List of Contributors	v
Preface	vii
1 Chitin and Chitosan	1
1.1 Introduction	1
1.2 Identification of Chitin and Chitosan	2
1.3 Chemical Structures of Chitin and Chitosan	3
1.4 Significant Participation of Chitin and Chitosan in Biological Functions	7
2 Three-dimensional Assembly of Chitin and Chitosan	21
2.1 Introduction	21
2.2 Chitin Structures	21
2.2.1 Crystal Structures of Chitin	21
2.2.2 Computer Modeling of Chitin Crystals	24
2.2.3 Proposed Models for the Biosynthesis Mechanism of Chitin Microfibrils	27
2.2.4 Complexes with β -Chitin	30
2.3 Chitosan Structures	33
2.3.1 Crystal Structures of Chitosan	34
2.3.2 Acid Complexes	37
2.3.3 Transition Metal Complexes	42
2.3.4 Chitosan Conformation in Acidic Solutions	43
2.4 Spontaneous Transformation of Chitosan Conformation	44
2.4.1 At Room Atmosphere	44
2.4.2 In an Alcohol-Water Mixture	46
2.5 Conformational Diversity of the Chitosan Molecule	47

3	Introduction of Biologically Active Branches through Controlled Modification Reactions of Chitin and Chitosan.....	51
3.1	Introduction	51
3.2	<i>O</i> -Glycosyl-branched Derivatives	52
3.2.1	Synthesis Based on Phthaloyl-chitosan	53
	A. Phthaloylation	53
	B. Branching	54
	C. Properties	57
3.2.2	Synthesis Based on Trimethylsilyl-chitosan.....	59
	A. Silylation.....	59
	B. Branching	60
3.3	<i>N</i> -Branched Derivatives	61
3.3.1	Reductive <i>N</i> -Alkylation	61
	A. With Reducing Sugars	61
	B. With Formyl-bearing Sugars.....	64
3.3.2	<i>N</i> -Acylation	66
3.4	Cyclodextrin-branched Derivatives.....	67
3.4.1	Reductive Alkylation	67
3.4.2	Other Reactions	69
3.5	Peptide-branched Derivatives	70
3.5.1	<i>N</i> -Acylation	70
3.5.2	Other Reactions	74
3.6	Other Branched Derivatives	74
3.7	Conclusion	77
4	Enzymes Involved in Chitin and Chitosan Decomposition and Synthesis	81
4.1	Introduction	81
4.2	Chitinases	81
4.2.1	Chitinase Structure	82
4.2.2	Enzyme Mechanism	86
4.2.3	Chitin and Oligosaccharide Binding	89
4.3	Chitosanases	92
4.3.1	Chitosanase Structure and Mechanism.....	92
4.3.2	Hydrolytic Specificity.....	95
4.3.3	Chitosan and Oligosaccharide Binding	97
4.4	Chitin Synthase.....	98
4.4.1	Enzymatic Mechanism of Chitin Biosynthesis.....	98
4.4.2	Regulation of Enzyme Activity	99

4.4.3 Structure of Chitin Synthases	101
4.4.4 Chitosan Biosynthesis and Chitin Deacetylase	103
4.5 Applications	105
4.5.1 Oligosaccharide Production	105
4.5.2 Plant Protection	107
4.5.3 Chitinases as Targets for Blocking Host-Parasite Interaction	108
4.6 Conclusion	108
5 Separation Materials Derived from Chitin and Chitosan	113
5.1 Introduction	113
5.2 Structural Design of Separation Materials	114
5.2.1 Chemical Design of Separation Materials	114
5.2.2 Physical Construction of Separation Materials	115
5.3 Characteristics of Chitin and Chitosan	115
5.4 Preparation Methods for Separation Materials	116
5.4.1 Methods for Membrane Preparation	116
5.4.2 Membrane Structures	117
5.4.3 Preparation of Granular Porous Materials	118
5.5 Principles of Membrane Permeation	118
5.5.1 Dialysis	118
5.5.2 Reverse Osmosis	119
5.5.3 Ultrafiltration	120
5.5.4 Pervaporation	120
5.5.5 Evapomeation	121
5.5.6 Carrier Transport	121
5.5.7 Transport with Catalytic Function	122
5.5.8 Gas Permeation	123
5.6 Chitinous Materials for Separation	123
5.6.1 Membranes	123
A. Dialysis Membranes	123
B. Reverse Osmosis Membranes	126
C. Ultrafiltration Membranes	127
D. Pervaporation Membranes	128
E. Evapomeation Membranes	137
F. Carrier Transport Membranes	145
G. Catalytic Membranes	149
H. Gas Permeation Membranes	150
5.6.2 Adsorbents	150
5.6.3 Coagulants	155

