Preface	xi
---------------	----

Section I Ecology and Evolution

1 Core Concepts in Studying Ecology and Evolution	3
The Beginnings of Microbiology	3
Viruses	5
Bacteria	6
Photosynthetic Bacteria	7
Gliding Bacteria	7
Sheathed Bacteria	7
Budding and Prosthecate Bacteria	9
Spirochetes	9
Spiral and Curved Bacteria	9
Strictly Aerobic Gram-Negative Rods	9
Facultative Anaerobic Gram-Negative Rods	9
Strictly Anaerobic Gram-Negative Rods	9
Nonphotosynthetic Autotrophic Bacteria	10
Gram-Negative Cocci	10
Gram-Positive Cocci	10
Endospore-Forming Bacteria	10
Non-Spore-Forming, Gram-Positive Rods	10
Branching Bacteria	10
Obligate Intracellular Bacteria	10
Ecology Becomes a Science	11
Evolution	13
Natural Selection	14
Patterns of Selection	15
Evolutionary Ecology	17
2 Molecules and Origins of Life	21
Chemistry of Life	22
Water	22
Biological Elements	23

Early Atmosphere and the Beginnings of Life	24
Miller Flask Experiment	24
Which Molecule Came First?	25
Genes-First Models	28
Proteins-First Models	29
Dual-Origin Models	30

3 Species Concepts and Speciation	35
Universal Species Concept	37
Biological Species Concept	38
Phenetic and Related Species Concepts	39
Evolutionary Species Concept	39
Phylogenetic Species Concept	39
<i>Bacterial Taxonomy</i>	40
Bacterial Species Concepts	41
Application of the Phenetic Species Concept to Bacteria	44
Application of the Phylogenetic Species Concept	45
Speciation	45
Bacterial Speciation	48
Mismatch Repair as a Speciation Mechanism	48
Rapid Speciation?	50
Operons	51
Genome Economization and Speciation	51
Hypermutation	52
Genome Reduction	53

Section II Ecology of Individuals

4 The Individual	57
What Is an Individual?	57
Study of Individuals	59
Study of Individual Microorganisms	60
Genetic Individuals	61
Ramets	61
Ecological Individual	62
Niche	63
Abiotic Constraints	63
5 Growth and Feeding	83
Growth and Surface-to-Volume Ratios	83
Ecology of Feeding	85
Metabolic Energy	86
Role of Carbon	87
Microbial Feeding Strategies	88
Costs of Feeding	91

Generalists and Specialists	93
Optimal Foraging and Microbes	93
Cheating	96
Free-Living Microorganisms	97
Food Chains and Webs	101
Fermentations	105

6 Ecology of Sex	107
Reproductive Ecology	107
Microbial Reproduction	108
Conjugation	109
Transposons	110
Transformation	110
Transduction	112
Advantages and Disadvantages of Sex	112
Rate of Reproduction	116
Plasmids and Extrachromosomal DNA	117
When Would Plasmids Be Favorable?	119
Genes on Plasmids	120
Plasmids in Streams	122
Plasmids in Lakes	123
Hot Spots for Plasmid Transfer	124
Transformation in Nature	126

Section III Living Together in Populations

7 Fundamentals of Microbial Population Ecology	131
Populations in Ecology	131
Properties of Populations	131
Density	132
Natality and Fecundity	132
Mortality, Longevity, and Senescence	132
Immigration and Emigration	132
Microbial Population Ecology	133
Population Growth	133
Density Dependence and Independence	139
r and K Selection	141

8 Metapopulations, Multicellularity, and Modular Growth	149
Metapopulations	149
Dispersal	151
Modularity	152
Source and Sinks	155
Population Ecology of Genes	159
Sources of Phenotypic and Genotypic Variation	160

Sources of Genic and Chromosomal Genetic Variation	161
Gene Ecology	168

9 Effects of Habitats, Genome Size, Diversity, and Bacterial Communication on Population Processes	171
Habitats	171
Genome Size and Genetic Diversity	175
Feeding Ecology and Modular Growth	182
Intercellular Communication	185
Clones or Sex?	187
Bacterial Sex	191

10 Population Spatial Stability	195
Uniformity of Populations	195
Adaptation	197
Populations in Time	199
Bacterial Communication: Do Microbes Talk to Each Other?	200
Quorum Sensing and Infections	203
Evolutionary Implication of Quorum Sensing	204
Cell-Cell Communication in Bacteria	204
Quorum Sensing and Evolution	207
Disruption or Manipulation of Quorum Sensing Response	209
Eavesdropping by Bacteria	210
Quorum Sensing: Final Thoughts	210
Cannibalism, Miniaturization, and Other Ways to Beat Tough Times	211
Oligotrophic State of Nature	214
Starvation-Survival	216
Aging, Senescence, and Death	216
Dormancy or Resting State and Miniaturization	217
Taxis: Light, Chemicals, Water, and Temperature	220

Section IV Living Together in Communities

11 Characteristics of Communities and Diversity	227
Community Structure and Energetics	227
Species Diversity	229
Maintenance of Species Diversity	234
Origin and Maintenance of Communities	235
Effect of Diversity on Ecosystem Services	23
Molecular Techniques and Microbial Community Ecology	23
Methods Based on DNA or RNA	24
Methods Based on Fatty Acids or Lipids	24
Methods Based on Function or Physiology	2
Successional Theory	2
Abiotic Mechanisms of Dispersal	2

Community Development	249
Seasonality	252
12 Concepts in Community Ecology	253
Open-Water Communities	253
Biofilm Communities	257
Phylogenetics and Community Ecology	268
Soil Communities	269
Oral Communities	270
Functional Diversity	271
Niche Constructionists	274
13 Microbes and the Processing of Nutrients	277
Nutrient Cycling	277
Nitrogen Cycle	278
Fixation in Soils	283
Denitrification	286
Nitrification	287
Nitrogen Transformation Summary	288
Sulfur Biogeochemical Transformations	288
Carbon Cycling	289
Information Spiraling	291
Geostatistics and the Spatial Patterns of Microbes	295
14 Species Interactions and Processes	297
Species Interactions	297
Proliferation Hypothesis	298
Negative Relationships	303
Parasitism	304
Predation	306
Bacteria and Viral Interactions	324
Microbial Loop	324
Bacteria as Predators	325
Neutral Relationships	328
Positive Relationships	329
Metabiosis	329
Symbiosis	329
15 Additional Topics in Species Interactions	345
Cheating and Cheaters	345
Cooperation	348
Evolutionary Arms Races	351
Microbe Eukaryote Interactions	357
Biogeography	360

Bibliography	371
Glossary	395
Index	407

Section IV Living Together in Communities

11 Characteristics of Communities and Diversity	422
11.1 Community Structure and Emergence	422
11.2 Species Diversity	422
11.3 Maintenance of Communities	422
11.4 Origin and Maintenance of Communities	422
12 Additional Topics in Species Interactions	422
12.1 Changing the Game	422
12.2 Community and Change	422
12.3 Community and Change	422
12.4 Community and Change	422
12.5 Community and Change	422
12.6 Community and Change	422
12.7 Community and Change	422
12.8 Community and Change	422
12.9 Community and Change	422
12.10 Community and Change	422
