

TABLE OF CONTENTS

PREFACE

ix

PART 1. LITTER DYNAMICS

1. Litter Input (Arturo Elosegí & Jesús Pozo)	3
2. Leaf Retention (Arturo Elosegí)	13
3. Manipulation of Stream Retentiveness (Michael Dobson).....	19
4. Coarse Benthic Organic Matter (Jesús Pozo & Arturo Elosegí) ..	25
5. Leaching (Felix Bärlocher).....	33
6. Leaf Mass Loss Estimated by Litter Bag Technique (Felix Bärlocher).....	37
7. Coarse Particulate Organic Matter Budgets (Jesús Pozo)	43

PART 2. LEAF CHEMICAL AND PHYSICAL PROPERTIES

8. Determination of Total Nitrogen and Phosphorus in Leaf Litter (Mogens R. Flindt & Ana I. Lillebø)	53
9. Total Protein (Mark O. Baerlocher).....	61
10. Free Amino Acids (Shawn D. Mansfield & Mark O. Baerlocher).....	69

11. Determination of Total Carbohydrates (Shawn D. Mansfield)	75
12. Determination of Soluble Carbohydrates (Shawn D. Mansfield & Felix Bärlocher).....	85
13. Total Lipids (Mark O. Gessner & Paul T.M. Neumann).....	91
14. Total Phenolics (Felix Bärlocher & Manuel A.S. Graça).....	97
15. Radial Diffusion Assay for Tannins (Manuel A.S. Graça & Felix Bärlocher).....	101
16. Acid Butanol Assay for Proanthocyanidins (Condensed Tannins) (Mark O. Gessner & Daniel Steiner)	107
17. Proximate Lignin and Cellulose (Mark O. Gessner)	115
18. Leaf Toughness (Manuel A.S. Graça & Martin Zimmer)	121

PART 3. MICROBIAL DECOMPOSERS

19. Techniques for Handling Ingoldian Fungi (Enrique Descals)....	129
20. Maintenance of Aquatic Hyphomycete Cultures (Ludmila Marvanová).....	143
21. An Illustrated Key to the Common Temperate Species of Aquatic Hyphomycetes (Vladislav Gulis, Ludmila Marvanová & Enrique Descals).....	153
22. Molecular Approaches to Estimate Fungal Diversity. I. Terminal Restriction Fragment Length Polymorphism (T-RFLP) (Liliya G. Nikolcheva & Felix Bärlocher).....	169
23. Molecular Approaches to Estimate Fungal Diversity. II. Denaturing Gradient Gel Electrophoresis (DGGE) (Liliya G. Nikolcheva & Felix Bärlocher).....	177
24. Sporulation of Aquatic Hyphomycetes (Felix Bärlocher)	185
25. Ergosterol as a Measure of Fungal Biomass (Mark. O. Gessner)	189
26. Acetate Incorporation into Ergosterol to Determine Fungal Growth Rates and Production (Keller Suberkropp &	

PART 5. DETRITIVOROUS CONSUMERS

40. Maintenance of Shredders in the Laboratory (Fernando Cobo) . 291
41. Feeding Preferences of Shredders (Cristina Canhoto,
Manuel A.S. Graça & Felix Bärlocher) 297

PART 6. DATA ANALYSIS

42. A Primer for Statistical Analysis (Felix Bärlocher) 305
43. Biodiversity (Felix Bärlocher) 313

Mark O. Gessner).....	197
27. Bacterial Counts and Biomass Determination by Epifluorescence Microscopy (Nanna Buesing)	203
28. Secondary Production and Growth of Litter-Associated Bacteria (Nanna Buesing & Mark O. Gessner)	209
29. Isolation of Cellulose-degrading Bacteria (Jürgen Marxsen).....	217
30. Extraction and Quantification of ATP as a Measure of Microbial Biomass (Manuela Abelho)	223
31. Respirometry (Manuel A.S. Graça & Manuela Abelho)	231

PART 4. ENZYMATIC CAPABILITIES

32. Extracellular Fungal Hydrolytic Enzyme Activity (Shawn D. Mansfield).....	239
33. Cellulases (Martin Zimmer)	249
34. Viscosimetric Determination of Endocellulase Activity (Björn Hendel & Jürgen Marxsen)	255
35. Fluorometric Determination of the Activity of β -Glucosidase and other Extracellular Hydrolytic Enzymes (Björn Hendel & Jürgen Marxsen)	261
36. Pectin-Degrading Enzymes: Polygalacturonase and Pectin Lyase (Keller Suberkropp)	267
37. Lignin-Degrading Enzymes: Phenoloxidase and Peroxidase (Björn Hendel, Robert L. Sinsabaugh & Jürgen Marxsen)	273
38. Phenol Oxidation (Martin Zimmer).....	279
39. Proteinase Activity: Azocoll and Thin-Layer Enzyme Assay (Manuel A.S. Graça & Felix Bärlocher).....	283
