Preface xv

1 Introduction to Parasitology 1

Relationship of Parasitology to Other Sciences 1

Some Basic Definitions 2

Interactions of Symbionts 2

Hosts 4

Parasitology and Human Welfare 4

Parasites of Domestic and Wild Animals 6

Parasitology for Fun and Profit 7

Careers in Parasitology 7

References 8

Additional References 8

Parasitology on the World Wide Web 9

2 Basic Principles and Concepts I: Parasite Systematics, Ecology, and Evolution 11

Systematics and Taxonomy of Parasites 11

Parasite Ecology 12

The Host as an Environment 12

A Parasite's Ecological Niche 12

Trophic Relationships 14

Parasite Populations 15

Adaptations for Transmission 16

Epidemiology 18

Mathematical Models 18

Parasite Evolution 19

Evolutionary Associations Between Parasites and Hosts 19

Parasitism and Sexual Selection 21

Evolution of Virulence 22

References 22

Additional References 23

3 Basic Principles and Concepts II: Immunology and Pathology 25

Susceptibility and Resistance 25

Innate Defense Mechanisms 25

Physical and Chemical Barriers 25

Cellular Defenses 26

Immunity in Invertebrates 28

Acquired Immune Response in Vertebrates 28

Basics of Self and Nonself Recognition 29

Antibodies 29

Lymphocytes 30

Cytokines 30

Generation of a Humoral Response 30

The Cell-Mediated Response 31

Inflammation 34

Acquired Immune Deficiency Syndrome (AIDS) 35

Immunodiagnosis 35

Pathogenesis of Parasitic Infections 37

Accommodation and Tolerance in the Host-Parasite Relationship 38

References 41

Additional References 42

4 Parasitic Protozoa: Form, Function, and Classification 43

Form and Function 43

Nucleus and Cytoplasm 44

Locomotor Organelles 46

Reproduction and Life Cycles 50

Encystment 52

Feeding and Metabolism 52

Excretion and Osmoregulation 54

Endosymbionts 54

Classification of Protozoan Phyla 54

Stramenopiles 56

Amebas 57

Characters Generally Shared by Amebas 57

References 59

Additional References 60

5 Kinetoplasta: Trypanosomes and Their Kin 61

Forms of Trypanosomatidae 61

Genus *Trypanosoma* 64

Section Salivaria 65

Section Stercoraria 70

Genus *Leishmania* 76

Cutaneous Leishmaniasis 79

Visceral Leishmaniasis 82

Other Trypanosomatid Parasites 85

- Genus *Leptomonas* 85
 Genus *Herpetomonas* 85
 Genus *Crithidia* 85
 Genus *Blastocrithidia* 85
 Genus *Phytomonas* 85
 References 85
 Additional References 88

6 Other Flagellated Protozoa 89**Order Retortamonadida 89**

- Family Retortamonadidae 89

Order Diplomonadida 90

- Family Hexamitidae 90

Trichomonads (Class Trichomonada, Order Trichomonadida) 95

- Family Trichomonadidae 95
 Family Monocercomonadidae 99

Order Opalinida (Slopalinida) 102

- Family Opalinidae 102
 References 104
 Additional References 106

7 The Amebas 107**Amebas Infecting Mouth and Intestine 107**

- Family Entamoebidae 107

Amebas Infecting Brain and Eyes 116

- Family Vahlkampfiidae 116
 Family Acanthamoebidae 118
 Amebas of Uncertain Affinities 119
 References 120
 Additional References 121

8 Phylum Apicomplexa: Gregarines, Coccidia, and Related Organisms 123**Apicomplexan Structure 123****Class Conoidasida, Subclass****Gregarinasina 124**

- Order Eugregarinorida 125

Subclass Coccidiasina 126

- Order Eucoccidiorida 127
 Suborder Adeleorina 127
 Suborder Eimeriorina 128

References 143

Additional References 146

9 Phylum Apicomplexa: Malaria Organisms and Piroplasms 147**Order Haemospororida 147**

- Genus *Plasmodium* 147
 Genus *Haemoproteus* 164
 Genus *Leucocytozoon* 165

Order Piroplasmida 166

- Family Babesiidae 166
 Family Theileriidae 169
 References 170
 Additional References 173

