

TABLE OF CONTENTS

Dedication	v
Table of Contents	vii
Preface	ix
Introduction	xi
1. Introduction to Steady-State Kinetics	1
2. The Generation of Experimental Data	7
3. Methods for Model Evaluation	14
4. Derivation of Mathematical Models	27
5. Effects of Substrate Concentration	44
6. Effects of Analog Inhibitors	66
7. Effects of Product Inhibitors	89
8. Effects of Substrate Inhibition	106
9. Slow and Tight Inhibition	122
10. The Thermodynamics of Initial Velocity	147
11. Effects of pH	164
12. Effects of Isotopic Substitution	184
13. Effects of Other Reaction Conditions	206
Index	223
