Dedication and Acknowledgments	j
Preface	iii
自序	v
 Part I. Autointoxication Mechanism of Crop Productivity in Taiwan	1
1. Autointoxication mechanism of <i>Oryza sativa</i> I. Phytotoxic effects of decomposing rice residues in soil <i>Chang-Hung Chou and Hui-Jung Lin</i>	3
2. Phytotoxins produced during decomposition of rice stubbles in paddy soil and their effect on leachable nitrogen <i>Chang-Hung Chou, Tzer-Jinn Lin, and Chin-I Kao</i>	19
3. Autointoxication mechanism of <i>Oryza sativa</i> II. Effects of culture treatemnts on the chemical nature of paddy soil and on rice productivity <i>Chang-Hung Chou and Su-Jenn Chiou</i>	35
4. Autointoxication mechanism of <i>Oryza sativa</i> III. Effect of temperature on phytotoxin production during rice straw decomposition in soil <i>Chang-Hung Chou, Yeh-Ching Chiang, and H. H. Cheng</i>	56
5. Transformation of ¹⁵ N-enriched fertilizer nitrogen during rice straw decomposition in submerged soil <i>Chang-Hung Chou, Yueh-Ching Chiang, H. H. Cheng, and F. O. Farrow</i>	68
6. Identification and phytotoxic activity of compounds produced during decomposition of corn and rye residues in soil <i>Chang-Hung Chou and Z. A. Patrick</i>	83
7. A problem in coffee plantations: autotoxicity of caffeine and other compounds <i>George R. Waller, Ana Luisa Anaya Lang, Lorenzo Sagrero-Nieves, Alfredo B. Celis Ochoa Cordero, Durga Kumari, Jacob Friedman, Nurit Friedman, and Chang-Hung Chou</i>	102
 Part II. Allelopathic Effects of Subtropical Grasses	111
1. The allelopathic potential of <i>Miscanthus floridulus</i> <i>Chang-Hung Chou and Yea-Tzer Chung</i>	113
2. Phytotoxic substances in twelve subtropical grasses	

<i>Chang-Hung Chou and Chiu-Chung Young</i>	127
3. Phytotoxic substances in twelve subtropical grasses I. Additional evidences of phytotoxicity in the aqueous fractions of grass extracts <i>Chang-Hung Chou</i>	138
4. Competitive allelopathic interaction among some subtropical pastures <i>Jin-Chao Liang, Shyn-Shin Sheen, and Chang-Hung Chou</i>	149
5. Possible allelopathic interaction between <i>Oryza perennis</i> and <i>Leersia hexandra</i> <i>Chang-Hung Chou, Maen-Lane Lee, and Hiko-Ichi Oka</i>	162
6. Effects of nitrogen fertilizer levels on the allelopathic potential of pangola grasses and weeds <i>Chang-Hung Chou and Kuo-Jen Lee</i>	181
7. Allelopathic dominance of <i>Miscanthus transmorrisonensis</i> in an alpine grassland community in Taiwan <i>Chang-Hung Chou and Yi-Feng Lee</i>	190
Part III. Allelopathic Mechanisms of Chaparral Vegetation	205
1. Allelopathic constituents of the chaparral shrub <i>Adenostoma fasciculatum</i> <i>James K. McPherson, Chang-Hung Chou, and Cornelius H. Muller</i>	207
2. Allelopathic mechanisms of <i>Arctostaphylos glandulosa</i> var. <i>zacaensis</i> <i>Chang-Hung Chou and Cornelius H. Muller</i>	216
3. The effect of fire on the California chaparral vegetation <i>Chang-Hung Chou</i>	241
Part IV. Allelopathic Dominance of Subtropical Forests	253
1. Leaching metabolites in the vegetation of northern Taiwan II. Allelopathic potential of some vegetations in northern Taiwan <i>Chang-Hung Chou and Chung-Sing Chen</i>	255
2. Allelopathic research of subtropical vegetations in Taiwan I. Evaluation of allelopathic potential of bamboo vegetation <i>Chang-Hung Chou and Mei-Hui Hou</i>	275
3. Allelopathic research of subtropical vegetation in Taiwan II. Comparative exclusion of understory by <i>Phyllostachys edulis</i> and <i>Cryptomeria japonica</i> <i>Chang-Hung Chou and Chi-Ming Yang</i>	284
4. Allelopathic research of subtropical vegetation in Taiwan III. Allelopathic	

