
Contents

Chapter one	Chemical synthesis of nucleoside 5'-triphosphate	1
<i>Morteza M. Vaghefi</i>		
Chapter two	Enzymatic synthesis of nucleoside triphosphates.....	23
<i>Staffan Eriksson</i>		
Chapter three	Synthesis and properties of NTP analogs with modified triphosphate chains.....	39
<i>Inna Koukhareva, Morteza Vaghefi, and Alexandre Lebedev</i>		
Chapter four	Chemical synthesis of oligonucleotide triphosphates.....	105
<i>Morteza M. Vaghefi</i>		
Chapter five	Solid state structures of nucleoside triphosphate metal complexes	115
<i>Katsuyuki Aoki and Ikumide Fujisawa</i>		
Chapter six	DNA polymerases and their interactions with DNA and nucleotides.....	133
<i>Allison A. Johnson, Kevin A. Fiala, and Zucui Suo</i>		
Chapter seven	RNA polymerases.....	169
<i>Wissam Abdel-Gawad, Seng-Lai Tan, and Zucui Suo</i>		
Chapter eight	Reverse transcriptases	207
<i>Louise Wang and Zucui Suo</i>		
Chapter nine	Base-modified nucleoside triphosphates: chemistry and biological applications	247
<i>Stephen G. Will and Veeraiah Bodepudi</i>		

Chapter ten Nucleoside triphosphate analogs for nonradioactive labeling of nucleic acids.....	269
<i>Glenn H. McGall</i>	
Chapter eleven Antiviral drugs: triphosphates of nucleoside analogues active as antiviral drugs	329
<i>Erik De Clercq</i>	
Chapter twelve Other drug applications	343
<i>Joy Y. Feng and Phillip A. Furman</i>	
Appendix one Phosphorus nuclear magnetic resonance chemical shifts of nucleotide derivatives and some related organophosphorus compounds	373
<i>Morteza M. Vaghefi</i>	
Index.....	383
