

CONTENTS

Preface		i-ii
List of Contributors		ix-xiv

Section I: Microbial Resources

1. Microbial aerobiodiversity in the ecosystem of Indo-Myanmar border state – <i>N. Irabanta Singh</i>		1-14
2. Blue green algae: ecology and role in sustainable agriculture – <i>B.V. Singh, Sudhir Saxena, Dolly Wattal Dhar and P.K. Singh</i>		15-34
3. Indoor aeromycology of certain work place environments in Manipur and their management practices – <i>A. Premila Devi and N. Irabanta Singh</i>		35-44
4. Species diversity of <i>Trichoderma</i> in the soils of Manipur and their antagonistic activities against <i>Sclerotium rolfsii</i> – <i>M.S. Singh, Y. Sabitri Devi and N. Irabanta Singh</i>		45-57
5. Biodiversity of rice field Cyanobacteria of North East India and their application for sustainable agriculture – <i>S. Mukta Singh, N. Sharatchandra Singh and N. Irabanta Singh</i>		59-65
6. Biodiversity of wild edible fungal resources of Manipur and their possible use for sustainable economic development – <i>Th. Chittaranjan Singh, Nivedita L. and N. Irabanta Singh</i>		67-94
7. Biodiversity of rust and smut Fungi- Indian perspective – <i>D.K. Agarwal</i>		95-100
8. Plant parasitic and soil nematode diversity of Manipur and adjoining areas – <i>Ch. Dhanachand & N. Mohilal</i>		101-118

Section II: Insect Resources

9. Natural enemy resource of tea-plantations and its possible role in sustainable management of Arthropod pests of tea from Darjeeling and North East India. – <i>A. Mukhopadhyay, S. Das and M. Sarker</i>		119-138
--	-------	---------

10. A review of genera of Tetrastichinae (Hymenoptera : Chalcidoidea : Eulophidae) of India Sub-continent
– T.C. Narendran 139-168
11. Endemic Thrips (Thysanoptera: Insecta) of North Eastern India
– R. Varanharayan, O. Tarunkumar and U.S. Chochong 169-173
12. Biosystematics, Bioecology and Biocontrol potential of Assassin bugs (Hemiptera: Reduviidae)
– D.P. Ambrose 175-217
13. Predatory insect of aphids infesting cruciferous crops in Manipur
– Y. Debaraj and T.K. Singh 219-237
14. Insect biodiversity and its conservation with special reference to North East India
– Mantu Bhuyan and S.K. Dutta 239-274
15. Insect diversity and bioresources in Manipur
– B. Prasad 275-291

Section III: Mites and Flies Resources

16. Mites as a bioresource of India in conservation and sustainable development of environment
– S.B. Jogdand 293-329
17. Flower visitation and pollination by dipteran flies – An overview
– J.B. Atluri, S.P.V. Ramana and C. Subba Reddi 331-354

Section IV: Aquatic Resources

18. Biodiversity of *Azolla* and its algal symbiont *Anabaena azollae*
– K.Kumar, R. Subhashini and S. Kannaiyan 355-374
19. Checklist of fishes of Manipur with systematic status of some fishes
– W. Vishwanath 375-395

Section V: Medicinal/Horticultural /Fibre Crop Plants Resources

20. Potential of ethno-botanical studies in North east India :
An overview
– *B.K. Dutta and P.K. Dutta* 397-405
21. Biodiversity of medicinal plants in North East India
– *I.C. Barua and K.N. Bhagabati* 407-422
22. Biodiversity of citrus plants in North Eastern region of India
– *K.N. Bhagabati* 423-430
23. Genetic improvement and conservation of Ramie
(*Boehmeria nivea* (L.) Gaud). – A potential indigenous
fibre crop of N.E. India
– *P. Talukdar and Jyotsna Devi* 431-439

Section VI: Birds Resources

24. The threatened/ rare birds species of Manipur
– *N. Thambalshangbi Devi* 441-458

Section VII: Technology for Sustainable Economic Development

25. Agronomic potential of *Azolla* as biofertilizer for rice crop under
Manipur condition.
– *N. Saratchandra Singh, S. Mukta Singh and*
N. Irabanta Singh 459-467
26. Conservation of endemic orchids by multiplication
through tissue culture techniques
– *Jyotsna Devi and P. Talukdar* 469-480
27. Diversity of non-timber forests produces and their management
practices in Manipur hills, India
– *G.K.N. Chhetry and N.R. Thingujam* 481-498
28. Diversity in traditional fermented foods and beverages of the
North Eastern region of India
– *G.U. Ahmed and Nasreen Ahmed* 499-509
- Index 511-527
