase by Cyclic PRINS215
Kirsten Mennicke, Sven Opitz, and Eberhard Schwinger

Nucleic Acid Quantitation

Chapter 22 Meaningful Quantification of mRNA Using Real-Time PCR	225
<i>Stephen A. Bustin</i>	
Chapter 23 Absolute Quantification of Specific Nucleic Acids by RT-PCR Using a Nonlinear Mathematical Model for Data Analysis	235
<i>Huong L. Vu, Serge Troubetzkoy, Vu Q. Nguyen, Michael W. Russell, and Jiri Mestecky</i>	
Chapter 24 Single-Molecule PCR – Basic Protocols and Applications.....	245
<i>Paul H. Dear</i>	
Chapter 25 Gene Expression and Discovery: Application of a Genome-Wide Approach.....	259
<i>Timothy A. Lohret and Karen M. Kelly</i>	
Chapter 26 The Detection of Differential Gene Expression Changes Using SAGE (Serial Analysis of Gene Expression)	267
<i>Jill Powell</i>	
Chapter 27 Applications of Differential Display in Infectious Diseases	277
<i>Irene Bosch, Rajas V. Warke, Marcia F. Fournier, David Magee, and Heather Melichar</i>	
Chapter 28 Restriction Endonucleolytic Analysis of Differentially Expressed Sequences: READS.....	287
<i>Verramilli V. B. K. Subrahmanyam and Sherman M. Weissman</i>	
Chapter 29 Suppression Subtractive Hybridization PCR	299
<i>Wan Ji and Li Cai</i>	

SECTION III Preparative Application

Amplification of Unknown Sequences

Chapter 30 PCR-Based Techniques for Cloning an Unknown DNA Fragment Adjacent to a Known Integrant	313
<i>Eric Ka-Wai Hui and Szecheng J. Lo</i>	
Chapter 31 Chromosome Walking by Inverse PCR.....	323
<i>Jorge A. Garcés, Selwyn A. Williams, and Ray H. Gavin</i>	
Chapter 32 Long Universal Fast Walking.....	329
<i>Kyl V. Myrick</i>	

Chapter 33 Cloning of Unknown Virus Sequences by DNase Treatment and Sequence-Independent Single Primer Amplification.....	337
<i>Tobias Allander, Suzanne U. Emerson, Robert H. Purcell, and Jens Bukh</i>	

Amplification of Minute Amounts of Nucleic Acids

Chapter 34 Whole Genome Amplification from Single Cells and Minute DNA Samples	349
<i>Dagan Wells and Mercedes G. Bermudez</i>	

Chapter 35 Primer Extension Preamplification (PEP) of Single Cells: Efficiency and Bias.....	361
<i>Xiao Yan Zhong, Ying Li, Wolfgang Holzgreve, and Sinuhe Hahn</i>	

In Vitro Evolution

Chapter 36 <i>In Vitro</i> Evolution through PCR-Mediated Mutagenesis and Recombination.....	371
<i>Sarah B. Faulkner, Heather A. Syrett, Eric A. Davidson, and Andrew D. Ellington</i>	

Index	381