5.6.4 Immobilization Supports	156
5.7 Superiority as Separation Materials.....	159
6 Pharmaceutical Applications of Chitin and Chitosan	165
6.1 Introduction	165
6.2 Immuno-enhancing Effects of <i>N</i> -Acetylchitohexaose.....	165
6.3 Possibility of Application of Chitin and Chitosan as Drug Delivery Tools	168
6.3.1 Design of Macromolecular Prodrugs of Antitumor Agents Using Chitin and Chitosan as Carriers	168
6.3.2 Preparation of Chitosan Gel Microspheres as Antitumor Drug Vehicles	175
6.3.3 Cellular Gene Delivery Using Quaternary Chitosan Conjugates Having Antennary Galactose Residues	180
6.3.4 Preparation of PEG-grafted Chitosan Nano-aggregates as Polypeptide Drug Vehicles	185
6.4 Conclusion	189
7 Biomedical Materials from Chitin and Chitosan	191
7.1 Introduction	191
7.2 Biocompatibility	192
7.2.1 Toxicity	192
7.2.2 Biodegradability	193
7.3 Biological Activity	195
7.3.1 Polymorphonuclear Cells	195
A. Migration	196
B. Reactive Oxygen Species Release	197
C. Cytokines	198
7.3.2 Macrophages.....	199
A. Migration	200
B. Cytokines	200
7.3.3 Fibroblasts and Vascular Endothelial Cells.....	201
7.3.4 Platelets.....	201
7.3.5 Complements	201
7.3.6 Extracellular Matrix.....	203
A. Collagen.....	203
B. Glycosaminoglycan and Proteoglycan.....	203
C. <i>N</i> -Acetyl-D-Glucosamine and D-Glucosamine.....	204
7.3.7 Analgesia	204

7.3.8 Antimicrobial Activity.....	205
7.3.9 Wound Healing Acceleration	206
7.4 Applications of Biomedical Materials	207
7.4.1 Preparation of Biomedical Materials	208
A. Chitipack S.....	208
B. Chitipack P.....	208
C. Chitopack C	209
D. Other Materials	209
7.4.2 Applications for Wound Healing.....	209
A. Chitin Materials	209
B. Chitosan Materials	211
C. D-Glucosamine—Application in Injured Cartilage.....	212
8 Regeneration of Tissue in the Living Body	219
8.1 Polyelectrolyte Complexes	219
8.2 Scaffold for Tissue Culture of Various Cells	222
8.2.1 Extracellular Matrix.....	222
8.2.2 Biomedical Materials.....	224
8.3 Hard Tissue Regeneration <i>In Vitro</i> and <i>In Vivo</i>	227
8.3.1 Bone Regeneration	227
8.3.2 Cartilage Regeneration	235
8.3.3 Application in Dental Surgery	238
9 Miscellaneous Applications of Chitinous Materials	245
9.1 Introduction	245
9.2 New Solvent System for α -Chitin	245
9.3 Fabrication of Chitinous Material.....	247
9.3.1 Preparation of Fibers	247
A. Chitosan-based Fibers.....	247
B. Chitin-based Fibers	251
9.3.2 Preparation of Hydrogel	254
9.3.3 Preparation of Membrane	254
A. Chitin Sheet	254
B. Chitosan-based Membrane.....	257
9.4 Chitinous Materials in Application.....	258
9.4.1 Cosmetics.....	258
9.4.2 Food Additives	260
9.4.3 Agricultural Materials.....	261
9.4.4 Water Purification.....	262

