

Contents

<i>Preface</i>	ix
1 Introduction	3
<i>Background: General works on embryology</i>	4
<i>Background: Embryology and systematics</i>	5
<i>What is a flower?</i>	6
<i>The floral appendages</i>	6
<i>The sexual life cycle</i>	7
<i>Literature cited</i>	8
2 Stamen and Androecium	10
<i>Stamen variation in representative families</i>	10
<i>Stamen anatomy</i>	12
<i>Growth of the stamen: The anther</i>	14
<i>Growth of the stamen: Filament elongation</i>	15
<i>Anther dehiscence</i>	17
<i>Evolution of the stamen</i>	19
<i>Literature cited</i>	20
3 Pollen Development: Theme and Variations	22
<i>Introduction to pollen</i>	22
<i>Summary of pollen development</i>	23
<i>Pollen development in sorghum</i>	23
<i>Pollen development in sweet pepper</i>	28
<i>Pollen development in walnut</i>	30
<i>Pollen development in the mustard family</i>	30
<i>Pollen development in sunflower</i>	32
<i>Literature cited</i>	35
4 Pollen Development: Details of Stages	36
<i>Anther differentiation before meiosis</i>	36
<i>Pollen sac before meiosis</i>	36
<i>Meiosis</i>	37
<i>Cytokinesis</i>	40
<i>Duration of meiosis</i>	43

<i>Tapetal behavior</i>	43
<i>Tapetal function</i>	46
<i>Post-meiosis: The pollen wall</i>	48
<i>Post-meiosis: Internal microspore/pollen events</i>	53
<i>Duration of pollen development</i>	60
<i>Gene expression during pollen development</i>	60
<i>Numbers of pollen produced</i>	60
<i>Literature cited</i>	61
5 Carpel and Gynoecium	65
<i>Carpel evolution and development</i>	65
<i>Carpel variations: General considerations</i>	66
<i>Carpel variations: Apocarpy</i>	69
<i>Carpel variations: Syncarpy</i>	69
<i>Carpel variations: Relations to other flower parts</i>	72
<i>Carpel structure: Stigma</i>	72
<i>Carpel structure: Style and transmitting tissue</i>	74
<i>Literature cited</i>	81
6 Ovule and Embryo Sac	83
<i>Ovule form and development</i>	83
<i>Ovule failure and ovule abortion</i>	89
<i>Megasporogenesis</i>	91
<i>Embryo sac (megagametophyte) development</i>	96
<i>Cells in the normal (Polygonum) type of embryo sac</i>	101
<i>Literature cited</i>	103
7 Pollination and Pollen-Stigma Interaction	105
<i>Pollen desiccation and rehydration (harmomegathy)</i>	105
<i>Life span of pollen</i>	107
<i>Pollen food reserves</i>	107
<i>Factors in pollination success or failure</i>	107
<i>Pollen-stigma interaction: Incongruity</i>	108
<i>Pollen-stigma interaction: Incompatibility</i>	108
<i>Pollen-stigma interaction: Self-incompatibility</i>	110
<i>The mentor pollen technique</i>	112
<i>Callose and incompatibility</i>	112
<i>Late-acting (ovarian) self-incompatibility</i>	113
<i>Molecular basis for pollen-stigma interactions</i>	113
<i>Compatible interaction</i>	114
<i>Literature cited</i>	117
8 Pollen Germination, Pollen Tube Growth, and Double Fertilization	119
<i>Germination and early tube growth</i>	119
<i>Cells and nuclei within the pollen tube</i>	124
<i>Dimorphic sperm cells and the male germ unit</i>	126

<i>Guiding and nurturing the pollen tube</i>	129
<i>Callose plugs</i>	131
<i>Swelling and branching of pollen tubes</i>	132
<i>Pollen tube competition and carpel "filters"</i>	134
<i>Rate and duration of pollen tube growth</i>	136
<i>Pollen tube growth in ovary and ovule</i>	136
<i>Pollen tube discharge and double fertilization</i>	138
<i>Polyspermy</i>	146
<i>Literature cited</i>	147
 9 <i>Endosperm</i>	 150
<i>Generalizations and historical interpretations</i>	150
<i>Cytology of endosperm</i>	151
<i>Introduction to endosperm types</i>	151
<i>Multicellular endosperm</i>	152
<i>Coenocytic/multicellular endosperm</i>	153
<i>Helobial endosperm</i>	160
<i>Coenocytic endosperm</i>	160
<i>Endosperm haustoria</i>	161
<i>Perisperm</i>	161
<i>Movement of carbohydrates into endosperm</i>	163
<i>Storage products in endosperm</i>	165
<i>Aleurone layer and mature endosperm</i>	165
<i>Functions of endosperm</i>	167
<i>Speculations on endosperm variation</i>	168
<i>Literature cited</i>	169
 10 <i>The Embryo</i>	 172
<i>Introducing the cotyledon(s)</i>	172
<i>The zygote</i>	172
<i>Proembryo initiation</i>	175
<i>The suspensor</i>	175
<i>The early proembryo proper</i>	178
<i>Embryogenesis in dicots</i>	179
<i>Embryogenesis in monocots</i>	187
<i>Nutrition of the embryo</i>	195
<i>Induction of dormancy</i>	201
<i>Green (chlorophyllous) embryos</i>	202
<i>Polyembryony</i>	203
<i>Apomixis</i>	203
<i>Summary: Embryo and seed</i>	204
<i>Literature cited</i>	204
 <i>Index</i>	 209