10 Phylum Ciliophora: Ciliated Protistan Parasites 175**Class Spirotrichea 175**

- Order Clevelandellida; Family Nyctotheridae 175

Class Litostomatea 176

- Order Vestibuliferida, Family Balantidiidae 176
 Order Entodiniomorphida 177

Class Oligohymenophorea 178

- Subclass Hymenostomatia, Order Hymenostomatida,
 Family Ichthyophthiriidae 178
 Subclass Peritrichia, Order Mobilida, Family
 Trichodinidae 178
 References 180
 Additional References 180

11 Microsporida and Myxozoa: Parasites with Polar Filaments 181**Phylum Microsporida 181**

- Family Nosematidae 183
 Order Microsporidian Species 183

Myxozoa 184

- Family Myxobolidae 185
 References 190
 Additional References 191

12 The Mesozoa: Pioneers or Degenerates? 193**Class Rhombozoa 193**

- Order Dicyemida 193
 Order Heterocyemida 194

Class Orthonectida	195
Morphology and Biology	195
Phylogenetic Position	197
Physiology and Host-Parasite Relationships	197
References	198
Additional References	198

18	Digeneans: Plagiorchiformes and Opisthorchiformes	275
	Other Plagiorchiformes	275
	Suborder Plagiorchiata	275
	Suborder Troglotrematidae	279

Order Opisthorchiformes 285

Family Opisthorchiidae 285

Family Heterophyidae 289

References 290

Additional References 291

19 Monogenoidea 293

Form and Function 293

Body Form 293

Tegument 296

Muscular and Nervous Systems 297

Osmoregulatory System 299

Acquisition of Nutrients 299

Male Reproductive System 300

Female Reproductive System 300

Development 301

Oncomiracidium 301

Subclass Polyonchoinea 302

Subclass Polystomatoinea 304

Subclass Oligonchoinea 305

Phylogeny 306

Classification of Class Monogenoidea 306

References 307

Additional References 309

20 Cestoidea: Form, Function, and Classification of Tapeworms 311

Form and Function 311

Strobila 311

Scolex 312

Tegument 313

Calcereous Corpuscles 317

Muscular System 319

Nervous System 319

Excretion and Osmoregulation 320

Reproductive Systems 322

Development 324

Larval and Juvenile Development 325

Development in the Definitive Host 328

Metabolism 329

Acquisition of Nutrients 329

Energy Metabolism 330

Synthetic Metabolism 332

Hormonal Effects of Metabolites 332

Classification of Class Cestoidea 333

References 335

Additional References 338

21 Tapeworms 339

Order Pseudophyllidea 339

Family Diphylobothriidae 339

Other Pseudophyllideans Found in Humans 343

Sparganosis 343

Order Caryophyllidea 344

Order Spathebothriidea 344

Order Cyclophyllidea 345

Family Taeniidae 345

Other Taeniids of Medical Importance 350

Family Hymenolepididae 354

Family Davaineidae 356

Family Dilepididae 356

Family Anoplocephalidae 357

Family Mesocetoididae 358

Family Dioecocetidae 359

Order Proteocephalata 359

Order Tetraphyllidea 360

Order Trypanorhyncha 361

Subcohort Amphilinidea 362

Cohort Gyrocotylidea 363

References 363

Additional References 366

22 Phylum Nematoda: Form, Function, and Classification 367

Historical Aspects 367

Form and Function 368

Body Wall 368

Musculature 371

Pseudocoel and Hydrostatic Skeleton 371

Nervous System 373

Digestive System and Acquisition of Nutrients 377

Secretory-Excretory System 380

Reproduction 381

Development 385

Eggshell Formation 385

Embryogenesis 386

Embryonic Metabolism 387

Hatching 387

Growth and Ecdysis 387

Metabolism 389

Energy Metabolism 389

Synthetic Metabolism 390

Classification of Phylum Nematoda 391

References 393

Additional References 396

23 Nematodes: Trichurida and Dioctophymatida, Enoplean Parasites 397

Order Trichurida 397

Family Trichuridae 397

Family Capillariidae 399

Family Anatrachosomatidae 401

Family Trichinellidae 401

Order Dioctophymatida 407

Family Dioctophymatidae 407

References 409

Additional References 410
