	Page
<i>Contributors</i>	vii
<i>Preface</i>	ix
<i>Colour plate</i>	xiii
<i>Acknowledgements</i>	xv
Section 1: Peroxisome functions	
<i>Chapter 1</i>	Early research on peroxisomes in plants Prof. H. Beevers 1
<i>Chapter 2</i>	Molecular biology, enzymology, and physiology of β -oxidation Dr. M. Hooks 19
<i>Chapter 3</i>	Synthesis and function of glyoxylate cycle enzymes Dr. J.E. Cornah and Dr. S.M. Smith 57
<i>Chapter 4</i>	Plant catalases Dr. M. Heinze and Dr. B. Gerhardt 103
<i>Chapter 5</i>	The photorespiratory pathway of leaf peroxisomes Dr. S. Reumann 141
<i>Chapter 6</i>	Peroxisome biogenesis in root nodules and assimilation of symbiotically-reduced nitrogen in tropical legumes Prof. D.P.S. Verma 191

<i>Chapter 7</i>	Peroxisomes, reactive oxygen metabolism, and stress-related enzyme activities Prof. L.A. del Río <i>et al</i>	221
<i>Chapter 8</i>	Peroxisomal membrane enzymes Prof. R.P. Donaldson	259
<i>Chapter 9</i>	Genetic approaches to understand plant peroxisomes Dr. M. Hayashi and Prof. M. Nishimura	279

Section 2: Peroxisome biogenesis and protein import

<i>Chapter 10</i>	Peroxisomal biogenesis and acquisition of membrane proteins Prof. R.N. Trelease	305
<i>Chapter 11</i>	Targeting and import of matrix proteins into peroxisomes Dr. R. Mullen	339
<i>Chapter 12</i>	PEX genes in plants and other organisms Dr. W. Charlton and Dr. E. López-Huertas	385

Section 3: Peroxisomes – biotechnological potential

<i>Chapter 13</i>	Prospects for increasing stress resistance of plant peroxisomes Dr. R. Grene Alscher	427
<i>Chapter 14</i>	Futile cycling through β -oxidation as a barrier to increased yields of novel oils Dr. E. Rylott and Dr. T. Larson	445
<i>Chapter 15</i>	Polyhydroxyalkanoate synthesis in plant peroxisomes Prof. Y. Poirier	465
<i>Index</i>		497
