Preface v

Contributors xiii

Color Plates xv

PART I. GROWING *ARABIDOPSIS*

1 Growth of Plants and Preservation of Seeds
Luz Rivero-Lepinckas, Deborah Crist, and Randy Scholl 3

2 Prevention and Control of Pests and Diseases
Jenifer Bush, Georg Jander, and Frederick M. Ausubel 13

3 Growth of Other Species Related to *Arabidopsis thaliana*
Krithika Yogeewaran and Mikhail Elia Nasrallah 27

4 Grafting
Katherine Bainbridge, Tom Bennett, Colin Turnbull, and Ottoline Leyser 39

5 Synchronization, Transformation, and Cryopreservation
of Suspension-Cultured Cells
Margit Menges and James A. H. Murray 45

PART II. GENETIC ANALYSES

6 Genetic Analysis
Maarten Koornneef, Carlos Alonso-Blanco, and Piet Stam 65

7 QTL Analysis
Carlos Alonso-Blanco, Maarten Koornneef, and Johan W. van Ooijen 79

8 EMS Mutagenesis of *Arabidopsis*
YongSig Kim, Karen S. Schumaker, and Jian-Kang Zhu 101

9 Low-Resolution Mapping of Untagged Mutations
*M. Rosa Ponce, Pedro Robles, Francisca M. Lozano, M. Asunción Brotóns,
and José L. Micol* 105

10 Gene Identification and Cloning by Molecular Marker Mapping
Georg Jander 115

11 High-Throughput TILLING for *Arabidopsis*
*Bradley J. Till, Trenton Colbert, Christine Codomo, Linda Enns,
Jessica Johnson, Steven H. Reynolds, Jorja G. Henikoff,
Elizabeth A. Greene, Michael N. Steine, Luca Comai,
and Steven Henikoff* 127

12 Genotyping and Mapping With High-Density Oligonucleotide Arrays
Justin Borevitz 137

13 Forward Genetic Screening of Insertional Mutants
Anja Schneider and Dario Leister 147

14	PCR-Based Screening for Insertional Mutants <i>Anna N. Stepanova and Jose M. Alonso</i>	163
15	Cytogenetic Analysis of <i>Arabidopsis</i> <i>Martin Lysak, Paul Fransz, and Ingo Schubert</i>	173
16	Using Information From Public <i>Arabidopsis</i> Databases to Aid Research <i>Margarita Garcia-Hernandez and Leonore Reiser</i>	187
PART III. TRANSIENT AND STABLE TRANSFORMATION		
17	<i>In Planta Agrobacterium</i> -Mediated Transformation by Vacuum Infiltration <i>Brian W. Tague and Joanna Mantis</i>	215
18	Transient Expression Assay by Agroinfiltration of Leaves <i>Min Woo Lee and Yinong Yang</i>	225
19	Functional Analysis of Transcription Factors by Microparticle Bombardment <i>Ida Ruberti, Giovanna Sessa, and Giorgio Morelli</i>	231
20	Transfection Assays With Protoplasts Containing Integrated Reporter Genes <i>Shiv Tiwari, Shucaï Wang, Gretchen Hagen, and Tom J. Guilfoyle</i>	237
21	Chloroplast Genetic Engineering Via Organogenesis or Somatic Embryogenesis <i>Amit Dhingra and Henry Daniell</i>	245
22	β -Glucuronidase as Reporter Gene: Advantages and Limitations <i>Kye-Won Kim, Vincent R. Franceschi, Laurence B. Davin,</i> <i>and Norman G. Lewis</i>	263
23	Use of Fluorescent Proteins as Reporters <i>Guido Jach</i>	275
24	Luciferases as Reporter Genes <i>Megan M. Southern, Paul E. Brown, and Anthony Hall</i>	293
25	Aequorin as a Reporter Gene <i>Christoph Plieth</i>	307
26	Applications of Chemical-Inducible Expression Systems in Functional Genomics and Biotechnology <i>Jianru Zuo, Peter D. Hare, and Nam-Hai Chua</i>	329
PART IV. TRANSCRIPTOMICS		
27	RNA Extraction <i>Huazhong Shi and Ray Bressan</i>	345
28	Target Preparation for DNA Microarray Hybridization <i>Tong Zhu, Sherman H. Chang, and Pedro Gil</i>	349
29	Statistical Issues in Microarray Data Analysis <i>Willem A. Rensink and Samuel P. Hazen</i>	359
30	Preparation and Quality Assessment of RNA From Cell-Specific Samples Obtained by Laser Microdissection <i>Regine Kleber and Julia Kehr</i>	367

PART V. PROTEOMICS

- 31 Protein Isolation and Second-Dimension Electrophoretic Separation
Bernhard Schlesier and Hans-Peter Mock 381
- 32 Isolation of Nuclear Proteins
Tomasz T. Calikowski and Iris Meier 393
- 33 Purification and Fractionation of Membranes for Proteomic Analysis
**Anne Marmagne, Daniel Salvi, Norbert Rolland, Geneviève Ephritikhine,
 Jacques Joyard, and Hélène Barbier-Brygoo** 403
- 34 Protein Microsequencing
Alberto Paradela and Juan Pablo Albar 421
- 35 Peptide-Based Phosphoproteomics
 With Immobilized Metal Ion Chromatography
Thomas S. Nühse and Scott C. Peck 431

PART VI. METABOLOMICS

- 36 Metabolite Profiling in *Arabidopsis*
Oliver Fiehn 439
- 37 Hormone Profiling in *Arabidopsis*
Axel Müller, Petra Dückting, and Elmar W. Weiler 449
- Index 459