exclusion of understory by <i>Leucaena leucocephala</i> (Lam.) de wit <i>Chang-Hung Chou</i> and <i>Yaw-Lun Kuo</i>	303
5. Comparative allelopathic dominance of tropical vegetation in the Hengchun peninsula of southern Taiwan <i>Kuo, Yau-Lun, Chih-Yu Chiu</i> and <i>Chang-Hung Chou</i>	321
6. Allelopathic substances and interactions of <i>Delonix regia</i> (BOJ) RAF <i>Chang-Hung Chou</i> and <i>Lih-Ling Leu</i>	333
Part V. Allelochemicals as Natural Plant Growth Regulators	353
1. Chemistry of <i>Agastache</i> part I: Flavonoids of <i>Agastache pallidiflora</i> <i>Chang-Hung Chou, Ayhan Ulubelen, and Tom J. Mabry</i>	355
2. Possible allelopathic constituents of <i>Coffea arabica</i> <i>Chang-Hung Chou</i> and <i>George R. Waller</i>	356
3. Isolation and identification by mass spectrometry of phytotoxins in <i>Coffea arabica</i> <i>Chang-Hung Chou</i> and <i>George R. Waller</i>	368
4. Hazards, benefits, metabolism, and translocation of caffeine in <i>Coffea arabica</i> L. plants and surrounding soil <i>George R. Waller, Jacob Friedman, Chang-Hung Chou, Takeo Suzuki,</i> <i>and Nurit Friedman</i>	378
5. Phytochemical adaptation of coastal vegetation in Taiwan I. Isolation, identi- fication, and biological activities of compounds in <i>Vitex negundo</i> L. <i>Chang-Hung Chou</i> and <i>Cheng Yao</i>	400
6. The occurrence of soyasaponin I in <i>Vigna radiata</i> L. (mungbean) sprouts as determined by fast atom bombardment, liquid secondary on mass spectrometry, and linked scanning at constant B/E MS/MS <i>G. R. Waller, P. R. West, C. S. Cheng, Y. C. Ling, and C. H. Chou</i>	414
Part VI. Allelopathic Interaction of A Pasture-Forest Intercropping in Taiwan	427
1. The selective allelopathic interaction of a pasture-forest intercropping in Taiwan <i>Chang-Hung Chou, Shih-Ying Hwang, and Ching-I Peng</i>	429
2. The selective allelopathic interaction of a pasture-forest intercropping in Taiwan II. Interaction between kikuyu grass and three hardwood plants <i>Chang-Hung Chou, Sun-Jung Chang, Ching-Ming Cheng,</i>	

<i>Yeong-Chyn Wang, Fu-Hsing Hsu and Wei-Hsiung Den</i>	440
3. Effects of pasture - forest interaction in Taiwan <i>Chang-Hung Chou</i>	449
Part VII. Invited Review Article of Allelopathy in Book Chapter	465
1. Phytotoxins: An ecological phase of phytochemistry <i>Cornelius H. Muller and Chang-Hung Chou</i>	467
2. Allelopathic researches in the subtropical vegetation in Taiwan <i>Chang-Hung Chou</i>	483
3. The role of allelopathy in subtropical agroecosystems in Taiwan <i>Chang-Hung Chou</i>	499
4. Caffeine autotoxicity in <i>Coffea arabica</i> <i>George R. Waller, Durga Kumari, Jacob Friedman, Nurit friedman and Chang-Hung Chou</i>	517
5. The role of soil minerals in the abiotic polymerization of phenolic compounds and formation of humic substances <i>T. S. C. Wang, P. M. Huang, Chang-Hung Chou, and Jen-Hshuan Chen</i> ...	554
6. Allelopathy in subtropical vegetation and soils in Taiwan <i>Chang-Hung Chou</i>	576
7. The role of allelopathy in phytochemical ecology <i>Chang-Hung Chou</i>	593
8. The role of allelopathy in agroecosystems: studies from tropical Taiwan <i>Chang-Hung Chou</i>	613
9. Allelopathy in relation to agricultural productivity in Taiwan: Problems and prospects <i>Chang-Hung Chou</i>	632
10. The role of allelopathy in the diversity of plant communities in Taiwan <i>Chang-Hung Chou</i>	657
