

CONTENTS

Preface		vii
Chapter 1	A Coherent and Comprehensive River Basin Management Strategy Applications <i>J. S. Antunes do Carmo, J. C. Marque and R. M. V. Cortes</i>	1
Chapter 2	Ecological Indicators and Society's Values: Monitoring, Research and Management of Water Quality in Rivers <i>Alonso Aguilar Ibarra</i>	35
Chapter 3	The Role of Biomanipulation in Aquatic Ecosystem Restoration <i>Douglas J. Spieles</i>	59
Chapter 4	Nitrogen Transformations in Riparian Wetland Microcosms Determined with Stable Isotopes <i>F. E. Matheson, M. M. Gibbs, M. L. Nguyen, A. B. Cooper and T. P. Burt</i>	83
Chapter 5	Long-term Changes in Net Ecosystem Metabolism and Net Denitrification in the Ohta River Estuary of Northern Hiroshima Bay – An Analysis based on the Phosphorus and Nitrogen Budgets <i>Tamiji Yamamoto, Asako Kubo, Toshiya Hashimoto and Yoshinori Nishii</i>	99
Chapter 6	Contaminant Removal Processes and Design of Horizontal Subsurface Flow Constructed Wetlands <i>Joan García, Paula Aguirre, Eduardo Álvarez, Rafael Mujeriego, Josep M. Bayona and Laura Ortiz</i>	121
Chapter 7	Applicability of Hierarchical Mosaic of Artificial Ecosystems (HMAE®) to the Wastewater Treatment <i>G. Ansola, E. de Luis, R. Cortijo and J. M. González</i>	139

Chapter 8	Fuzzy Modelling of Dryland Salinity Hazard in Western Australia	167
	<i>Graciela Metternicht and David Malins</i>	
Index		219