9.4.5 Drug Delivery System	264
10 Prospects for the Application of Chitin and Chitosan	271
Index	277
1.1 Introduction	1
1.2 Chitin and Chitosan	1
1.3 Chitin and Chitosan in Biomedicine	1
1.4 Chitin and Chitosan in Agriculture	1
1.5 Chitin and Chitosan in Food	1
1.6 Chitin and Chitosan in Cosmetics	1
1.7 Chitin and Chitosan in Environmental Protection	1
1.8 Chitin and Chitosan in Other Fields	1
2.1 Chitin and Chitosan in Biomedicine	1
2.2 Chitin and Chitosan in Agriculture	1
2.3 Chitin and Chitosan in Food	1
2.4 Chitin and Chitosan in Cosmetics	1
2.5 Chitin and Chitosan in Environmental Protection	1
2.6 Chitin and Chitosan in Other Fields	1
3.1 Chitin and Chitosan in Biomedicine	1
3.2 Chitin and Chitosan in Agriculture	1
3.3 Chitin and Chitosan in Food	1
3.4 Chitin and Chitosan in Cosmetics	1
3.5 Chitin and Chitosan in Environmental Protection	1
3.6 Chitin and Chitosan in Other Fields	1
4.1 Chitin and Chitosan in Biomedicine	1
4.2 Chitin and Chitosan in Agriculture	1
4.3 Chitin and Chitosan in Food	1
4.4 Chitin and Chitosan in Cosmetics	1
4.5 Chitin and Chitosan in Environmental Protection	1
4.6 Chitin and Chitosan in Other Fields	1
5.1 Chitin and Chitosan in Biomedicine	1
5.2 Chitin and Chitosan in Agriculture	1
5.3 Chitin and Chitosan in Food	1
5.4 Chitin and Chitosan in Cosmetics	1
5.5 Chitin and Chitosan in Environmental Protection	1
5.6 Chitin and Chitosan in Other Fields	1
6.1 Chitin and Chitosan in Biomedicine	1
6.2 Chitin and Chitosan in Agriculture	1
6.3 Chitin and Chitosan in Food	1
6.4 Chitin and Chitosan in Cosmetics	1
6.5 Chitin and Chitosan in Environmental Protection	1
6.6 Chitin and Chitosan in Other Fields	1
7.1 Chitin and Chitosan in Biomedicine	1
7.2 Chitin and Chitosan in Agriculture	1
7.3 Chitin and Chitosan in Food	1
7.4 Chitin and Chitosan in Cosmetics	1
7.5 Chitin and Chitosan in Environmental Protection	1
7.6 Chitin and Chitosan in Other Fields	1
8.1 Chitin and Chitosan in Biomedicine	1
8.2 Chitin and Chitosan in Agriculture	1
8.3 Chitin and Chitosan in Food	1
8.4 Chitin and Chitosan in Cosmetics	1
8.5 Chitin and Chitosan in Environmental Protection	1
8.6 Chitin and Chitosan in Other Fields	1
9.1 Chitin and Chitosan in Biomedicine	1
9.2 Chitin and Chitosan in Agriculture	1
9.3 Chitin and Chitosan in Food	1
9.4 Chitin and Chitosan in Cosmetics	1
9.5 Chitin and Chitosan in Environmental Protection	1
9.6 Chitin and Chitosan in Other Fields	1
10.1 Chitin and Chitosan in Biomedicine	1
10.2 Chitin and Chitosan in Agriculture	1
10.3 Chitin and Chitosan in Food	1
10.4 Chitin and Chitosan in Cosmetics	1
10.5 Chitin and Chitosan in Environmental Protection	1
10.6 Chitin and Chitosan in Other Fields	1
