

CONTENTS

Preface	xi
Acknowledgements	xiii
I - NUCLEIC ACIDS . STRUCTURES, DYNAMICS AND ASSOCIATIONS WITH PROTEINS	
Left-handed DNA in chemical and biological systems	
A. Rich	3
Theoretical studies of the polymorphism and microheterogeneity of DNA	
B. Pullman, A. Pullman and R. Lavery	23
Z-DNA and chemical carcinogenesis	
M. Leng	45
Initiation of carcinogenesis : from the local structural change of DNA to the setting up of a mutation	
M. Daune	57
Breathing reactions in nucleic acids and proteins	
N.R. Kallenbach	69
Conformation of synthetic and natural polyelectrolytes	
G. Weill	81
DNA conformation and folding : from solution to the higher order structure of chromatin	
J. Ausio, N. Borochoy, Z. Kam, M. Reich, D. Seger and H. Eisenberg	89
Higher orders of chromatin structure	
G. Felsenfeld, J.D. McGhee and D.C. Rau	101
Structure and dynamics of peptide-nucleic acid complexes	
T. Montenay-Garestier, F. Toulmé, J. Fidy, J.J. Toulmé, T. Le Doan and C. Hélène	113
Molecular mechanisms for the recognition of nucleic acids by proteins. Present-day and prebiotic aspects	
C. Hélène, G. Lancelot, T. Behmoaras, R. Mayer, C. Cazenave and N.T. Thuong	129

The <u>lac</u> repressor. Structure and interactions	
B. Barbier, M. Charlier, F. Culard, M. Durand, J.C. Maurizot and M. Schnarr	141
Role of Messenger RNA specific secondary structure in the control of gene expression	
S. Blanquet, G. Fayat, J.F. Mayaux, M. Springer and M. Grunberg-Manago	155
The organization of plant viral genomes	
H. Guilley, R.K. Dudley, L. Hirth, G. Jonard, G. Lebeurier, J. Menissier and K.E. Richards	167
Structure, evolution and interactions of ribosomal RNAs	
J.P. Ebel, C. Branlant, P. Carbon, B. Ehresmann, C. Ehresmann, A. Krol and P. Stiegler	177
Liposome-mediated gene transfer <u>in vivo</u> . Uptake and expression of the preproinsulin I gene by rats and mice	
C. Nicolau and P. Soriano	195

II. PROTEIN STRUCTURE AND DYNAMICS

Theoretical and experimental conformational analysis of some synthetic and natural peptides	
M. Ptak, F. Vovelle and M. Genest	209
Ligand binding as a probe of protein dynamics	
H. Frauenfelder	227
Dynamics of proteins and of protein assemblies	
R. Cerf	237
Dynamics of proteins	
M. Karplus	253
Conformational fluctuations and enzymatic activity	
J.M. Yon	271
X-ray and neutron scattering study of membrane proteins in solution	
V. Luzzati, A. Tardieu, C. Sardet, M. Le Maire, H.B. Osborne and M. Chabre	283
Fast kinetic spectroscopies : laser flash photolysis and pulse radiolysis : application to the study of the structure, the dynamics and the interactions of biological molecules ...	
R. Santus	299

Fluorescence decay of dansylated yeast 3 phosphoglycerate kinase	
P. Clerbout, J. P. Privat and Ph. Wahl	311
Structure and conformation of carbohydrate chains of N-glycoproteins in model systems	
B. Gallot, M. Gervais and A. Douy	321
Wheat germ agglutinin : a review of recent results	
J. Ph. Grivet, P. Midoux, P. Gatellier, F. Delmotte and M. Monsigny	329
III - EVOLUTION OF BIOLOGICAL MACROMOLECULES	
The origin and evolution of life at the molecular level	
M. Eigen and R. Winkler-Oswatitsch	353
Condensation-polymerization and morphogenesis in aqueous medium as a model for the chemical evolution	
F. Egami	371
Reflections on molecular asymmetry and appearance of life	
G. Spach and A. Brack	383
Topological and quantitative relationships in evolving genomes	
E. Zuckerkandl	395
