Preface xiii

Introduction 1

Part One The Globalization of Nature

The Causes and Consequences of Biological Invasions

Chapter 1 From Endemic to Generic 7

Feral Pigs and the Destruction of Hawaii's Native Forests

Chapter 2 Private Worlds 33

The Relationship between Ecological Isolation and Biodiversity

Chapter 3 The Great Mixers 49

Transportation Technology and the Spread of Invasive Species

Part Two Saving Nature from Nature

Strategies for Preventing and Controlling Biological Invasions

Chapter 4 Refuge for the Mussels 69

Biotic Integrity and Zebra Mussel Invasion in the Ohio River Basin

Chapter 5 Rolling the Ecological Dice 91

Invasiveness, Invasibility, and the Ecological Consequences of Invasion

- Chapter 6 Fading Forests 107
Invasive Pests and Forest Destruction in Eastern North America
- Chapter 7 Guilty until Proven Innocent 131
Preventing Nonnative Species Invasions
- Chapter 8 After All the Sheep Are Gone 153
The Recovery of Santa Cruz Island after 140 Years of Grazing
- Chapter 9 Holding the Line 177
Chemical and Mechanical Control of Nonnative Species Invasions
- Chapter 10 Fighting the Green Wildfire 197
Integrated Management of Leafy Spurge on the Great Plains
- Chapter 11 The Search for Balance 221
Using Biological Control to Restore Invaded Natural Areas

Part Three Going Local in the Global Age
What People Can Do about Biological Invasions

- Chapter 12 The Gift of Meaning 247
Public Involvement in Ecological Restoration in Madison, Wisconsin
- Chapter 13 Bringing It Home 271
Increasing Public Awareness of Alien Species Impacts in Hawai'i
- Chapter 14 Going Local 299
Personal Actions for a Native Planet

Conclusion (2004) 309

Appendix A 313
